3 Grounds for concluding that there is a risk to public health

The basis for concluding that a situation has arisen that is, or is likely to be, a risk to public health is as follows—

- (a) public health authorities both internationally and in Australia have been monitoring and responding to outbreaks of COVID-19, which is a condition caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2),
- (b) COVID-19 is a potentially fatal condition and is highly contagious,
- (c) a number of cases of individuals with COVID-19 have now been confirmed in New South Wales and other Australian jurisdictions, including by means of

community transmission, and there is an ongoing risk of continuing introduction of COVID-19 into the New South Wales community,

- (d) due to the highly contagious nature of COVID-19, close contacts of individuals with COVID-19 have an increased risk of catching and transmitting COVID-19.

4 Direction—persons diagnosed with COVID-19 must self-isolate

- (1) The Minister directs that a diagnosed person must, immediately after receiving the diagnosis of COVID-19, travel directly to—
 - (a) a residence or place that has been determined by a designated health practitioner to be suitable for the person to reside in, or
 - (b) if determined as necessary by a designated health practitioner—a hospital for assessment by a medical practitioner, or
