Mining and Petroleum Legislation Amendment (Grant of Coal and Petroleum Prospecting Titles) Bill 2015

Explanatory note

This explanatory note relates to this Bill as introduced into Parliament.

The following Bills are cognate with this Bill:

Mining and Petroleum Legislation Amendment (Harmonisation) Bill 2015

Mining and Petroleum Legislation Amendment (Land Access Arbitration) Bill 2015

Protection of the Environment Operations Amendment (Enforcement of Gas and Other Petroleum Legislation) Bill 2015

Work Health and Safety (Mines and Petroleum) Legislation Amendment (Harmonisation) Bill 2015

Overview of Bill

The object of this Bill is to amend the *Mining Act 1992* (***the Mining Act***) and the *Petroleum (Onshore) Act 1991* (***the Petroleum Act***) to establish a new system for granting certain prospecting titles for coal and petroleum. The new system will feature a competitive selection process for the granting of an exploration licence or assessment lease in relation to certain areas under the Mining Act or an exploration licence, assessment lease or special prospecting authority under the Petroleum Act.

For that purpose, the Bill:

- (a) enables the Minister to constitute an area as a ***controlled release area*** for specified minerals under the Mining Act, and
- (b) provides that the whole State is constituted as a controlled release area for coal, and

- (c) provides that the following prospecting titles can only be granted pursuant to a competitive selection process:
 - (i) an exploration licence or assessment lease under the Mining Act relating to land in a controlled release area (with certain exceptions for exploration licences granted to holders of existing mining authorities or on behalf of the Crown), and
 - (ii) an exploration licence, assessment lease or special prospecting authority under the Petroleum Act, and
- (d) provides that a petroleum title is not to be granted in respect of an area unless any applicant who had an application in respect of that area expunged (by operation of the *Petroleum (Onshore) Amendment (NSW Gas Plan) Act 2014*) has first been given an opportunity to participate in a competitive selection process for the grant of the title, and
- (e) provides for various matters in relation to invitations for competitive selection applications, the process for competitive selection and the consideration of applications, and
- (f) makes miscellaneous amendments relating to applications for prospecting titles under the Mining Act and the Petroleum Act.

Outline of provisions

Clause 1 sets out the name (also called the short title) of the proposed Act.

Clause 2 provides for the commencement of the proposed Act on a day or days to be appointed by proclamation.

Schedule 1 Amendment of Mining Act 1992 No 29

Controlled release areas

Schedule 1 [18] inserts proposed section 368A to enable the Minister to constitute any land as a controlled release area for minerals. The proposed section also provides that the whole State is constituted as a controlled release area for coal and that more than one controlled release area may be constituted in respect of any area. Accordingly, an application for an exploration licence or assessment lease in relation to coal will generally be required to be made pursuant to a competitive selection process under proposed Schedule 1A.

Schedule 1 [21] inserts definitions of *controlled release area* and *controlled release mineral*.

Schedule 1 [17] provides that a mineral is not an allocated mineral in an area while the mineral is a controlled release mineral in that area.

Schedule 1 [14]–[16] make consequential amendments.

Applications for controlled release prospecting titles

Schedule 1 [1] inserts proposed section 13 (3A) to provide that an application for an exploration licence in relation to a controlled release mineral in a controlled release area can only be made pursuant to a competitive selection process under proposed Schedule 1A, by the holder of an existing authority for coal under proposed section 13C or on behalf of the Crown under proposed section 13D.

Schedule 1 [3] inserts proposed sections 13C and 13D. Proposed section 13C enables the holder of a mining authority for coal to apply for an exploration licence for coal, subject to the requirements of the regulations, and sets out the grounds for refusal and other matters to be considered in determining the application. Proposed section 13D enables the Secretary of the Department of Industry, Skills and Regional Development to apply on behalf of the Crown for an exploration licence for a controlled release mineral in a controlled release area to authorise prospecting for the purpose of obtaining information about the potential mineral bearing qualities of land in the State. The rights conferred on the holder of the licence and the procedures for the relinquishment of the licence are subject to the regulations.

Schedule 1 [4] removes the prohibition on granting an exploration licence (following a competitive selection process) over land the subject of an application for an exploration licence.

Schedule 1 [5] inserts proposed section 33 (3A) to provide that an application for an assessment lease in relation to a controlled release mineral in a controlled release area can only be made by way of a competitive selection application or by the holder of an exploration licence or mining lease over land in that area in respect of that mineral.

Schedule 1 [2] and [6] provide that an applicant for a competitive selection application is not required to publish notice of the application.

Schedule 1 [7] removes the prohibition on granting an assessment lease (following a competitive selection process) over land the subject of a preceding application for an exploration licence or assessment lease.

