

New South Wales

Orange Local Environmental Plan 2011 (Amendment No 1)

under the

Environmental Planning and Assessment Act 1979

I, the Minister for Planning and Infrastructure, make the following local environmental plan under the *Environmental Planning and Assessment Act 1979*.

GARRY STYLES, GENERAL MANAGER, ORANGE CITY COUNCIL
As delegate for the Minister for Planning and Infrastructure

Orange Local Environmental Plan 2011 (Amendment No 1)

under the

Environmental Planning and Assessment Act 1979

1 Name of Plan

This Plan is *Orange Local Environmental Plan 2011 (Amendment No 1)*.

2 Commencement

This Plan commences on the day on which it is published on the NSW legislation website.

3 Land to which Plan applies

This Plan applies to the land to which *Orange Local Environmental Plan 2011* applies.

4 Maps

Each map adopted by *Orange Local Environmental Plan 2011* that is specified in Column 1 of the following table is declared by this Plan to be amended or replaced, as the case requires, by the map specified opposite in Column 2 of the table as approved by the Minister on the making of this Plan:

Column 1	Column 2

Schedule 1 Amendment of Orange Local Environmental Plan 2011

[1] Clause 4.1B Minimum lot sizes for dual occupancy, multi dwelling housing and residential flat buildings

Omit “1,250 square metres” from Column 3 of the matter relating to Zone R2 Low Density Residential in the Table to the clause.

Insert instead “1,200 square metres”.

[2] Clause 4.1C

Insert after clause 4.1B:

4.1C Exceptions to minimum lot sizes for certain residential development

- (1) This clause applies to land in Ploughmans Valley that is both:
 - (a) within Zone R2 Low Density Residential, and
 - (b) identified on the Lot Size Map as having a minimum lot size of 850 square metres.
- (2) Despite any other provision of this Plan, development consent may be granted to the subdivision of land to which this clause applies if:
 - (a) a dual occupancy is lawfully erected on the land, and
 - (b) the area of each resulting lot will not be less than:
 - (i) 650 square metres for a dual occupancy (attached), or
 - (ii) 600 square metres for a dual occupancy (detached) or multi dwelling housing, and
 - (c) only one dwelling will be located on each lot resulting from the subdivision.
- (3) Development consent may be granted to a single development application for consent to development of land to which this clause applies that involves both of the following:
 - (a) the subdivision of land into 2 or more lots,
 - (b) the erection of a dual occupancy (attached) or dual occupancy (detached) with a single dwelling on each lot resulting from the subdivision, if the size of each lot is equal to or greater than:
 - (i) 650 square metres for a dual occupancy (attached), or
 - (ii) 600 square metres for a dual occupancy (detached).

[3] Clause 4.2A Erection of dwelling houses on land in certain rural and environmental protection zones

Insert after clause 4.2A (5):

- (5A) Despite subclause (3), development consent must not be granted for the erection of a dwelling house on land to which this clause applies that is being, or that is intended to be, used for the purpose of intensive plant agriculture unless the consent authority is satisfied that:
 - (a) the land is located wholly within Zone RU1 Primary Production or Zone E3 Environmental Management or a combination of those zones, and
 - (b) the lot has an area of not less than 25 hectares, and

- (c) the land is being or will be used for the purpose of intensive plant agriculture, and
- (d) the quality and area of the land is suitable for the commercial production of the proposed or existing intensive plant agriculture of the kind proposed, and
- (e) the dwelling house is required to support the carrying out of the proposed or existing intensive plant agriculture, and
- (f) the land:
 - (i) has an average annual rainfall, recorded over a minimum 5-year period, sufficient for the proposed use, or
 - (ii) is subject, or will be subject, to irrigation requiring a licence under the *Water Act 1912* or the *Water Management Act 2000* and the volume and entitlement of water available under that licence is or will be adequate for the purpose of intensive plant agriculture, and
- (g) services for the supply of electricity and other infrastructure to support the intensive plant agriculture are available or adequate arrangements have been made to make them available when required, and
- (h) the sustainable intensive plant agriculture activity will have commenced or been established before the subdivision is registered.

Note. *State Environmental Planning Policy (Rural Lands) 2008* and the fact sheet entitled *Assessing Intensive Plant Agriculture Developments* (published by the NSW Government in December 2011) set out other relevant issues for the consideration of consent authorities when assessing development applications for intensive plant agriculture.

[4] Clause 4.2B

Insert after clause 4.2A:

4.2B Rural subdivision for intensive plant agriculture

- (1) The objectives of this clause are as follows:
 - (a) to enable flexibility in the application of lot size standards for subdivision for the purpose of intensive plant agriculture, which is intended to include an associated dwelling,
 - (b) to apply controls on subdivision to avoid land being used for non-sustainable intensive plant agriculture.
- (2) This clause applies to land in the following:
 - (a) Zone RU1 Primary Production,
 - (b) Zone E3 Environmental Management.
- (3) Land to which this clause applies may, with development consent, be subdivided for the purpose of intensive plant agriculture to create a lot of a size that is less than the minimum size shown on the Lot Size Map in relation to that land.
- (4) However, development consent must not be granted for the creation of such a lot if an existing or new dwelling house would, as a result of the subdivision, be situated on the lot unless the consent authority is satisfied that:
 - (a) the lot has an area of not less than 25 hectares, and
 - (b) the land is being or will be used for the purpose of intensive plant agriculture, and

- (c) the quality and area of the land is suitable for the commercial production of the proposed or existing intensive plant agriculture of the kind proposed, and
- (d) the dwelling house is required to support the carrying out of the proposed or existing intensive plant agriculture, and
- (e) the land:
 - (i) has an average annual rainfall, recorded over a minimum 5-year period, sufficient for the proposed use, or
 - (ii) is subject, or will be subject, to irrigation requiring a licence under the *Water Act 1912* or the *Water Management Act 2000* and the volume and entitlement of water available under that licence is or will be adequate for the purpose of intensive plant agriculture, and
- (f) services for the supply of electricity and other infrastructure to support the intensive plant agriculture are available or adequate arrangements have been made to make them available when required, and
- (g) the sustainable intensive plant agriculture activity will have commenced or been established before the subdivision is registered.

Note. *State Environmental Planning Policy (Rural Lands) 2008* and the fact sheet entitled *Assessing Intensive Plant Agriculture Developments* (published by the NSW Government in December 2011) set out other relevant issues for the consideration of consent authorities when assessing development applications for intensive plant agriculture.

[5] Clause 7.11

Insert after clause 7.10:

7.11 Essential services

Development consent must not be granted to development unless the consent authority is satisfied that any of the following services that are essential for the proposed development are available or that adequate arrangements have been made to make them available when required:

- (a) the supply of water,
- (b) the supply of electricity,
- (c) the disposal and management of sewage,
- (d) storm water drainage or on-site conservation,
- (e) suitable road access.

[6] Schedule 5 Environmental heritage
