Chapter 2 Structure of the public health system

Introduction—

This Chapter describes the structure of the public health system and explains the rationale and functions of the various elements of that structure.

The basic elements of the public health system are the area health services, statutory health corporations and affiliated health organisations. These public health organisations are intended to complement each other in the provision of health services and health support services within the State.

Area health services and statutory health corporations are essentially statutory-based entities. However, each kind of organisation has different areas of concern.

Area health services, which are constituted by Chapter 3, are principally concerned with the provision of health services to residents within their areas. Statutory health corporations, which are constituted by Chapter 4, provide health services and health support services other than on the basis of defined areas. For example, it may be necessary to constitute a statutory health corporation rather than to include a health service within an area health service because the health service concerned is to be provided on a Statewide basis.

Affiliated health organisations are non-profit, religious, charitable or other non-government organisations or institutions providing certain health services or health support services within the State (whether on a local basis or Statewide) that contribute significantly to the operation of the public health system. However, an affiliated health organisation is not an affiliated health organisation in relation to all of its services and institutions. It is only an affiliated health organisation in relation to the recognised establishments and recognised services listed in column 2 of Schedule 3 next to its name. Chapter 5 makes provision for the recognition of affiliated health organisations.

Collectively, all the employees of these public health organisations constitute the NSW Health Service. Chapter 9 makes provision for the determination of the employment conditions of those employees and for their transfer within the public health system.

Public hospitals are hospitals controlled by these public health organisations. The Act draws a distinction between hospitals and hospital services. In essence, a hospital is an institution at which hospital services are provided. It is a place rather than a service. A hospital service is itself but one kind of health service. Chapters 6 and 7 make provision for the guidelines under which public hospitals operate and for the fees that may be charged for hospital services and other health services.

6 What is the public health system?

For the purposes of this Act, the **public health system** consists of:

- (a) all the area health services, and
- (b) all the statutory health corporations, and
- (c) all the affiliated health organisations in respect of their recognised establishments and recognised services, and
- (d) the Public Health System Support Division of the Health Administration Corporation.

7 What is a public health organisation?

A **public health organisation** is:

- (a) an area health service, or
- (b) a statutory health corporation, or

- (c) an affiliated health organisation in respect of its recognised establishments and recognised services.

8 What is an area health service?

- (1) An **area health service** is an area health service constituted under section 17 and specified from time to time in Schedule 1.
- (2) The principal reason for constituting area health services is to facilitate the conduct of public hospitals and health institutions and the provision of health services for residents of the areas of the State in respect of which the services are constituted.

Note—

The area health service system was first established under the [Area Health Services Act 1986](#). However, that system was restricted to certain metropolitan areas of the State. The system of area health services established by this Act extends throughout the whole of the State.

9 Primary purposes of area health services (cf AHS Act s 19)

The primary purposes of an area health service in its area are as follows:

- (a) to provide relief to sick and injured persons through the provision of care and treatment,
- (b) to promote, protect and maintain the health of the community.

10 Functions of area health services (cf AHS Act ss 19 and 20)

The functions of an area health service are as follows:

- (a) generally to promote, protect and maintain the health of the residents of its area,
- (b) to conduct and manage public hospitals, health institutions, health services and health support services under its control,
- (c) to give residents outside its area access to such of the health services it provides as may be necessary or desirable,
- (d) to achieve and maintain adequate standards of patient care and services,
- (e) to ensure the efficient and economic operation of its health services and health support services and use of its resources,
- (f) generally to consult and co-operate (as it considers appropriate) with any one or more of the following:
 - (i) the Health Care Complaints Commission constituted under the [Health Care Complaints Act 1993](#),
 - (ii) health professionals practising in its area,

- (iii) other individuals and organisations (including voluntary agencies, private agencies and public or local authorities) concerned with the promotion, protection and maintenance of health,
- (g) to investigate and assess health needs in its area,
- (h) to plan future development of health services in its area, and, towards that end:
 - (i) to consult and plan jointly with the Department of Health and such other organisations as it considers appropriate, and
 - (ii) to support, encourage and facilitate the organisation of community involvement in the planning of those services, and
 - (iii) to develop strategies to facilitate community involvement in the planning of those services and to report on the implementation of those strategies in annual reports and to the Minister,
- (i) to establish and maintain an appropriate balance in the provision and use of resources for health protection, health promotion, health education and treatment services,
- (j) to provide services to persons with whom it has contracted or entered into an agreement under section 37 (2),
- (k) to administer funding for recognised establishments and recognised services of affiliated health organisations where that function has been delegated to it by the Minister under section 129,
- (l) to provide training and education relevant to the provision of health services,
- (m) to undertake research and development relevant to the provision of health services,
- (n) to make available to the public information and advice concerning public health and the health services available within its area,
- (o) to carry out such other functions as are conferred or imposed on it by or under this or any other Act or as may be prescribed by the regulations.

