- (2) The inquiry is to report on the options for dealing with those issues, and the environmental, economic, agricultural and other impacts of those options as required by the terms of reference of the inquiry. For the purposes of this subsection:
 - (a) agricultural impacts include the impact of changed water flows on agricultural industries that are dependent on irrigation, and
 - (b) environmental impacts include the impact of releases of water from storage that provide environmental flows, being flows in rivers and streams which mimic natural seasonal flows and which restore and maintain the ecology of those rivers and streams.
- (3) For the purposes of reporting on the impacts of those options, the inquiry may deal with the impacts on areas other than the designated area of inquiry.

- (4) Any decision by the Minister as to the terms of reference of the inquiry must be approved by a Minister of the Commonwealth and a Minister of the State of Victoria.
- (5) Any decision by the Minister as to the person or persons to be appointed to hold the inquiry and the procedures for holding the inquiry must be approved by a Minister of the State of Victoria.

- (2) The Minister is to make that final report public at the time it is submitted to the Minister.
- (3) It is the duty of the Minister to use his or her best endeavours to determine the response of the State of New South Wales to that final report, and to reach an agreement with the State of Victoria on the outcomes of the inquiry, within 2 months after that final report is made or within such other period as is agreed between the Minister and a Minister of the State of Victoria.
- (4) The agreement is to provide for:
 - (a) the initial release of water to the Snowy River for environmental reasons on the issue of the Snowy water licence, and

 - (b) the obligation to release water to rivers or streams flowing from the Snowy water catchment (and to rivers, streams and lakes within that catchment) in accordance with the arrangements made by the licence, including arrangements made for drought and other emergencies and for environmental reasons.

The arrangements made by the licence for the release of water are to include an obligation to give notice of the timing and volume of water releases in the manner required by the licence.

- (3) The Snowy water licence is to give effect to any agreement between the States of New South Wales and Victoria following the report of the water inquiry under Part 4 and, in particular, the licence is to give effect to the provisions of the agreement relating to the initial release of water to the Snowy River for environmental reasons on the issue of the licence.
- (4) The rights of the Snowy Hydro Company to collect, divert, store, use and release water as referred to in this section are subject to section 32 of this Act (Local water extraction) and to section 7 of the *Water Act 1912* (Rights of occupiers of riparian land).
- (5) The rights of the Snowy Hydro Company to collect, divert, store and use water as referred to in this section do not extend to subsurface water.
- (6) The rights or obligations of the Snowy Hydro Company to collect, divert, store, use and release water are subject to the conditions and other provisions of the licence.
- (7) The rights or obligations of the Snowy Hydro Company to release water from its storages as referred to in this section do not authorise the Company to act as a supplier of that water to others or to give rights to others to use that water (except as authorised by the Water Administration Ministerial Corporation).

24 Term of licence

- (1) The term of the Snowy water licence is to be 75 years.
- (2) Except as provided by an Act:
 - (a) the licence may not be renewed, and
 - (b) a further licence may not be issued (unless it is issued on the revocation of the licence and its term does not exceed the balance of the term of the revoked licence).

25 Review of licence

- (1) The Water Administration Ministerial Corporation is to review the obligations under the Snowy water licence at such intervals, and in such manner, as the licence provides.

- (2) The licence must provide for such reviews at the following intervals:
 - (a) after the first 5 years (being a review of the provisions of the licence relating to the initial release of water to the Snowy River for environmental reasons), and
 - (b) at intervals of 10 years thereafter.
- (3) It is the duty of the Water Administration Ministerial Corporation to use its best endeavours to complete that first review, and to give effect to the results of the review, within 6 months after the fifth anniversary of the issue of the licence. For that purpose, the Corporation may commence public consultation on the review before that anniversary.

26 Variation of licence

- (1) The Snowy water licence may be varied by the Water Administration Ministerial Corporation:
