- (b) to extend the boundaries of the urban area to include land suitable for low density semi-urban development and other urban support development,
- (c) to provide opportunities for and to encourage development which will support the town's economic and tourism base,

- (e) to maintain and enhance the existing character and environment of the town and its setting,
- (f) to conserve the environmental heritage of the area of Cooma, and
- (g) to ensure that new development is undertaken in a manner that is sympathetic to and does not detract from the heritage significance of heritage items and their settings, as well as streetscapes and landscapes of the Cooma-Monaro area and the distinctive character that they impart to the Cooma-Monaro area.

10 Subdivision

- (1) Subject to this clause, a person shall not subdivide land to which this plan applies except with the consent of the council.
- (2) Land to which this plan applies may be subdivided without the consent of the council, where the subdivision is for the purpose of:
 - (a) transferring land to another property for agricultural use,
 - (b) boundary adjustments that do not create an additional allotment,
 - (c) consolidation of existing allotments under one title,
 - (d) road widening, or

- (e) closure and transfer of unformed roads to adjoining property.

10A What is exempt and complying development?

- (1) Development of minimal environmental impact listed in *Development Control Plan No 20* adopted by the council on 17 January 2000 is **exempt development**, despite any other provision of this plan.
- (2) Development listed in *Development Control Plan No 21* adopted by the council on 17 January 2000 is **complying development** if:
 - (a) it is local development of a kind that can be carried out with consent on the land on which it is proposed, and
 - (b) it is not an existing use, as defined in section 106 of the Act.
- (3) Development is exempt or complying development only if it complies with the development standards and other requirements applied to the development by Development Control Plans Nos 20 and 21 adopted by the council on 17 January 2000.
- (4) A complying development certificate issued for any complying development is to be subject to the conditions for the development specified in *Development Control Plan No 21* adopted by the council, as in force when the certificate is issued.

11 Development that must be advertised

Pursuant to section 30 (4) of the Act, the provisions of sections 84, 85, 86, 87 (1) and 90 of the Act apply to and in respect of:

- (a) development for the purposes of a residential flat building, or
- (b) any development (other than designated development as defined in the Act) that the council determines should require advertisement, in the same way as those provisions apply to and in respect of designated development.

12 Development in Zone No 1 (c)

- (1) The council must not grant consent to the subdivision of land within Zone No 1 (c) unless each allotment to be created by the subdivision has an area of not less than 4000 square metres.
- (2) In deciding whether to grant consent, the council is to have regard to the following:
 - (a) the availability of reticulated water and sewer services and, if unavailable, the capacity of the land to provide an adequate domestic water supply,
 - (b) the ability of the land to accommodate septic or other methods of disposal of household waste,
 - (c) the standard and capacity of public roads serving the land, having regard to the

likely volume of traffic to be generated as a consequence of the density of the subdivision and the means available to improve roads to a standard appropriate to the level of traffic likely to be generated,

- (d) the availability of other utility services and social services, having regard to the likely demand for those services and the costs of their provision,
 - (e) the desirability of providing development incentives in order to preserve more steeply sloping wooded areas or prominent ridgelines,
 - (f) the nature and topography of the land, having regard to the density of the subdivision and whether the land is susceptible to soil erosion and risk of potential pollution as a result of water runoff,
 - (g) the desirability of maintaining a low density of development in areas adjacent to arterial roads, sewerage treatment works or areas of high bushfire risk,
 - (h) the desirability of providing a range and mix of allotment sizes,
 - (i) the need to maintain a semi-rural character in the area,
 - (j) the purpose for which, in the opinion of the council, the land is to be used after subdivision.

- (4) In considering the design of a proposed subdivision of land within Zone No 1 (c), the council shall have regard to:
- (a) in relation to the land that may, in the opinion of the council, be suitable for long term urban development, whether the subdivision has been designed to facilitate its possible future subdivision,
 - (b) the necessity for and ability to construct a dam on each proposed allotment, and
 - (c) the risk of bushfires.

13 Development of land—Zone No 7 (d)

- (1) The council shall not grant consent to the carrying out of development on land in Zone No 7 (d) unless it is satisfied that the development is designed, and is to be carried out, in a manner which:
- (a) minimises the risk of soil erosion on the land or on other land, and
 - (b) minimises the destruction and permanent removal of existing natural vegetation.

- (2) Where land the subject of a development application is partly within Zone No 7 (d) and partly within Zone No 1 (c), the council may grant consent to development on that part of the land within Zone No 1 (c) which consists of or includes allotments having an area less than the minimum allotment size specified in clause 12 if the council is satisfied that the reduction in size is necessary and desirable in order to retain that part of the land within Zone No 7 (d) in its existing natural state.