11 What is a statutory health corporation?

- (1) A **statutory health corporation** is a statutory health corporation constituted under section 41 and specified from time to time in Schedule 2.
- (2) The principal reason for constituting statutory health corporations is to enable certain health services and health support services to be provided within the State other than on an area basis.

Note—

Statutory health corporations are intended to replace the system of incorporated hospitals and corporatised boards of directors of associated organisations established under Part 4 and Division 2 of Part 5A of the *Public Hospitals Act 1929* respectively.

12 Functions of statutory health corporations (cf PH Act ss 27A and 29I)

A statutory health corporation has the following functions:

- (a) to conduct public hospitals or health institutions or to provide health services or health support services (or any combination of these),
- (b) to conduct such public hospitals and health institutions and provide such health services or health support services as the Minister determines from time to time under section 53,
- (c) to achieve and maintain an adequate standard in the conduct of any public hospital or health institution, or the provision of a health service or health support service, under its control,
- (d) to ensure the efficient and economic operation of any such public hospital, health institution, health service or health support service,
- (e) to carry out such other functions as are conferred or imposed on it by or under this or any other Act or as may be prescribed by the regulations.

13 What is an affiliated health organisation?

- (1) An **affiliated health organisation** is an organisation or institution that is an affiliated health organisation under section 62.
- (2) An organisation or institution is an affiliated health organisation only in relation to any of its recognised establishments or recognised services.

Note—

The Dictionary defines a **recognised establishment** of an affiliated health organisation to mean a hospital or health institution of the organisation that is listed in column 2 of Schedule 3 next to its name. It also defines a **recognised service** of an affiliated health organisation to mean a health service or health support service of the organisation that is listed in column 2 of Schedule 3 next to its name.

- (3) The principal reason for recognising affiliated health organisations is to enable certain non-profit, religious, charitable or other non-government organisations and institutions to be treated as part of the public health system where they control hospitals, health institutions, health services or health support services that significantly contribute to the operation of that system.

Note—

Affiliated health organisations are intended to replace the system of separate institutions and associated organisations recognised under Part 5AA and section 29B (1) (a) of the *Public Hospitals Act 1929*, respectively.

14 Functions of affiliated health organisations (cf PH Act s 29AD)

The functions of an affiliated health organisation are as follows:

- (a) to achieve and maintain an adequate standard in the conduct of its recognised establishments and the provision of its recognised services,
- (b) to ensure the efficient and economic operation of those establishments and services,
- (c) to carry out such other functions as are conferred or imposed on it by or under this or any other Act or as may be prescribed by the regulations.

15 What is a public hospital?

A **public hospital** is:

- (a) a hospital controlled by an area health service, or
- (b) a hospital controlled by a statutory health corporation, or
- (c) a hospital that is a recognised establishment of an affiliated health organisation, or
- (d) a hospital controlled by the Crown (including the Minister or the Health Administration Corporation).

Note—

Clause 2 of Part 2 of the Dictionary provides that a reference in this Act to a hospital controlled by a public health organisation or any other body or person includes a reference to a hospital that is conducted by or on behalf of such an organisation, body or person.

16 Who constitutes the NSW Health Service?

The **NSW Health Service** consists of:

- (a1) all persons employed under Part 3 of Chapter 9 by the Health Administration Corporation, and
- (a) all persons employed under section 33 by each area health service, and
- (b) all persons employed under section 54 by each statutory health corporation, and
- (c) all persons employed as members of staff by each affiliated health organisation in relation to its recognised establishments and recognised services, and
- (d) all persons employed in the Public Health System Support Division of the Health Administration Corporation.

Note—

The NSW Health Service is not part of the Public Service for the purposes of the [Public Sector Employment and Management Act 2002](#).

Clause 1 (2) (b) of Part 2 of the Dictionary provides that a reference in this Act (however expressed) to the staff, assets, rights or liabilities of an affiliated health organisation in relation to its recognised establishments or recognised services is a reference to the staff, assets, rights or liabilities of the organisation relating solely or principally to the operation of the establishment or the provision of the service.

Chapter 3 Area health services

Introduction—

This Chapter constitutes as bodies corporate the area health services specified in column 1 of Schedule 1 in respect of the areas described for each service in that Schedule. It also provides for the appointment of a chief executive to manage and control the affairs of each service.