Schedule 1 [8] provides that certain provisions of the Mining Act that require the Minister to notify affected Government agencies and councils of a proposal to grant an assessment lease, and to resolve objections in relation to the proposal, do not apply to a competitive selection application for the grant of an assessment lease.

Applications and tenders for mining leases

Schedule 1 [9] extends the categories of authority holder that may apply for a mining lease in relation to an allocated mineral in a mineral allocation area to include the holder of a mining lease over land in that area in respect of that mineral.

Schedule 1 [10] provides that an application for a mining lease in relation to a controlled release mineral in a controlled release area can only be made by the holder of an exploration licence, assessment lease or mining lease over land in that area in respect of that mineral.

Schedule 1 [11] extends a provision which enables the Minister to invite tenders for mining leases for allocated minerals (within a mineral allocation area) to controlled release minerals (within a controlled release area). **Schedule 1 [12] and [13]** make consequential amendments.

Competitive selection process

Schedule 1 [19] inserts proposed Schedule 1A, which provides for matters relating to competitive selection applications. The proposed Schedule contains the following provisions:

Clause 1 of the proposed Schedule defines *controlled release prospecting title* as an exploration licence or assessment lease that relates to a controlled release mineral in a controlled release area.

Clause 2 of the proposed Schedule enables the Minister to invite (by notice in the Gazette) applications for the grant of a controlled release prospecting title for a specified area of land on the basis of competitive selection (and to vary or withdraw an invitation). An invitation can stipulate additional information that is to accompany the application and can relate to more than one area of land. Notice of the making or refusal of a competitive selection application is not required to be published in the Gazette.

Clause 3 of the proposed Schedule provides that the Minister is to determine the process for competitive selection (which can be different for different areas of land and for different minerals) and include information the Minister considers appropriate in the invitation for applications.

Clause 4 provides that the Minister must take into account in the competitive selection process any matter required to be considered in determining an application for the grant of a mining authority and any matter prescribed by the regulations made under the Mining Act. The Minister may determine any other matters to be considered.

Clause 5 provides that an invitation for competitive selection applications can require applications to include an undertaking that the applicant will pay a non-refundable amount (specified in the application or determined through a competitive selection process) as consideration for the grant of the title. The process for competitive selection may provide for public release of information relating to the consideration offered.

Clause 6 provides that after a competitive selection application has been considered, it is to be dealt with and determined in accordance with the provisions of the Mining Act that relate to the

mining authority concerned. An application may be refused at any time if it fails to meet the requirements of the invitation for competitive selection applications.

Savings and transitional provisions

Schedule 1 [20] provides for savings and transitional matters. In particular, an application made before the commencement of proposed section 13 (3A) for the consent of the Minister to apply for an exploration licence relating to coal is to be dealt with as if the proposed Act had not been enacted.

Schedule 2 Amendment of Petroleum (Onshore) Act 1991 No 84

Applications for petroleum titles

Schedule 2 [1] provides that any person may apply for an exploration licence, assessment lease, production lease or special prospecting authority under the Petroleum Act. However, an application for an assessment lease (by an applicant who does not hold an exploration licence over the land concerned) or an exploration licence or special prospecting authority can only be made pursuant to a competitive selection process under proposed Schedule 1A.

Schedule 2 [2] removes the prohibition on granting an exploration licence, assessment lease or special prospecting authority (following a competitive selection process) over an onshore area included in a preceding competitive selection application.

Schedule 2 [3] omits a provision that requires that an application for a petroleum title must relate to only one area.

Schedule 2 [4] provides that the area of land over which a petroleum title is renewed may differ from the area over which the renewal was sought, but may not include any area not subject to the title immediately before the renewal.

Schedule 2 [5] and [6] provide that an exploration licence or assessment lease may be granted over all or any part of the land over which the licence or lease was sought.

Schedule 2 [9] and [10] provide that a petroleum title is not to be granted in respect of an area unless any applicant who had an application in respect of that area expunged (by operation of the *Petroleum (Onshore) Amendment (NSW Gas Plan) Act 2014*) has first been given an opportunity to participate in a competitive selection process for the grant of the title. **Schedule 2 [11] and [12]** make consequential amendments.

Competitive selection process

Schedule 2 [7] inserts proposed Schedule 1A, which provides for matters relating to competitive selection applications. The proposed Schedule contains the following provisions:

Clause 1 of the proposed Schedule defines *petroleum prospecting title* as an exploration licence, assessment lease or special prospecting authority under the Petroleum Act.

Clause 2 of the proposed Schedule enables the Minister to invite (by notice in the Gazette) applications for the grant of a petroleum prospecting title for a specified area of land on the basis of competitive selection (and to vary or withdraw an invitation). An invitation can stipulate additional information that is to accompany the application and can relate to more than one area of land. Notice of the making or refusal of a competitive selection application is not required to be published in the Gazette.

Clause 3 of the proposed Schedule provides that the Minister is to determine the process for competitive selection (which can be different for different areas of land) and include information the Minister considers appropriate in the invitation for applications.

Clause 4 provides that the Minister must take into account in the competitive selection process any matter required to be considered in determining an application for the grant of a petroleum title and any matter prescribed by the regulations made under the Petroleum Act. The Minister may determine any other matters to be considered.

Clause 5 provides that an invitation for competitive selection applications can require applications to include an undertaking that the applicant will pay a non-refundable amount (specified in the application or determined through a competitive selection process) as consideration for the grant of the title. The process for competitive selection may provide for public release of information relating to the consideration offered.

Clause 6 provides that after a competitive selection application has been considered, it is to be dealt with and determined in accordance with the provisions of the Petroleum Act that relate to the petroleum title concerned. An application may be refused at any time if it fails to meet the requirements of the invitation for competitive selection applications.

Savings and transitional provisions

Schedule 2 [8] provides that an application for an exploration licence (made before the commencement of the amendment made by Schedule 2 [1]) that relates to an area designated by the Minister as an area in respect of which a petroleum title is not to be granted is to be dealt with as if the proposed Act had not been enacted.

13D Crown pre-competitive exploration licences	1
(1) The Secretary may apply on behalf of the Crown for an exploration licence (a <i>Crown pre-competitive exploration licence</i>) for a controlled release mineral within a controlled release area to authorise prospecting for the purpose of obtaining information about the potential mineral bearing qualities of land in the State.	2 3 4 5 6
(2) The regulations may make provision for or with respect to the following:	7
(a) requirements for prospecting conducted under a Crown pre-competitive exploration licence including the purposes for which prospecting is to be undertaken and the criteria that prospecting under the licence is to satisfy,	8 9 10 11
(b) procedures for the relinquishment of a Crown pre-competitive exploration licence when prospecting under the licence is completed.	12 13
(3) The rights conferred by section 29 (Rights under exploration licence) on the holder of a Crown pre-competitive exploration licence are subject to the requirements of the regulations under this section.	14 15 16
[4] Section 19 (1A)	17
Insert after section 19 (1):	18
(1A) Despite subsection (1) (c) (i), an exploration licence may be granted over land the subject of a preceding application for an exploration licence if:	19 20
(a) the application for the firstmentioned exploration licence was made pursuant to an invitation under Schedule 1A (Competitive selection process for controlled release prospecting titles), and	21 22 23
(b) that invitation was issued before the preceding application was lodged.	24
[5] Section 33 Application for assessment lease	25
Insert after section 33 (3):	26
(3A) An application that relates to land in a controlled release area may not be made in relation to a controlled release mineral except:	27 28
(a) by the holder of an exploration licence or mining lease over that land in respect of that mineral or group of minerals, or	29 30
(b) pursuant to an invitation under Schedule 1A (Competitive selection process for controlled release prospecting titles).	31 32
[6] Section 33A Notice of application for assessment lease	33

Insert “or for a controlled release mineral in respect of land within a controlled release area” after “area”.	2 3
[17] Section 368 Mineral allocation areas	4
Insert after section 368 (3):	5
(4) A mineral is not an allocated mineral in an area while the mineral is a controlled release mineral in that area.	6 7
[18] Section 368A	8
Insert after section 368:	9
368A Controlled release areas	10
(1) The Minister may, by order published in the Gazette, constitute any land as a controlled release area and may, by the same or a subsequent order so published, name the area and fix its boundaries.	11 12 13
(2) A controlled release area may be constituted for all minerals, for specified minerals or groups of minerals or for all minerals other than specified minerals or groups of minerals.	14 15 16
(3) The whole State is constituted as a controlled release area for coal.	17
(4) More than one controlled release area may be constituted in respect of any area.	18 19

Insert before Schedule 1:	21
Schedule 1A Competitive selection process for controlled release prospecting titles	22 23
(Sections 13 and 33)	24
1 Definition	25
In this Schedule <i>controlled release prospecting title</i> means an exploration licence or assessment lease that relates to a controlled release mineral in a controlled release area.	26 27 28
2 Invitations for competitive selection applications	29
(1) The decision-maker may by notice published in the Gazette invite applications (<i>competitive selection applications</i>) for the grant of a controlled release prospecting title in a specified area on the basis of competitive selection for the grant of the title.	30 31 32 33
(2) An invitation for competitive selection applications can stipulate information that is to accompany the application in addition to information required to accompany the application under section 13 or 33.	34 35 36
(3) An invitation for competitive selection applications can relate to more than one area of land.	37 38
(4) The decision-maker may by notice published in the Gazette vary or withdraw an invitation for competitive selection applications, and the regulations may	39 40