14 Clearing

- (1) In this clause, **clearing** means the removal of trees and other vegetation, but does not include the clearing of regrowth from land previously cleared for agricultural use, or the cutting down of individual trees for farm purposes such as fencing, which may be carried out without the consent of the council.
- (2) Except as provided by subclause (3), land within Zone No 1 (c) shall not be cleared for any purpose except with the consent of the council.
- (3) Land within Zone No 1 (c) may be cleared for the purposes of agriculture, forestry, air navigation safety, land survey, fencing or bushfire hazard reduction without the consent of the council.
- (4) Nothing in subclause (3) authorises the clearing of land in contravention of any other Act or instrument made under an Act concerned with soil erosion, protection of catchment areas or the like.
- (5) Land within Zone No 7 (d) shall not be cleared for any purpose except with the consent of the council.

15 Development of main and arterial road frontages

 - (a) having frontage to a main or arterial road,
 - (b) which relies on a main or arterial road for its sole means of access, or
 - (c) which has access to a road which intersects with a main or arterial road, where the point of access is within 90 metres of the intersection of the road and the main or arterial road.
- (2) The council shall not grant consent to the carrying out of development on land to which this clause applies unless it has made an assessment of:
 - (a) whether the development (by its nature, intensity or the volume and type of traffic likely to be generated) is likely to constitute a traffic hazard or to materially reduce the capacity and efficiency of the main or arterial road to carry traffic,
 - (b) whether the development is of a type (whether or not related to the

characteristics of the land on which it is proposed to be carried out) that justifies a location in proximity to a main or arterial road,

- (c) whether the location, standard and design of access points, and on-site arrangements for vehicle movement and parking, ensure that through traffic movements on the main or arterial road will not be impeded, and
 - (d) the extent to which the development might prejudice future improvements or realignment of the main or arterial road, as indicated to the council from time to time by the Roads and Traffic Authority.
- (3) Notwithstanding clause 9 and subject to this clause, the council may grant consent to the carrying out of development on land to which this clause applies for the purposes of providing services to motorists, tourists and the travelling public (including development for the purposes of a motel, general store, refreshment room, tourist facility, transport terminal or service station) where:
- (a) the council has made an assessment of the demand for the development, having regard to the nature and volume of traffic using the road, any existing development of similar type and the location of and distance from other land on which development of a similar type may be carried out, and
 - (b) the development comprises (or is part of) a planned roadside service area that has been located and designed so as to minimise interference with the free flow of traffic on the road and to minimum traffic hazards.

16 Flooding

- (1) In this clause:

flood plain means the land shown on the map between broken black lines.

floodway means land within the flood plain that is determined by the council to be essential to the clear passage of floodwater.

- (2) A person shall not erect a building or carry out a work in a flood plain except with the consent of the council.
- (3) The council shall not consent to the erection of a building or the carrying out of a work on land within a floodway if, in the opinion of the council, the carrying out of the development is likely:
- (a) to impede the flow of floodwater on the land or land in its immediate vicinity,
 - (b) to impede the safety of persons on the land or land in its immediate vicinity in the event of those lands being inundated by floodwater, or
 - (c) to aggravate the consequences of floodwater flowing on the land or land in its

immediate vicinity with regard to erosion, siltation and the disturbance of vegetation.

- (4) For the purposes of subclauses (2) and (3), the council must have regard to the principles of the New South Wales Government's Flood Prone Land Policy and any floodplain risk management plan adopted by the council in accordance with the principles contained in the New South Wales Government's *Floodplain Development Manual: the management of flood liable land (April 2005, ISBN 0 7347 5476 0)*.

- (4) Except as otherwise provided in this clause, the council shall not grant consent as referred to in subclause (3):
- (a) unless the area of the allotment is not less than:
 - (i) 600 square metres, in the case of land within Zone No 2, or
 - (ii) 4000 square metres, in the case of land within Zone No 1 (c),
 - (b) in the case of land within Zone No 1 (c), if more than one dwelling will have a gross floor area of more than 80 square metres,
 - (c) if the building will have more than 2 storeys, or
 - (d) if the granting of consent would result in more than 2 dwellings on the one allotment.
- (5) The council may grant consent to the erection of an additional dwelling which is not physically attached to an existing dwelling if it is satisfied that the needs of the occupants of the land would be better satisfied and the resulting development is comparable with that which could otherwise be permitted in accordance with this plan.
