- (c) to require the Authority to perform particular tasks in relation to the quality of the environment, environmental audit and reports on the state of the environment.
- (d) (Repealed)

Part 2 Constitution of the Environment Protection Authority

5 Constitution of Authority

- (1) There is constituted by this Act a body corporate with the corporate name of the Environment Protection Authority.
- (2) The Authority is, for the purposes of any Act, a statutory body representing the Crown.

Part 3 Objectives of the Environment Protection Authority

6 Objectives of the Authority

- (1) The objectives of the Authority are:
 - (a) to protect, restore and enhance the quality of the environment in New South Wales, having regard to the need to maintain ecologically sustainable development, and
 - (b) to reduce the risks to human health and prevent the degradation of the environment, by means such as the following:
 - promoting pollution prevention,
 - adopting the principle of reducing to harmless levels the discharge into the air, water or land of substances likely to cause harm to the environment,
 - minimising the creation of waste by the use of appropriate technology,
 - regulating the transportation, collection, treatment, storage and disposal of waste,
 - encouraging the reduction of the use of materials, encouraging the re-use and recycling of materials and encouraging material recovery,
 - adopting minimum environmental standards prescribed by complementary Commonwealth and State legislation and advising the Government to

prescribe more stringent standards where appropriate,

- setting mandatory targets for environmental improvement,
- promoting community involvement in decisions about environmental matters,
- ensuring the community has access to relevant information about hazardous substances arising from, or stored, used or sold by, any industry or public authority,
- conducting public education and awareness programs about environmental matters.

(2) For the purposes of subsection (1) (a), ecologically sustainable development requires the effective integration of economic and environmental considerations in decision-making processes. Ecologically sustainable development can be achieved through the implementation of the following principles and programs:

(a) the precautionary principle—namely, that if there are threats of serious or irreversible environmental damage, lack of full scientific certainty should not be used as a reason for postponing measures to prevent environmental degradation.

In the application of the precautionary principle, public and private decisions should be guided by:

(i) careful evaluation to avoid, wherever practicable, serious or irreversible damage to the environment, and

(ii) an assessment of the risk-weighted consequences of various options,

(b) inter-generational equity—namely, that the present generation should ensure that the health, diversity and productivity of the environment are maintained or enhanced for the benefit of future generations,

(c) conservation of biological diversity and ecological integrity—namely, that conservation of biological diversity and ecological integrity should be a fundamental consideration,

(d) improved valuation, pricing and incentive mechanisms—namely, that environmental factors should be included in the valuation of assets and services, such as:

(i) polluter pays—that is, those who generate pollution and waste should bear the cost of containment, avoidance or abatement,

(ii) the users of goods and services should pay prices based on the full life cycle of costs of providing goods and services, including the use of natural resources and assets and the ultimate disposal of any waste,

- (iii) environmental goals, having been established, should be pursued in the most cost effective way, by establishing incentive structures, including market mechanisms, that enable those best placed to maximise benefits or minimise costs to develop their own solutions and responses to environmental problems.

Part 4 General responsibilities etc of the Environment Protection Authority

7 General functions of Authority

- (1) The Authority has such environment protection and other functions as are conferred or imposed on it by or under the environment protection legislation or any other legislation.

- (3) (Repealed)

8 General powers of Authority

The Authority may:

- (a) formulate and promote plans for environment protection, and
- (b) publish reports and information on any aspect of environment protection, and
- (c) carry out or commission research into environment protection, and

- (d) co-ordinate the collection of information on environment protection which is published or supplied by public or other authorities, and
- (e) provide or promote the development of specialist guidance and technical advisory services relating to environment protection, and
- (f) invite and consider public submissions when it formulates environment protection plans, when it develops objectives, guidelines or policies under section 9 or when it issues, renews or amends licences under the environment protection legislation, and
- (g) make any register of particulars of any such licences in force available for public inspection and provide (on payment of any reasonable fee demanded by the Authority) copies of or extracts from any such register, and
- (h) make grants to industry, commerce, public authorities, educational institutions and such other persons who the Authority considers are acting in the public interest for the purpose of funding projects which assist or advance environment protection, and
- (i) make grants to groups of citizens incorporated for the purpose of representing the public interest in environment protection to enable them to obtain technical assistance in making submissions referred to in paragraph (f) or on other environment protection matters.

9 Powers of Authority relating to environmental quality

- (1) The Authority is required to:
 - (a) develop environmental quality objectives, guidelines and policies to ensure environment protection, and
 - (b) monitor the state of the environment for the purpose of assessing trends and the achievement of environmental quality objectives, guidelines, policies and standards.
- (2) The Authority is required to develop a comprehensive scheme of environmental audit with respect to industry, commerce and public authorities.

10 State of the environment reports

- (1) The Authority is required to make a report on the state of the environment every 3 years.
- (2) Each such report is to be given to the Minister and tabled in both Houses of Parliament.
- (3) A report on the state of the environment is to include the following matters:

- (5) The Authority is required to make, in its annual report for any year in which a report under subsection (1) is not made, a statement on any relevant matters concerning the state of the environment and on trends.

11 Performance targets for public authorities

- (1) The Authority may advise public authorities on performance targets for those public authorities relating to environment protection.
- (2) When exercising its public reporting functions under this or any other Act, the Authority may report on the achievement of performance targets set by public authorities, and is required to do so in respect of any public authority which has failed to publicly report on its achievement of those performance targets.

