State Authorities Superannuation Regulation 2000

New South Wales

Part 1 Preliminary

1 Name of Regulation

This Regulation may be cited as the *State Authorities Superannuation Regulation 2000*.

2 Commencement

This Regulation commences on 1 September 2000.

Note—

This Regulation replaces the *State Authorities Superannuation Regulation 2000* which is repealed on 1 September 2000 under section 10 (2) of the *Subordinate Legislation Act 1989*.

3 Definitions

(1) In this Regulation:

accrued benefit points has the same meaning as in section 36 of the Act.

the Act means the *State Authorities Superannuation Act 1987*.

Note—

Section 3 (1) of the Act defines “STC” as the SAS Trustee Corporation established under the *Superannuation Administration Act 1996*.

(2) The explanatory note, table of contents and notes in the text of this Regulation do not form part of this Regulation.

Part 2 General provisions supplementary to Act

4 Early retirement age

For the purposes of the definition of **early retirement age** in section 3 (1) of the Act, the prescribed early retirement age is 58 years.

5 Determination of loading in respect of shift allowance

(1) In this clause:

base salary, in relation to a contributor, means the remuneration, salary or wages payable to the contributor under an award of an industrial tribunal or under an industrial or enterprise agreement, but excluding all additional allowances payable to the contributor.

relevant period, in relation to a contributor, means the period of 12 months ending with 31 December immediately preceding the date on which the salary of the contributor is to be calculated for the purposes of the Act.

relevant shift means a shift worked by an employee in respect of which a shift allowance is payable by an employer.

trade union means:

- (a) an industrial organisation of employees registered or recognised as such under the *Industrial Relations Act 1996*, or
- (b) an association of employees registered as an organisation under the *Workplace Relations Act 1996* of the Commonwealth.

(2) For the purposes of section 4 (1) (a) of the Act, the loading (if any) to be treated as part of a contributor's salary for the purposes of the Act must be determined by reference to subclause (3), (4) or (5) according to whichever subclause is appropriate to the contributor.

(3) If:

- (a) there is in force an agreement between, or a practice accepted by, a trade union and the employer of a contributor which was in force immediately before 18 December 1987, and
- (b) the effect of the agreement or practice is that amounts that the employer pays to the contributor as shift allowances for relevant shifts worked by the contributor during a relevant period are treated as a loading for superannuation purposes, and
- (c) the total of those amounts is greater than that which would be determined under subclause (4) for that year in respect of the contributor,

then, for the purposes of section 4 (1) (a) of the Act, that total is the contributor's loading for those shift allowances.

(4) Except where subclause (3) or (5) applies, if a contributor is paid shift allowances for shifts that the contributor has worked during a relevant period, then, for the purposes of section 4 (1) (a) of the Act, the contributor's loading for those allowances is to be

determined by reference to the number of relevant shifts the contributor is taken to have worked (as calculated in accordance with subclause (6)) during the relevant period. The loading is:

- (a) if during the relevant period the contributor is taken to have worked not more than 104 relevant shifts—no amount, or
 - (b) if during the relevant period the contributor is taken to have worked more than 104 but not more than 156 relevant shifts—an amount equal to 10 per cent of the contributor's base salary for that period, or
 - (c) if during the relevant period the contributor is taken to have worked more than 156 but not more than 208 relevant shifts—an amount equal to 15 per cent of the contributor's base salary for that period, or
 - (d) if during the relevant period the contributor is taken to have worked more than 208 relevant shifts—an amount equal to 20 per cent of the contributor's base salary for that period.
- (5) If the amounts actually paid or payable to a contributor as shift allowances for shifts that the contributor has worked during a relevant period are less than the loading determined for the period in respect of the contributor in accordance with subclause (4), then, for the purposes of section 4 (1) (a) of the Act, the total of those amounts is the contributor's loading for those allowances.
- (6) For the purposes of subclause (4), the number of relevant shifts a contributor is taken to have worked during a relevant period is the number calculated as follows:

$$N = \frac{H}{H_0} \times S$$

where:

N is the number of relevant shifts the contributor is taken to have worked during the relevant period.

H is the number of hours per shift regularly required to be worked in relevant shifts during the relevant period.

H₀ is the smallest number of hours per shift regularly required to be worked (whether by the contributor or any comparable worker) in relevant shifts during any calendar year after 1987, including the relevant period.

S is the number of relevant shifts the contributor actually worked during the relevant period.

- (2) If a benefit is released to a former contributor who has provided for a deferred benefit, STC must, on and from the date of the release, reduce the amount of the deferred benefit by the amount of benefit released. The amount of benefit payable when the deferred benefit is payable is to be reduced accordingly.
- (3) In any other case, STC must create a debt account in the Fund in respect of the contributor and must when a benefit is payable reduce the benefit that is payable by the amount debited to the debt account at the time the benefit is payable.
- (4) Despite subclause (3), if a contributor provides for a deferred benefit under the Act after the release of a benefit to the contributor concerned and before a benefit is otherwise payable, STC must, on and from the date the benefit is deferred, calculate the amount of benefit deferred and reduce that amount by the amount debited to the debt account at the time the benefit is deferred. The amount of benefit payable when the deferred benefit is payable is to be reduced accordingly.
- (5) The amount debited to the debt account is to be the amount of benefit released together with interest on that amount at a rate determined by STC.
- (6) STC may obtain actuarial advice for the purpose of determining the amount of a reduced benefit.

15D Release of benefits during transitional period

- (1) This clause applies to the release of a benefit to a contributor or former contributor on the ground of severe financial hardship or on compassionate grounds during the transitional period if:

by the *Superannuation Legislation Amendment Act 2000*, and

(b) STC obtained the written consent of the contributor or former contributor to the reduction of benefits as a consequence of the early release.

(2) Clauses 15A and 15B apply in respect of a release of benefit to which this clause applies in the same way as they apply to a release of benefit after the commencement of those clauses.
