land management (native vegetation) code means a land management (native vegetation) code made under Division 5 and in force.

landholder means a person who is the owner of land or who, whether by reason of ownership or otherwise, is in lawful occupation or possession, or has lawful management or control, of land.

landholding includes several parcels of land (whether held under the same title, different titles or different kinds of titles) that constitute or are worked as a single property and that—

- (a) are contiguous with one another or are separated from one another only by a road, river, creek or other watercourse, or
- (b) are certified in writing by Local Land Services to be in the same sub-bioregion and within sufficient proximity to one another so as to constitute a single landholding for the purposes of this Part.

native vegetation regulatory map means a native vegetation regulatory map prepared and published under Division 2.

plant means any plant, whether vascular or non-vascular, and in any stage of biological development, and includes fungi and lichens, but does not include marine vegetation.

regulated rural area means any area of the State to which this Part applies that is category 2-regulated land.

Division 2 Native vegetation regulatory map

60E Purpose of native vegetation regulatory map

The purpose of the native vegetation regulatory map is to designate areas of the State to which this Part applies—

- (a) where the clearing of native vegetation is not regulated under this Part (**category 1-exempt land**), and
- (b) where the clearing of native vegetation is regulated under this Part (**category 2-regulated land**), and
- (c) where the clearing of native vegetation is regulated under this Part but (because of its vulnerability) is subject to additional restrictions and extended to the clearing of dead and non-native plants (**category 2-vulnerable regulated land**).

60F Transitional arrangement until preparation of maps

- (1) This section applies to an area of the State to which this Part applies during the period from the commencement of this Part until the area has been designated on a native

vegetation regulatory map (the ***transitional period***).

- (2) For the purposes of this Part, the area is taken, during the transitional period, to be—
- (a) category 1-exempt land, if this Part requires the land to be designated as category 1-exempt land on the native vegetation regulatory map, or
 - (b) category 2-regulated land, if this Part requires the land to be designated as category 2-regulated land on the native vegetation regulatory map (except as provided by paragraph (c)), or
 - (c) category 2-vulnerable regulated land, if the land is designated on a transitional native vegetation regulatory map published by the Environment Agency Head as steep or highly erodible land, as protected riparian land or as special category land.
- (3) For the purposes of this Part, an area is taken, during the transitional period, to be low conservation value grasslands if it comprises only groundcover whose clearing was permitted by section 20 of the *Native Vegetation Act 2003*, as in force immediately before the repeal of that Act.

Note—

Generally that section permitted clearing if the vegetation comprised less than 50% of indigenous species of vegetation.

- (4) A provision of this Part that determines the relevant categorisation of land by reference to a reasonable belief of the Environment Agency Head about a particular matter is to be construed, for the purposes of this section, as a reference to what a reasonable person would believe about the matter.
- (5) The Environment Agency Head may, in connection with any legal proceedings against a landholder, issue a certificate that the land described in the certificate is (for the reasons set out in the certificate) category 1-exempt land or category 2-regulated land (including category 2-vulnerable regulated land). The certificate is, in those legal proceedings, prima facie evidence of the category of the land during the transitional period.
- (6) The regulations may make further provision with respect to the application of this Part during the transitional period, including—
- (a) provisions applying to the identification of low conservation value grasslands, and
 - (b) the issue of certificates by the Environment Agency Head, at the request of a landholder, as to the relevant categorisation of land, and
 - (c) the preparation and publication of draft native vegetation regulatory maps for the purposes of the publication of maps at the end of the transitional period and the application of provisions of this Part in relation to those draft maps.

60G Responsibility for preparation and publication of maps

- (1) The Environment Agency Head is responsible for preparing and publishing native vegetation regulatory maps under this Part.
- (2) Native vegetation regulatory maps are to be prepared in relation to the areas of the State to which this Part applies.
- (3) A native vegetation regulatory map may designate—
 - (a) category 1-exempt land, and
 - (b) category 2-regulated land (including category 2-vulnerable regulated land), and
 - (c) any other sub-category prescribed by the regulations.
- (4) The Environment Agency Head is to publish information about the scientific method used to prepare a native vegetation regulatory map.
- (5) A native vegetation regulatory map is to be published on a government website.