12 Directions to public authorities

- (1) The Authority may (subject to subsection (2)) from time to time:
 - (a) direct any public authority to do anything within the powers of the public authority which will, in the opinion of the Authority, contribute to environment protection, or
 - (b) direct any public authority to cease doing anything which, in the opinion of the Authority, adversely affects environment protection.
- (2) The Authority is required to consult with the public authority about any such direction.
- (3) If a dispute arises about any such direction, the Minister and the Minister responsible for the public authority (or, in the case of a local government authority, the mayor concerned) are to be notified of the dispute and given an opportunity to resolve the dispute.

- (4) If the dispute is not resolved, it may be referred by the Authority or the public authority to the Premier for settlement. The Premier must, before making any decision on the matter, appoint a person to make an assessment of or conduct a public inquiry into the matter. The report of that assessment or public inquiry is to be made available to the public by the Premier and, if the decision of the Premier on the dispute does not follow the recommendations in that report, the terms of the decision of the Premier are to be tabled by or on behalf of the Premier in each House of Parliament (within 14 sitting days of that House) and are to be included in the next available annual report of the Authority.
- (5) The decision of the Premier on a dispute is to be given effect to by the Authority and the public authority concerned.
- (6) If a public authority that is a local government authority fails to give effect to the decision of the Premier on a dispute, the Authority may give effect to the decision and may for that purpose carry out any work and give any directions as if it were the local government authority. The Authority is taken to be the local government authority when carrying out that work or giving those directions.
- (7) Any costs or expenses incurred by the Authority in giving effect to a decision as referred to in subsection (6) may be recovered by the Authority from the local government authority as a debt in a court of competent jurisdiction.
- (8) Any provision of any other Act for the settlement of disputes between public authorities by the Premier or a Minister does not apply to the settlement of a dispute to which this section applies.

12A Environmental assessment

- (1) The Authority is not a determining authority within the meaning of Part 5 of the *Environmental Planning and Assessment Act 1979* in respect of an approval (within the meaning of that Part) under the environment protection legislation that consists of the renewal of a licence or the renewal of a certificate of registration.
- (2) This section applies in respect of such an approval in force (or purporting to be in force) at the commencement of this section or granted after the commencement of this section.

Part 5 Management of the Environment Protection Authority

Division 1 The Minister

13 Ministerial control

- (1) The Authority is, in the exercise of its functions, subject to the control and direction of the Minister.

- (2) However, the Authority is not subject to the control and direction of the Minister in respect of:
- (a) any report or recommendation made to the Minister, or
 - (b) a state of the environment report under this Act (other than directions for the inclusion of additional information in any such report), or
 - (c) any decision to institute criminal or related proceedings.
- (3) A report of:
- (a) any direction of the Minister for the inclusion of additional information in a state of the environment report under this Act, or
 - (b) any direction of the Minister under section 13A and the determination of the Minister with respect to the exercise of the licensing function concerned,
- is required to be tabled by or on behalf of the Minister in each House of Parliament (within 14 sitting days of that House) and is to be included in the next available annual report of the Authority.

13A Exercise of EPA licensing functions by Minister

- (1) In this section:

licence means a licence, approval or other authority under the environment protection legislation.

licensing function means a function of the Authority under the environment protection legislation relating to a licence, including the function of determining whether to issue, transfer, amend, suspend or revoke a licence.

- (2) The Minister may, if the Minister considers that it is expedient in the public interest to do so, direct the Authority in writing to refer to the Minister a specified licensing function in respect of a particular matter.
- (3) The Minister may give a direction under this section whether or not the Authority intends to exercise the licensing function in respect of the matter.
- (4) The Authority must, as soon as practicable after receiving a direction under this section:
- (a) refer to the Minister any application, report or other document or information in the possession of the Authority that relates to the matter (including any document or information specified by the Minister in the direction), and
 - (b) notify the applicant or licensee concerned in the matter of the Minister's direction.

- (5) Whenever the Minister gives a direction under this section, the Authority ceases to have the licensing function in respect of the matter, unless the Minister refers the licensing function (or any aspect of that function) back to the Authority.
- (6) The Minister may, after giving a direction under this section, exercise in the place of the Authority the licensing function in respect of the matter.
- (7) For the purpose of the Minister exercising a licensing function in respect of a matter:
 - (a) a reference to the Authority in the environment protection legislation or other document is taken to be a reference to the Minister, and
 - (b) anything done by the Authority in the matter before the direction was given may be adopted by the Minister.

The determination of the Minister in the exercise of the licensing function is taken to have been done by the Authority.

- (8) However, an appeal to the Land and Environment Court against a decision of the Authority in the exercise of a licensing function that is conferred by the environment protection legislation does not lie if the decision is made by the Minister pursuant to a direction under this section.
- (9) The Authority is to give effect to the decision made by the Minister pursuant to a direction under this section. However, the decision does not limit the future exercise of a licensing function by the Authority in respect of the matter.

14 Ministerial departmental support services

- (1) The Minister may make use of the services of the Director-General and staff of the Authority for providing departmental advice on government policy and other matters relating to the administration of the environment protection legislation.