Area health services are given various powers concerning the provision of health services. These include powers to invest, contract, acquire and dispose of property and employ staff. They are also given the power to make by-laws in relation to certain matters.

Part 1 Constitution of area health services

17 Constitution of area health services (cf AHS Act s 5)

- (1) There are constituted by this section such area health services as are specified from time to time in column 1 of Schedule 1.
- (2) An area health service is a body corporate with the corporate name specified in column 1 of Schedule 1.

18 Areas in respect of which area health services constituted (cf AHS Act ss 4 and 7)

- (1) The area in respect of which an area health service is constituted is:
 - (a) if the area comprises a local government area (or part of a local government area) or a local government area constituted as a city (or a part of such a city)—the local government area (or part of a local government area) or city (or part of a city) described in column 2 of Schedule 1 in relation to the area health service, or
 - (b) if the area comprises an area other than a local government area (or part of a local government area)—the area described in any manner (including by reference to a description contained in another document) in column 3 of Schedule 1 in relation to the area health service.
- (2) A reference in column 2 of Schedule 1 to a part of a local government area is a reference to such part of the local government area as is described by the regulations for the purposes of that reference.
- (3) A reference in column 3 of Schedule 1 to the unincorporated area is a reference to such part of the land within the Western Division of the State as is not within a local government area.

19 Amendment of Schedule 1 (Names and areas of area health services) (cf AHS Act ss 6

and 8)

(1) The Governor may, by order published in the Gazette:

- (a) amend column 1 of Schedule 1 by inserting, altering or omitting the name of an area health service, or
- (b) amend column 2 or 3 (or both) of Schedule 1 by inserting, altering or omitting a description of the area in respect of which an area health service is (or was) constituted, or
- (c) omit Schedule 1 and insert instead a Schedule containing the names of area health services and descriptions of the areas in respect of which the area health services are constituted.

(2) If an area in respect of which an area health service is constituted:

- (a) is described by reference to a local government area that is constituted as a city, and
- (b) the name of the city (but not the boundaries) is changed,

a reference in column 2 of Schedule 1 to the old name of the city is taken to include a reference to the new name of the city.

(3) An order under this section is to specify the date (being a date that is on or after the date it is published in the Gazette) on which it takes effect. However, if no date is specified in the order, the order is taken to have specified the date on which it is published in the Gazette as the date on which it takes effect.

(4) Schedule 4 has effect with respect to orders made under this section.

Chapter 6 Medicare Principles and Commitments

Introduction—

In this Chapter, the Medicare Principles and Commitments set out in section 26 of the *Health Insurance Act 1973* of the Commonwealth are readopted as guidelines for the provision of public hospital services within the meaning of section 23E of that Act. They had previously been adopted in Part 4 of the *Health Administration Act 1982*, which was repealed by this Act. The Commonwealth Act makes the adoption by the State of the Principles and Commitments a condition of the grant of financial assistance by the Commonwealth to the State in respect of the provision of public hospital services.

68 Medicare Principles and Commitments

- (1) The Medicare Principles and Commitments are adopted as guidelines for the provision of public hospital services to eligible persons in New South Wales.
- (2) The Medicare Principles and Commitments are as follows:

MEDICARE PRINCIPLES

The Commonwealth and the States are committed to the following principles in the provision of public hospital services:

Explanatory note—

The Principles focus on the provision of public hospital services to eligible persons, but operate in an environment where eligible persons have the right to choose private health care in public and private hospitals supported by private health insurance.

Choices of services

Principle 1: Eligible persons must be given the choice to receive public hospital services free of charge as public patients

Explanatory note 1—

Hospital services include in-patient, out-patient, emergency services (including primary care where appropriate) and day patient services consistent with currently acceptable medical and health service standards.

Explanatory note 2—

At the time of admission to a hospital, or as soon as practicable after that, an eligible person will be required to elect or confirm whether he or she wishes to be treated as a public or private patient.

Universality of services

Principle 2: Access to public hospital services is to be on the basis of clinical need

Explanatory note 1—

None of the following factors are to be a determinant of an eligible person's priority for receiving hospital services:

-

whether or not an eligible person has health insurance,

•

an eligible person's financial status or place of residence,

•

whether or not an eligible person intends to elect, or elects, to be treated as a public or private patient.

Explanatory note 2—

This principle applies equally to waiting times for elective surgery.

Equity in service provision

Principle 3: To the maximum practicable extent, a State will ensure the provision of public hospital services equitably to all eligible persons, regardless of their geographical location

Explanatory note 1—

This principle does not require a local hospital to be equipped to provide eligible persons with every hospital service they may need.