60H Category 1-exempt land mapping

- (1) Land is to be designated as category 1-exempt land if the Environment Agency Head reasonably believes that—
 - (a) the land was cleared of native vegetation as at 1 January 1990, or
 - (b) the land was lawfully cleared of native vegetation between 1 January 1990 and the commencement of this Part.
- (2) Land is to be designated as category 1-exempt land if the Environment Agency Head reasonably believes that—
 - (a) the land contains low conservation value grasslands, or
 - (b) the land contains native vegetation that was identified as regrowth in a property vegetation plan referred to in section 9 (2) (b) of the *Native Vegetation Act 2003*, or
 - (c) the land is of a kind prescribed by the regulations as category 1-exempt land.
- (3) Land is to be designated as category 1-exempt land if the land is biodiversity certified under Part 8 of the *Biodiversity Conservation Act 2016* or under any Act repealed by that Act.
- (4) However—
 - (a) land described in subsection (1) or (2) is not to be designated as category 1-exempt land if section 60I (2) requires the land to be designated as category

2-regulated land, and

(b) land described in subsection (1) (a) is not to be designated as category 1-exempt land if the land was unlawfully cleared of native vegetation after 1 January 1990, and

(c) land described in subsection (2) (a) is not to be designated as category 1-exempt land if the land was unlawfully cleared of native vegetation after 1 January 1990.

(5) The regulations may make provision for the purposes of determining whether grasslands are low conservation value grasslands for the purposes of this Division.

60I Category 2-regulated land mapping

(1) Land is to be designated as category 2-regulated land if the Environment Agency Head reasonably believes that—

(a) the land was not cleared of native vegetation as at 1 January 1990, or

(b) the land was unlawfully cleared of native vegetation after 1 January 1990.

(2) Land is to be designated as category 2-regulated land if the Environment Agency Head reasonably believes that—

(a) the land contains native vegetation that was grown or preserved with the assistance of public funds (other than funds for forestry purposes), or

(b) the land is eligible for designation as category 2-vulnerable regulated land, or

(c) the land is subject to a private land conservation agreement under the *Biodiversity Conservation Act 2016*, or

(d) the land is subject to be set aside under a requirement made in accordance with a land management (native vegetation) code under this Part, or

(e) the land contains grasslands that are not low conservation value grasslands, or

(f) the land is or was subject to a requirement to take remedial action to restore or protect the biodiversity values of the land under this Part or the *Biodiversity Conservation Act 2016* or under the *Native Vegetation Act 2003* or the *National Parks and Wildlife Act 1974*, or

(g) the land is subject to an approved conservation measure that was the basis for other land being biodiversity certified under Part 8 of the *Biodiversity Conservation Act 2016* or under any Act repealed by that Act, or

(h) the land is an offset under a property vegetation plan under the *Native Vegetation Act 2003* or is a set aside under a Ministerial order under Division 3 of Part 6 of the *Native Vegetation Regulation 2013*, or

- (i) the land is in the coastal wetlands and littoral rainforests area of the coastal zone referred to in the *Coastal Management Act 2016*, or
 - (j) the land is identified as koala habitat (of a kind prescribed by the regulations) in a plan of management made under *State Environmental Planning Policy No 44—Koala Habitat Protection*, or
 - (k) the land is a declared Ramsar wetland within the meaning of the *Environment Protection and Biodiversity Conservation Act 1999* of the Commonwealth, or
 - (l) the land has (subject to the regulations) been mapped by the Environment Agency Head as land containing critically endangered species of plants under the *Biodiversity Conservation Act 2016*, or
 - (m) the land has been mapped by the Environment Agency Head as land containing a critically endangered ecological community under the *Biodiversity Conservation Act 2016*, or
 - (n) the land is of a kind prescribed by the regulations as category 2-regulated land.
- (3) However, land described in subsection (1) is not to be designated as category 2-regulated land if section 60H (2) or (3) requires the land to be designated as category 1-exempt land.

60J Matters relating to determination of mapped category of land

- (1) This section makes provision relating to the mapping of land under this Division as category 1-exempt land or category 2-regulated land.
- (2) Native vegetation that comprises grasslands or other non-woody vegetation is taken to have been cleared if the native vegetation was significantly disturbed or modified. The regulations may make provision for the purposes of determining whether native vegetation has been significantly disturbed or modified for the purposes of this Division.
- (3) Determinations may be made by the Environment Agency Head that land was unlawfully cleared of native vegetation only if compliance or enforcement action of a kind prescribed by regulations was taken in relation to the clearing.
- (4) Determinations may be made by the Environment Agency Head that land was cleared of native vegetation as at 1 January 1990 or between that date and the commencement of this Part only on the basis of the best available aerial photographs or satellite imagery before and after the relevant date, and any evidence provided by the landholder under section 60K (8).
- (5) Determinations made (or taken on appeal to have been made) by the Environment Agency Head as to whether land was or was not unlawfully cleared of native

vegetation does not affect any decision made with respect to compliance or enforcement action taken under this or any other Act in relation to the clearing.

