The object of this Bill is to establish the NSW Reconstruction Authority to facilitate prevention, preparedness, recovery, reconstruction and adaptation for the impact of disasters in NSW, to improve resilience for potential disasters and to provide for the Authority's functions and powers.

Outline of provisions

Part 1 Preliminary

Division 1 sets out the name, also called the short title, of the proposed Act and provides for the commencement of the proposed Act. The proposed Division provides that the primary object of the proposed Act is to promote the resilience of the community to the impact of disasters in New South Wales. The proposed Act achieves the primary object by establishing the NSW Reconstruction Authority (the *Authority*).

Division 2 provides for the Dictionary in the proposed Act, Schedule 4 to define certain words and expressions used in the proposed Act. Proposed section 6 defines *disaster* for the proposed Act.

Part 2 NSW Reconstruction Authority

Division 1 establishes the NSW Reconstruction Authority as a corporation and a NSW Government agency subject to the control and direction of the Minister.

Division 2 provides for the functions and powers of the Authority. The functions of the Authority include disaster prevention and preparedness, and reconstruction and recovery following

disasters. The powers of the Authority include the power to carry out development on certain land in particular circumstances and the power to direct a government agency, a State owned corporation, a local council or a person prescribed by the regulations (a *relevant entity*) to take particular actions in certain circumstances, with a maximum penalty of 200 penalty units for failing to comply with a direction. The Authority may work in cooperation with other government agencies and other persons and bodies if the Authority thinks it appropriate and may delegate the exercise of a function of the Authority to certain persons.

Division 3 provides for the staff of the Authority, which includes a chief executive officer. **Division 4** provides the particulars of the role, functions and delegation powers of the chief executive officer of the Authority.

Division 5 provides that the staff of the Authority are to be employed in the Public Service under the *Government Sector Employment Act 2013* to enable the Authority to exercise its functions.

Division 6 provides the chief executive officer may arrange for alternative staffing, facilities and other resources from a Public Service agency or a public or local authority.

Division 7 establishes in the Special Deposits Account a NSW Reconstruction Authority Fund (the *Fund*) to be administered by the Authority and sets out the particulars of amounts that must be paid into and from the Fund. The Treasurer, with the concurrence of the Minister, may authorise additional payments to be made to the Authority from the Consolidated Fund under the *Constitution Act 1902*, section 39 in certain circumstances to meet any exigencies of the Authority.

Part 3 NSW Reconstruction Authority Advisory Board

Division 1 establishes the NSW Reconstruction Authority Advisory Board (the *Advisory Board*) and provides the functions of the Advisory Board, including to provide advice and make recommendations to the chief executive officer of the Authority.

Divisions 2 and 3 provide for the membership of the Advisory Board, including the Chairperson of the Advisory Board, and the conditions of appointment of a member of the Advisory Board.

Division 4 requires the Chairperson of the Advisory Board to give the Minister a report each quarter about the exercise of the Authority's functions.

Part 4 State disaster mitigation plan and disaster adaptation plans

Division 1 requires the Authority to have a disaster mitigation plan (a *State disaster mitigation plan*) that is approved by the Minister to provide guidance about the mitigation of disasters across the State. The proposed Division sets out the purpose of a State disaster mitigation plan and matters the plan must include. The Authority must review and update a State disaster mitigation plan at least once every 5 years or as otherwise directed by the Minister. The Authority is required to prepare a report about the implementation of a State disaster mitigation plan within 5 years of the commencement of the proposed Division.

Division 2 provides that the Authority may prepare a disaster adaptation plan or require a relevant entity to prepare a disaster adaptation plan, provides for the content of a disaster adaptation plan, including mandatory particulars, and provides that the Authority may issue guidelines about disaster adaptation plans and sets out matters the guidelines may provide for.

Division 3 requires certain entities to have regard to a State disaster mitigation plan and any relevant disaster adaptation plan in exercising certain functions.

Part 5 Declaration of declared projects, reconstruction areas and disaster prevention areas

Part 5 provides that the Minister may declare the following by notice published in the Gazette—

- (a) a project for proposed development to be a declared project,

- (b) a part of the State to be a reconstruction area,
- (c) a part of the State to be a disaster prevention area.

The proposed Part also sets out the matters to be established before the Minister makes a declaration under the proposed Part, and provides that the notice for the declaration may specify that an Act or statutory instrument does not apply in relation to the declared project, reconstruction area or disaster prevention area.

Part 6 Declared projects, reconstruction areas and disaster prevention areas

Division 1 provides that proposed Part 6 applies if the Minister makes a declaration under proposed Part 5 and that proposed Part 6 applies despite any other Act or law. Certain terms are also defined for the proposed Part.

Division 2 provides for the functions of the Authority in relation to declared projects, reconstruction areas and disaster prevention areas. The power of the Authority to acquire land in relation to a declared project, reconstruction area and disaster prevention area is established. The proposed Division provides discretionary functions the Authority has in relation to land vested in the Authority, land within a reconstruction area or disaster prevention area or land with the consent of the person in whom it is vested. The Authority may sell, lease, exchange or otherwise deal with, dispose of or grant easements or rights-of-way for land vested in the Authority with the approval of and subject to terms and conditions decided by the Minister. The Authority may, with the concurrence of the Minister administering the *Crown Land Management Act 2016*, surrender land vested in the Authority to the Crown by notice published in the Gazette. For the *Public Works and Procurement Act 1912*, the Authority is taken to be the Constructing Authority and the acquisition of land under proposed section 45(a) is to be taken to be for an authorised work.

Division 3 provides that the Authority may give a decision-maker, as defined by the proposed Part, a notice to decide that requires the decision-maker to make a particular decision within a certain period, and sets out the mandatory particulars of the notice.

Division 4 provides that the Authority may give a decision-maker, as defined by the proposed Part, a progression notice that requires the decision-maker to undertake administrative processes required to complete certain processes within a certain period, and sets out the mandatory particulars of the notice.

Division 5 provides that the Authority may, with the approval of the Minister, give a decision-maker, as defined by the proposed Part, and particular applicants a step-in notice. The step-in notice advises the decision-maker and applicants that the Authority is to make an assessment and decision about certain decisions or processes under the proposed Division. The proposed Division sets out procedural aspects for the giving of the notice, including the matters the Minister must be satisfied of before giving the notice, the particulars of the notice and when the notice may be given. The decision-maker must give the Authority all reasonable assistance or materials the Authority requires to act under the proposed Division. The Authority, after making an assessment about the decision or process the subject of the notice, may make the decision or undertake the process, send back the decision or process, with or without conditions, to the decision-maker, or decide aspects of the decision and send back undecided aspects of the decision, with or without conditions, to the decision-maker.

Division 6 provides that the Authority is not required to consult with anyone before giving a progression notice or a notice to decide.

Certain terms are also defined for the proposed Part.

Division 2 provides that the Minister may authorise the undertaking of development if the chief executive officer requests the authorisation be given in certain circumstances and the authorisation is given during a state of emergency under the *State Emergency and Rescue Management Act 1989* or in relation to a declared project, reconstruction area or disaster prevention area. Ministerial authorisation may only be given if the Minister is satisfied the giving of the authorisation is necessary to protect the safety and welfare of members of the public in certain circumstances. The proposed Division provides that a Ministerial authorisation under the proposed Division has effect despite certain other Acts or statutory instruments and that the authorisation remains in force for the period specified in the authorisation, unless earlier revoked.