Explanatory note 2—

In rural and remote areas, a State should ensure provision of reasonable public access to a basic range of hospital services which are in accord with clinical practices.

COMMITMENTS

In order to achieve Principles 1 to 3, the Commonwealth and States make the following Commitments regarding public hospital services for eligible persons:

Information about service provision

Commitment 1: The Commonwealth and a State must make available information on the public hospital services eligible persons can expect to receive as public patients

Explanatory note 1—

The State development of a Public Patients' Hospital Charter in consultation with the Commonwealth will be a vehicle for the public dissemination of this information.

Explanatory note 2—

The Charter will set out the public hospital services available to public patients.

Efficiency and quality of service provision

Commitment 2: The Commonwealth and the States are committed to making improvements in the efficiency, effectiveness and quality of hospital service delivery

Explanatory note—

This includes a commitment to quality improvement, outcome measurement, management efficiency and effort to integrate the delivery of hospital and other health and health-related community services.

- (3) Expressions used in the Medicare Principles and Commitments (and the notes to them) set out in subsection (2) have the same meanings they have in the Medicare Principles and Commitments (and the notes to them) set out in section 26 of the *Health Insurance Act 1973* of the Commonwealth.
- (4) Nothing in this section gives rise to, or can be taken into account in, any civil cause of action, and, without limiting the generality of the foregoing, nothing in this section operates to create in any person legal rights not in existence before the enactment of this section.

Chapter 7 Charges for health services

Introduction—

This Chapter makes provision for the charging and collection of fees from certain patients and other clients of public health organisations.

69 Scale of fees (cf PH Act s 30 (8) and (9))

- (1) The Minister may, from time to time, by order published in the Gazette:
 - (a) fix a scale of fees for hospital services and other health services received from any public health organisation, and
 - (b) amend or revoke any scale of fees so fixed.
- (2) A scale of fees may be fixed, amended or revoked by the adoption by reference of any scale of fees (as in force at a particular time or as in force from time to time) fixed or determined by a Commonwealth authority or body. Any such adoption may be wholly or in part and with or without modification.
- (3) Except where a scale of fees has been fixed under this section, nothing in this section affects any right that a public health organisation may have to charge a fee for the provision of a hospital service or other health service.

70 Liability of persons for health service fees (cf PH Act s 30 (1)–(5))

- (1) Any person who receives any health service (other than a non-chargeable hospital service) from a public health organisation is liable to contribute towards the funds of the organisation, according to the person's means, such sum in respect of the health service as is calculated in accordance with the scale of fees fixed under section 69.
- (2) That sum (if unpaid) may be recovered in any court of competent jurisdiction as a debt.
- (3) A written statement of the amount due, purporting to be signed by an authorised employee of the public health organisation concerned, is prima facie evidence of the

amount being due.

(4) The public health organisation may remit, postpone or write-off payment of all or any sums of money due to the organisation under this section.

(5) In this section:

authorised employee of a public health organisation means an employee of the organisation who is authorised in writing by the chief executive of the organisation to certify any amount owing to it for the provision of a health service.

71 Care and treatment to be provided to persons without means (cf PH Act s 30 (6))

A person without means must not be refused care or treatment for sickness or injury at any public hospital by reason only of the person's inability to pay for the care or treatment.

72 Cost of relief granted to injured persons to be a charge on damages (cf PH Act s 30A)

(1) This section applies to any person (**the debtor**) who is liable to a public health organisation for the cost of any health service (other than a non-chargeable hospital service) provided by the organisation in respect of any personal injury suffered by the person or another person.

(2) If the debtor has a right to recover damages against any other person in respect of the personal injury, the amount of the debtor's liability to the public health organisation is a charge on any money that is or may become payable in respect of such right to recover damages.

(3) The charge is enforceable by way of an action brought by the public health organisation in the same way as if the action were an action brought by or on behalf of the debtor claiming the amount of such liability as special damages.

(4) In any such action (or any judgment given concerning that action), the parties have, to the extent of the charge, the same rights and liabilities (and the court has the same powers) as if the action were by or on behalf of the debtor.

(5) The action may be brought despite:

(a) any judgment recovered by or on behalf of the debtor, and

(b) any payment made to the debtor or any other person (except the public health organisation) in respect of the defendant's liability, and

(c) any complete or partial discharge given by the debtor.

(6) However, any such payment or discharge in respect of a claim for damages is, to the extent of the payment or discharge, a valid discharge to the person making the payment or receiving the discharge if it is given after:

- (a) the person injured has ceased to receive health services in respect of the injury, and
- (b) the cost of all health services provided by any public health organisation has been fully paid or satisfied.