60K Re-categorisation of mapped land

- (1) Re-categorisation of land is the preparation and publication of a native vegetation regulatory map in accordance with this Part for any of the following purposes—
 - (a) the designation of land that is designated on a published map as one category to another category,
 - (b) the designation of land that is not designated as any category on a published map as land of a particular category,
 - (c) the removal of the designation of land on a published map.
- (2) The Environment Agency Head is to keep the categorisation of land under review and undertake an annual review of published maps.
- (3) The Environment Agency Head may re-categorise land if—
 - (a) there is an error in a published map, or
 - (b) the Environment Agency Head obtains new or improved information about historical vegetation cover or land use for a particular landholding, or
 - (c) in the case of category 2-regulated land that the landholder applies to be re-categorised as category 1-exempt land—the Environment Agency Head reasonably believes that the land has been lawfully cleared after the commencement of this Part in accordance with a property vegetation plan under the *Native Vegetation Act 2003* that remains in force, with an approval under Division 6 or with a development consent under the *Environmental Planning and Assessment Act 1979* or an approval under Part 5.1 of that Act (unless the land concerned is required to be re-vegetated under the conditions of any such approval or consent), or
 - (d) the land is subject to a successful review or appeal of an existing categorisation or of a re-categorisation (and the re-categorisation gives effect to the decision on the review or appeal), or
 - (e) the land is authorised to be re-categorised by a land management (native vegetation) code, or
 - (f) the land is authorised to be re-categorised by the regulations.
- (4) The Environment Agency Head is required to re-categorise land if the status of the land changes so that—
 - (a) the land becomes (or ceases to be) an area that is excluded from the operation of this Part, or

(b) the land is required to be designated as land of a different category.

A change in the status of land that results in the land being excluded from the operation of this Part has effect when the status of the land changes, whether or not the land has been re-categorised by the Environment Agency Head.

- (5) The Secretary of the Department of Planning and Environment is to notify the Environment Agency Head and the Secretary of the Department (within the meaning of this Act) of any proposed environmental planning instrument that is likely to result in land becoming (or ceasing to be) an area that is excluded from the operation of this Part or that is likely to result in a re-categorisation of a kind prescribed by the regulations.
- (6) Land that is category 2-regulated land cannot be re-categorised as category 1-exempt land because of—
- (a) any clearing activity authorised under this Part, or
 - (b) any authorised clearing activity referred to in section 600 (Clearing authorised under other legislation),
- unless the re-categorisation is authorised by this Part, a land management (native vegetation) code or the regulations.
- (7) The Environment Agency Head is required to consult the landholders concerned before land is re-categorised and to give the landholders at least 30 days to make submissions to the Environment Agency Head about proposed re-categorisations, unless the re-categorisation has been requested by the landholder or relates to the exclusion of land from (or inclusion of land into) the operation of this Part. The regulations may make provision for consultation by individual notification to all or specified landholders of any land or by a public consultation process.
- (8) The Environment Agency Head, when making a determination that grasslands or other non-woody vegetation was significantly disturbed or modified on 1 January 1990 or between that date and the commencement of this Part for the purposes of a re-categorisation of the land, is to take into account any evidence provided by the landholder.
- (9) If the Environment Agency Head notifies the landholder of category 1-exempt land of a proposed re-categorisation of the land to category 2-regulated land, the land is taken to be category 2-regulated land until whichever of the following first occurs—
- (a) the Environment Agency Head notifies the landholder that the land is not to be re-categorised or the land is re-categorised,
 - (b) the period prescribed by the regulations for the purposes of this subsection expires.

The Environment Agency Head is required to advise the landholder of the effect of this subsection when notifying the landholder of the proposed re-categorisation.

- (10) If a person commits an offence against section 60N in relation to land to which subsection (9) applies, the maximum penalty for the offence is (despite that section) a Tier 3 monetary penalty (within the meaning of the *Biodiversity Conservation Act 2016*).
- (11) The regulations may make further provision for or with respect to authorising or preventing the clearing of native vegetation during the process of the consideration of a re-categorisation of land or pending the publication of new maps to give effect to a re-categorisation decision.