make provision for or with respect to the consequences of the variation or withdrawal of an invitation.	1 2
(5) Section 136 does not apply to an invitation for competitive selection applications or to a competitive selection application.	3 4
3 Competitive selection process	5
(1) The decision-maker is to determine the process for competitive selection for the grant of a controlled release prospecting title.	6 7
(2) The process for competitive selection can be different for different areas of land and for different controlled release minerals.	8 9
(3) An invitation for competitive selection applications is to include such information as to the process for competitive selection as the decision-maker considers appropriate.	10 11 12
4 Matters to be taken into account in competitive selection process	13
(1) Without limiting any other provision of this Act, the decision-maker must take into account in the competitive selection process:	14 15
(a) any matter that the decision-maker is required under this Act to take into account in considering an application for the grant of an exploration licence or assessment lease, and	16 17 18
(b) any matter prescribed by the regulations.	19
(2) The decision-maker may determine any other matters that are to be considered in the competitive selection process and the weight or emphasis to be given to those matters.	20 21 22
5 Consideration for grant of controlled release prospecting title	23
(1) An invitation for competitive selection applications can include a requirement for applications to include an undertaking that the applicant will pay an amount specified in the application or an amount determined through a competitive selection process as consideration offered for the grant of the controlled release prospecting title.	24 25 26 27 28
(2) The process for competitive selection can include the public release of information as to the consideration offered by applicants for the grant of a controlled release prospecting title.	29 30 31
(3) The amount of consideration undertaken to be paid by an applicant for the grant of a controlled release prospecting title is a factor that can be a relevant consideration in the competitive selection process.	32 33 34
(4) The grant of a controlled release prospecting title can be delayed until the amount of any consideration payable for the grant of the title is paid or arrangements for payment or security for payment that are satisfactory to the decision-maker have been entered into.	35 36 37 38
(5) Any amount paid as consideration for the grant of a controlled release prospecting title is not refundable in the event of the title being cancelled.	39 40
6 Determination of applications	41
(1) After a competitive selection application has been considered in accordance with this Schedule, the application is to be dealt with and determined in accordance with the provisions of this Act as they relate to an application for an exploration licence or assessment lease (as appropriate). Accordingly, a power of the decision-maker under this Act to refuse an application for an	42 43 44 45 46

exploration licence or assessment lease applies to a competitive selection application.	1
	2
Note. A competitive selection process does not guarantee that a controlled release prospecting title will be issued (because all competing applications may be refused).	3
	4
(2) If a competitive selection application fails to meet the requirements of the invitation in relation to which it is made, the application can be refused at any time during the competitive selection process without waiting for the process to be finalised.	5

(2) The Minister may determine any other matters that are to be considered in the competitive selection process and the weight or emphasis to be given to those matters.	38 39 40

5	Consideration for grant of petroleum prospecting title	1
(1)	An invitation for competitive selection applications can include a requirement for applications to include an undertaking that the applicant will pay an amount specified in the application or an amount determined through a competitive selection process as consideration offered for the grant of the petroleum prospecting title.	2 3 4 5 6
(2)	The process for competitive selection can include the public release of information as to the consideration offered by applicants for the grant of a petroleum prospecting title.	7 8 9
(3)	The amount of consideration undertaken to be paid by an applicant for the grant of a petroleum prospecting title is a factor that can be a relevant consideration in the competitive selection process.	10 11 12
(4)	The grant of a petroleum prospecting title can be delayed until the amount of any consideration payable for the grant of the title is paid or arrangements for payment or security for payment that are satisfactory to the Minister have been entered into.	13 14 15 16
(5)	Any amount paid as consideration for the grant of a petroleum prospecting title is not refundable in the event of the title being cancelled.	17 18
6	Determination of applications	19
(1)	After a competitive selection application has been considered in accordance with this Schedule, the application is to be dealt with and determined in accordance with the provisions of this Act as they relate to an application for an exploration licence, assessment lease or special prospecting authority (as appropriate). Accordingly, a power of the Minister under this Act to refuse an application for an exploration licence, assessment lease or special prospecting authority applies to a competitive selection application. Note. A competitive selection process does not guarantee that a petroleum prospecting title will be issued (because all competing applications may be refused).	20 21 22 23 24 25 26 27 28
(2)	If a competitive selection application fails to meet the requirements of the invitation in relation to which it is made, the application can be refused at any time during the competitive selection process without waiting for the process to be finalised.	29 30 31 32
[8]	Schedule 1 Savings and transitional provisions	33