73 Order not to be made in certain circumstances (cf PH Act s 32)

- (1) An order is not to be made under this Chapter by a court if it is satisfied that (having regard to the means, estate, or property of the person in respect of whom the order is sought or to the circumstances of the case) the order would be unreasonable.
- (2) Nothing in this Chapter derogates from any rights that may exist for the recovery of money due.

74 Fees for medical attendance (cf PH Act s 36)

- (1) A medical practitioner is not entitled to charge a patient who is under treatment by the medical practitioner in any public hospital with any fees in respect of the treatment if that treatment is provided as part of the provision of a non-chargeable hospital service.
- (2) Any contract between a patient and a medical practitioner for any payment made in contravention of this section is unenforceable.

75 Hospital and other health services provided by Crown

A reference in this Chapter to a hospital service or other health service provided to a person by a public health organisation includes a reference to a hospital service or other health service provided by a public hospital controlled by the Crown (including the Minister or the Health Administration Corporation).

Chapter 8 Visiting practitioners

Introduction—

In this Chapter, Part 1 defines a visiting practitioner to be a medical practitioner or dentist appointed by a public health organisation (otherwise than as an employee) to practise as a medical practitioner or dentist at its hospitals or health institutions or in relation to its health services (as specified in the appointment). It also makes it clear that a visiting medical officer and an honorary medical officer are visiting practitioners appointed under a service contract with a public health organisation.

Part 2 explains, and provides for the prerequisites for the entry into, service contracts. It also enables the relevant Minister, on application from the Australian Medical Association (NSW) Limited or the Minister (or both), to appoint an arbitrator to determine certain matters involving fee-for-service contracts or sessional contracts of visiting medical officers (or both) throughout the public health system generally.

Part 3 requires visiting practitioners to report to the public health organisation that appointed them the fact that they have been charged with committing, or have been convicted of, a serious sex or violence offence or have had a finding of professional misconduct or unsatisfactory professional conduct made against them under the [Medical Practice Act 1992](#) or the [Dentists Act 1989](#). A public health organisation must terminate the appointment of a visiting practitioner convicted of a serious sex or violence offence if the Director-General so directs. A public health organisation cannot terminate the appointment of a visiting

practitioner of its own motion under the Part unless the Director-General has confirmed the organisation's proposal to terminate the appointment. These provisions mirror those provided in Part 2 of Chapter 9 for employees in the NSW Health Service.

Part 4 enables individual visiting practitioners to appeal to the Minister (who must then appoint a Committee of Review) concerning decisions of public health organisations to reduce their clinical privileges, to refuse to re-appoint them or to suspend or terminate their appointments under service contracts.

Part 5 makes it clear that any agreement between a public health organisation and a visiting practitioner relating to the performance of work is not affected by this Act except as provided by Parts 2, 3 and 4 of this Chapter.

Chapter 10 Administration of the public health system

Introduction—

This Chapter contains provisions to facilitate the efficient and effective administration of the public health system by the Minister and the Director-General.

Part 1 enables the Director-General to inquire into the administration, management and services of any organisation or institution providing publicly funded health services. It also specifies the functions of the Director-General and provides for the appointment of authorised officers to carry out inspections of the premises of public health organisations and other publicly funded organisations and institutions providing health services. The Director-General is also authorised to enter into performance agreements with public health organisations to improve the provision of health services and health support services.

Part 1A enables the Health Administration Corporation (the **Corporation**) to provide health support services to public health organisations and, with the Minister's approval, to provide health support services or corporate or other services, by contract or agreement, to other persons. A Public Health System Support Division of the Corporation is established and the persons employed in that Division are employed in connection with public health organisations and the public hospitals that they control and are to carry out the Corporation's function of providing health support services to those organisations. The Corporation may

delegate its functions under Part 1A to a person or an appointed body. The Director-General may transfer staff of a public health organisation to the Corporation for the purpose of exercising those functions and the Director-General may authorise the Corporation to make use of the services of any of the staff of a public health organisation. The Minister may require a public health organisation to acquire health support services from the Corporation or some other specified person.

Part 2 is concerned with the determination and provision of funding by the Minister to public health organisations. The Minister may impose conditions on any funding and may require affiliated health organisations to agree to repay any funds granted to them. The Minister may also delegate the function of funding the recognised establishments and recognised services of affiliated health organisations to the area health services. If any such function is delegated to an area health service, the Part also provides that the service may enter into performance agreements with the affiliated health organisations concerned.