60L Review of categorisation decisions

- (1) The relevant landholder may request the Environment Agency Head to review a decision relating to the categorisation or re-categorisation of land on a native vegetation regulatory map.
- (2) The grounds on which a request for a review may be made are the same grounds on which the Environment Agency Head may re-categorise the land.
- (3) The grounds on which a request for a review may be made extend to a categorisation based on whether or not clearing was lawful, unless the categorisation was based on a determination of the matter made by a court.
- (4) The Environment Agency Head is to determine a request for a review, and for that purpose may arrange for an official who was not responsible for the original decision to conduct the review.
- (5) The regulations may make provision for or with respect to reviews, including the following—
 - (a) the form of requests for a review,
 - (b) the information to be provided in connection with a request for a review,
 - (c) the extension of any request relating to a part of the landholding concerned to other parts of the landholding,
 - (d) the fee payable for dealing with a request for a review,
 - (e) notification of and consultation with affected persons or bodies.

60M Appeal against categorisation or re-categorisation decisions

- (1) The relevant landholder may appeal to the Land and Environment Court against a decision relating to the categorisation or re-categorisation of land on a native vegetation regulatory map.

- (2) An appeal cannot be made against any such decision unless—
 - (a) it is a decision made after a review under section 60L, or
 - (b) a request has been made for a review of the decision under section 60L but the review has not been determined within the period prescribed by the regulations.
- (3) An appeal is to be made within the time prescribed by the regulations.
- (4) The lodging of an appeal does not, except to the extent the Court otherwise directs in relation to the appeal, operate to stay the decision appealed against.

Division 3 Regulation of clearing of native vegetation in regulated rural areas

60N Unauthorised clearing of native vegetation in regulated rural areas—offence

- (1) A person who clears native vegetation in a regulated rural area is guilty of an offence unless the person establishes any of the following defences—
 - (a) that the clearing is for an allowable activity authorised under Division 4 and Schedule 5A,
 - (b) that the clearing is authorised by a land management (native vegetation) code under Division 5,
 - (c) that the clearing is authorised by an approval of the Panel under Division 6,
 - (d) that the clearing is authorised under section 600 (Clearing authorised under other legislation etc),
 - (e) that the clearing is the carrying out of a forestry operation authorised under Part 5B (Private native forestry).

Maximum penalty—

- (a) for an offence that was committed intentionally and that caused or was likely to cause significant harm to the environment—
 - (i) in the case of a corporation—\$5 million, or
 - (ii) in the case of an individual—\$1 million, or
 - (b) for any other offence—
 - (i) in the case of a corporation—\$2 million, or
 - (ii) in the case of an individual—\$500,000.
- (1A) The defences under subsection (1) (a)–(c) do not apply if the clearing was the

carrying out of a forestry operation in a State forest or other Crown-timber land to which an integrated forestry operations approval under Part 5B of the *Forestry Act 2012* applies.

- (2) The higher maximum penalty under this section does not apply unless—
- (a) the prosecution establishes (to the criminal standard of proof) that the offence was committed intentionally and caused or was likely to cause significant harm to the environment, and
 - (b) the court attendance notice or application commencing the proceedings alleged that those factors applied to the commission of the offence.

If any such allegation in the notice or application is not established by the prosecution, the lower maximum penalty under this section applies (whether or not the notice or application is amended).

- (3) For the purposes of this section, clearing of native vegetation is not authorised as referred to in subsection (1) unless the conditions to which the authorisation is subject (including any conditions of a land management (native vegetation) code relating to the clearing or any certificate or approval issued or granted for the clearing) are complied with. This subsection extends to conditions that impose obligations on the person who clears the native vegetation that are required to be complied with before or after the clearing is carried out.
- (4) This section does not operate to preclude the commission of an offence under the *Environmental Planning and Assessment Act 1979* or the *Biodiversity Conservation Act 2016* in relation to the clearing of native vegetation.

600 Clearing authorised under other legislation

For the purposes of this Part, the clearing of native vegetation in a regulated rural area is authorised under other legislation in any of the following cases—

- (ii) a State significant infrastructure approval under Part 5.1 of that Act, or
- (iii) a transitional Part 3A project approval under Schedule 6A to that Act.

