## Threatened Species Conservation Act 1995 No 101

### Notice of Final Determination and Amendment of Schedule 1 to Act

The Scientific Committee established under the *Threatened Species Conservation Act 1995* has, in pursuance of Division 3 of Part 2 of that Act, made a final determination to insert the following population of amphibian in Part 2 of Schedule 1 to that Act (Endangered populations) and, accordingly, that Schedule is amended as set out in Annexure "A" to this Notice:

#### Animals

#### Vertebrates

#### Amphibians

Myobatrachidae

*Adelotus brevis* (Gunther 1863)

Tusked Frog population in the Nandewar and New England Tablelands Bioregions

The final determination to insert this population in Part 2 of Schedule 1 has been made because the Scientific Committee is of the opinion that the numbers of the population have been reduced to such a critical level that it is in immediate danger of extinction, that it is not a population of a species already listed in Schedule 1, that it is disjunct and at or near the limit of its geographic range, and that it is otherwise of significant conservation value.

Copies of the final determination may be inspected at:

The National Parks Centre  
102 George St  
The Rocks  
Sydney

and at all District Offices of the National Parks and Wildlife Service during business hours.

**2000 No 708**

Threatened Species Conservation Act 1995 No 101—Final Determination

---

Signed at Sydney, this 5th day of December 2000.

Dr Chris Dickman

Chairperson  
Scientific Committee

**Annexure “A”**

**Schedule 1** to the *Threatened Species Conservation Act 1995* is amended by inserting in Part 2 in alphabetical order under the heading “Animals” and the sub-heading “Vertebrates” the matter:

**Amphibians**

Myobatrachidae

*Adelotus brevis* (Gunther 1863)

Tusked Frog population in the Nandewar  
and New England Tablelands Bioregions