Note—

A planning approval may authorise clearing as part of or ancillary to the carrying out of other development, but except in limited cases does not authorise only clearing of native vegetation—see section 60P.

(b) Other planning authorisation

The clearing was—

- (i) a part of or ancillary to the carrying out of exempt development within the meaning of the *Environmental Planning and Assessment Act 1979*, or
- (ii) an activity carried out by a determining authority within the meaning of Part 5 of that Act after compliance with that Part, or
- (iii) authorised by an approval of a determining authority within the meaning of Part 5 of that Act granted after compliance with that Part.

(c) Biodiversity conservation authorisation

The clearing was authorised by a biodiversity conservation licence under the *Biodiversity Conservation Act 2016* or was authorised by a regulation made under section 2.9 of that Act (including under a code of practice made or adopted by any such regulation).

(d) Rural fires authorisation

The clearing was—

- (i) an emergency fire fighting act or emergency bush fire hazard reduction work within the meaning of the *Rural Fires Act 1997*, or
- (ii) bush fire hazard reduction work to which section 100C (4) of the *Rural Fires Act 1997* applies or vegetation clearing work under section 100R of that Act.

conditions of the authorisation and the provisions of the Plantations and Reafforestation Code applying to the plantation.

(i) **Forestry operations authorisation**

The clearing was the carrying out of a forestry operation in a State forest or other Crown-timber land to which an integrated forestry operations approval under Part 5B of the *Forestry Act 2012* applies, being a forestry operation that is carried out in accordance with the approval.

(j) **Water management authorisation**

The clearing was authorised by a licence, permit, approval or other authority under the *Water Management Act 2000*.

(k) **Mining/petroleum authorisation**

(o) **Private land conservation agreement**

The clearing was authorised by a private land conservation agreement under the *Biodiversity Conservation Act 2016*.

(p) **Other legislative authorisation**

The clearing was authorised by or under any other Act that has effect despite this Part.

60P Limitation on planning instruments requiring consent for clearing only

- (1) An environmental planning instrument under the *Environmental Planning and Assessment Act 1979* (other than a State environmental planning policy or so much of

a local environmental plan that adopts a mandatory provision of a standard instrument under that Act) may not be made to require development consent or other authorisation only for the clearing of native vegetation in an area of the State to which this Part applies. Any such requirement in an environmental planning instrument has no effect.

- (2) This section does not affect the imposition of conditions relating to the clearing of native vegetation on a development consent of any other kind.

Division 4 Allowable activities clearing of native vegetation

60Q Allowable activities clearing—Schedule 5A

- (1) Schedule 5A sets out the clearing of native vegetation in regulated rural areas for allowable activities that is authorised without any approval or other authority under this Part for the clearing.
- (2) Schedule 5A does not permit clearing or any other activity—
 - (a) without an approval or other authority required by or under another Act or another Part of this Act (or in anticipation of the grant of any such approval or other authority), or
 - (b) in contravention of any provision of or made under (or in contravention of any agreement made under) another Act or another Part of this Act.

60R Amendment of Schedule 5A

The regulations may amend Schedule 5A.

Division 5 Clearing native vegetation under land management (native vegetation) code

60S Authorised clearing by landholders under codes

- (1) The clearing of native vegetation in a regulated rural area is authorised without any approval or other authority under this Part if it is clearing carried out by or on behalf of the landholder in accordance with a land management (native vegetation) code under this Division.
- (2) The clearing of native vegetation is not authorised by a land management (native vegetation) code in any part of a regulated rural area that is excluded by the regulations or that is excluded by the code concerned.
- (2A) The clearing of native vegetation is not authorised by a land management (native vegetation) code if the clearing is the carrying out of a forestry operation within the meaning of Part 5B (Private native forestry).

- (3) Clearing of native vegetation authorised by Division 4 and Schedule 5A is not subject to a land management (native vegetation) code despite anything to the contrary in the code.
- (4) A land management (native vegetation) code does not permit clearing or any other activity—
 - (a) without an approval or other authority required by or under another Act or another Part of this Act, or
 - (b) in contravention of any provision of or made under another Act or another Part of this Act, or
 - (c) if the regulations so provide, without the consent of all landholders or other persons with a specified interest in the land.

60T Responsibility for preparation and making of codes

- (1) The Minister is responsible for preparing and making land management (native vegetation) codes under this Division.
- (2) The Minister may make a land management (native vegetation) code only with the concurrence of the Minister administering the *Biodiversity Conservation Act 2016*.
- (3) When preparing or giving concurrence to a land management (native vegetation) code, the Minister or the Minister administering that Act (as the case requires) is to have regard to the principles of ecologically sustainable development (described in section 6 (2) of the *Protection of the Environment Administration Act 1991*).

Note—

Those principles require economic, social and environmental considerations to be effectively integrated in decision-making processes.

- (4) A land management (native vegetation) code is to be published on the NSW legislation website.

60U Public consultation on proposed codes

- (1) Before a land management (native vegetation) code is made, the proposed code is to be made publicly available for a period of at least 4 weeks.
- (2) During the period of public consultation, any person may make a written submission to the Minister on the proposed code. The Minister may (but need not) make publicly available the submissions made on the proposed code (or a summary of or report on any such submissions).
- (3) The Minister is, before making a land management (native vegetation) code, to consider any submissions duly made on the proposed code.

- (4) If substantial changes are proposed to be made to a proposed code following public consultation, the Minister may undertake further public consultation on the revised proposed code.
- (5) A failure to comply with a requirement under this section in relation to a proposed code does not prevent the code being made, or invalidate the code once it is made.
- (6) The regulations may make further provision for or with respect to public consultation under this section.

60V Amendment or repeal of codes

- (1) A land management (native vegetation) code may be amended or repealed in the same way as a code may be made.
- (2) Public consultation under section 60U applies to the amendment or repeal of a land management (native vegetation) code.
- (3) However, the Minister may—
 - (a) dispense with public consultation on any amendment of a code if satisfied it should be dispensed with because of the minor nature or urgency of the matter, and
 - (b) dispense with the concurrence of the Minister administering the *Biodiversity Conservation Act 2016* on any amendment of a code if satisfied it should be dispensed with because of the minor nature of the matter.

60W Content of codes

- (2) A code may, in connection with any clearing authorised by the code—
 - (a) set out the circumstances in which a set aside area for native vegetation is required in connection with any such clearing, and
 - (b) provide for the re-vegetation, weed control and other land management actions on category 1-exempt land or other land to establish or maintain a set aside area or to protect areas that may be impacted by any such clearing, and
 - (c) authorise the re-categorisation of land in connection with any such clearing.

 - (a) the clearing of native vegetation in particular regions or other areas,
 - (b) the clearing of native vegetation in connection with particular activities,

- (c) the clearing of particular kinds of native vegetation,
- (d) when clearing of native vegetation may or may not be carried out,
- (e) the clearing of native vegetation that may continue to be carried out for the purposes of rotational farming practices that were in place as at 1 January 1990,
- (f) the manner in which clearing of native vegetation is to be carried out,
- (g) the giving of notice to Local Land Services and others before or after the clearing of native vegetation is carried out,
- (h) voluntary or mandatory certificates from Local Land Services confirming that the clearing may lawfully be carried out and certificates from Local Land Services authorising minor variations of the code (including the duration of any such certificates),
- (i) the keeping of records relating to the clearing of native vegetation,
- (j) the conservation of biodiversity,
- (k) the transition to this Part of clearing and other requirements under property vegetation plans under the *Native Vegetation Act 2003*,
- (l) any other matter prescribed by the regulations.

60X Notice to Local Land Services of clearing

- (1) The landholder must give, or cause to be given, to Local Land Services notice of the clearing of native vegetation under the authority conferred by a land management (native vegetation) code unless the code exempts the landholder from giving notice of clearing of that kind.

Maximum penalty—

- (a) in the case of a corporation—\$110,000, or
 - (b) in the case of an individual—\$22,000.
- (2) The notice is to be given within the time (whether before or after the clearing), and in the form and manner, specified in the land management (native vegetation) code.

60Y Certification by Local Land Services prior to clearing—general

- (1) Local Land Services may, on the application of a landholder, issue the following certificates—
 - (a) a certificate confirming that proposed clearing of native vegetation, by or on behalf of the landholder, of the kind set out in the certificate is compliant with the requirements of a specified land management (native vegetation) code (a

voluntary code compliant certificate),

- (b) a certificate for the clearing of native vegetation of the kind set out in the certificate that is required under a land management (native vegetation) code before the clearing is carried out under the code (a ***mandatory code compliant certificate***),
 - (c) a certificate that authorises minor variations of a land management (native vegetation) code in its application to the landholding concerned of the kind set out in the certificate (an ***authorised code variation certificate***).
- (2) A certificate under this section may adopt relevant terms for the certificate that are prescribed by the regulations or the land management (native vegetation) code.
 - (3) An authorised code variation certificate may be combined with a voluntary code compliant certificate or a mandatory code compliant certificate.
 - (4) Local Land Services may vary the terms of a certificate under this section by notice in writing to the landholder.
 - (5) Local Land Services may revoke a certificate under this section by notice in writing to the landholder.
 - (6) A certificate under this section remains in force for the period specified in the certificate unless sooner revoked by Local Land Services or surrendered by the landholder. The relevant land management (native vegetation) code may limit the maximum period that may be so specified in the certificate.
 - (7) A certificate under this section continues to have effect in relation to any clearing of native vegetation that was carried out before the certificate expired or was revoked or surrendered.
 - (8) A certificate under this section continues to have effect in relation to the completion of the clearing of native vegetation that is carried out after the certificate expires if the clearing authorised by the certificate had been substantially carried out before the expiry of the certificate.
 - (9) If the relevant land management (native vegetation) code is amended or repealed after a certificate is issued under this section, the continued clearing of native vegetation in compliance with the certificate is clearing authorised by a land management (native vegetation) code.
 - (10) A certificate under this section applies to the clearing of native vegetation by or on behalf of the landholder to whom it was issued and by or on behalf of any other person who becomes a landholder of the land concerned after the certificate was issued.

- (11) A landholder is not entitled to any compensation because a certificate issued under this section is revoked or its terms are varied.
- (12) The regulations may make provision for or with respect to certificates under this section, including for or with respect to the following—
- (a) the making of applications for certificates (including information to be provided by the landholder),
- Note—**
- See section 22 with respect to fees payable in relation to the issue of certificates.
- (b) the issue of certificates by authorised persons or bodies on behalf of Local Land Services,
 - (c) the terms and form of certificates,
 - (d) the amendment, revocation or surrender of certificates.
- (13) To avoid doubt, Local Land Services is not a determining authority for the purposes of Part 5 of the *Environmental Planning and Assessment Act 1979* when issuing or varying a certificate under this section.

60Z Voluntary and mandatory code compliant certificates

- (1) Local Land Services is to issue a voluntary code compliant certificate or a mandatory code compliant certificate for which a landholder has applied if satisfied that the proposed clearing will be clearing carried out in accordance with the relevant land management (native vegetation) code, and is to refuse to issue that certificate if not so satisfied.
- (2) The clearing of native vegetation by or on behalf of a landholder in accordance with a voluntary code compliant certificate or a mandatory code compliant certificate is conclusively presumed to be clearing carried out in accordance with the relevant land management (native vegetation) code.
- (3) However, any such certificate may restrict the application of the certificate to specified aspects of the clearing of native vegetation. Any other aspect of the clearing is not conclusively presumed to be clearing carried out in accordance with the relevant land management (native vegetation) code.
- (4) For the purposes of this section, any clearing is not conclusively presumed to be clearing carried out in accordance with the relevant land management (native vegetation) code if the information provided in the application for the certificate (or pursuant to a request by Local Land Services to determine the application) was false or misleading in a material particular.
- (5) This section does not apply to any contravention of section 60ZC (Provisions relating

to set aside areas).

60ZA Limitation on issue of mandatory code compliant certificates

- (1) The Minister administering this Division and the Minister administering the *Biodiversity Conservation Act 2016* may, by order published jointly in the Gazette, restrict the issue of mandatory code compliant certificates.
- (2) Any such restriction may, without limitation, exclude the issue of those certificates in particular areas or all areas and for particular periods or indefinitely.
- (3) Local Land Services is to exercise its functions under this Division subject to any such restriction.
- (4) An order may be made under this section without prior notice to affected landholders and affected landholders are not entitled to any compensation because of the operation of the order.

60ZB Authorised code variation certificates

- (1) Local Land Services is to issue an authorised code variation certificate for which a landholder has applied if satisfied that—
 - (a) the proposed variation is for a legitimate purpose associated with the management of the land concerned, and
 - (b) the variation is reasonable in the circumstances, and
 - (c) the environmental impact of the variation would only be minor,and is to refuse to issue that certificate if not so satisfied.
- (2) The clearing of native vegetation by or on behalf of a landholder in accordance with a land management (native vegetation) code, as varied by an authorised code variation certificate, is clearing carried out in accordance with that code.
- (3) However, any such clearing is not clearing carried out in accordance with that code to the extent it relies on a variation authorised by the certificate if the information provided in the application for the certificate (or pursuant to a request by Local Land Services to determine the application) was false or misleading in a material particular.

60ZC Provisions relating to set aside areas

- (1) This section applies where a land management (native vegetation) code requires a set aside area for native vegetation on part of a landholding and clearing of native vegetation on any other part of the landholding is carried out in reliance on the authority conferred by the code. This section does not apply if the clearing of the native vegetation on a set aside area is carried out in accordance with an approval under Division 6. This section applies despite any authorisation to clear native

vegetation for an allowable activity under Division 4 and Schedule 5A.

- (2) The land management (native vegetation) code is to contain the requirements for set aside areas under the terms of a mandatory code compliant certificate, including the characteristics of areas suitable to be set aside, the size of the area to be set aside, any re-vegetation or other management actions required or prohibited in the set aside area, when the area is to be set aside and the consent to the set aside of landholders or other persons with a specified interest in the area.
- (3) Clearing under the land management (native vegetation) code may not be carried out until the set aside area is registered on a public register of set aside areas maintained by Local Land Services in accordance with the regulations.
- (4) A set aside area cannot be an area—
 - (a) that is covered by a private land conservation agreement under the *Biodiversity Conservation Act 2016*, or
 - (b) that is set aside from clearing for biodiversity purposes because of any other agreement or any statutory or other legal obligation (other than under a law of the Commonwealth that relates to the same impacts arising from the same activity), or
 - (c) that is of a kind that the regulations exclude from being a set aside area.
- (5) The landholder of any land containing a set aside area (including any future landholder of the area) has the following obligations—
 - (a) the landholder is required to comply with the obligations of the relevant land management (native vegetation) code (and the necessary mandatory code compliant certificate) with respect to establishing the set aside area,
 - (b) the landholder must not clear native vegetation on the set aside area, other than—
 - (i) in the course of land management activities authorised or required by that code or certificate, or
 - (ii) for allowable activities under Schedule 5A that improve the native vegetation on the set aside area as determined under that code and certificate,
 - (c) the landholder must carry out such land management actions as are required by that code or certificate to protect the biodiversity values of the set aside area or other part of the landholding concerned.
- (6) A landholder who contravenes an obligation of the landholder under subsection (5) is guilty of an offence if the set aside area and obligation concerned are recorded on the public register of set aside areas.

Maximum penalty—

(a) in the case of a corporation—\$1,650,000, or

(b) in the case of an individual—\$330,000.

(7) The obligations of landholders under this section have effect despite section 42 of the *Real Property Act 1900*.

(8) The regulations may make provision for or with respect to set aside areas, including the following—

(a) the registration of set aside areas (and any changes to set aside areas) on the public register of set aside areas and inquiries in connection with information on the register,

(b) the notification of set aside areas to relevant local councils,

(c) authorising Local Land Services to change the location of a set aside area to an area of equal or higher biodiversity value or to reduce or extinguish a set aside area if clearing on the set aside area under other legislative authority is inconsistent with the continuation of the set aside area,

(d) authorising Local Land Services to change or suspend land management activities required to be carried out on set aside areas.

Note—

The *Environmental Planning and Assessment Act 1979* and the instruments made under that Act (and the biodiversity offsets scheme under the *Biodiversity Conservation Act 2016*) may deal with the obligations of planning authorities with respect to the impact of development on set aside areas and relevant offsets for any loss of biodiversity values associated with clearing for development in a set aside area.

Division 6 Approval for clearing native vegetation not otherwise authorised

60ZD Definitions: Division 6

In this Division—

biodiversity development assessment report—see section 6.12 of the *Biodiversity Conservation Act 2016*.

biodiversity values—see section 1.5 of the *Biodiversity Conservation Act 2016*.

Panel means the Native Vegetation Panel established under section 60ZE.

60ZE The Panel

(1) The Minister is to establish a panel for the purposes of this Division, to be called the

Native Vegetation Panel.

- (2) The Panel is to consist of the following 3 members appointed by the Minister—
 - (a) a Chairperson of the Panel, being a person with expertise in planning, public administration or social assessment,
 - (b) a person with expertise in economics, agricultural economics or agricultural land production systems,
 - (c) a person with expertise in ecology or the protection and conservation of biodiversity.
- (3) The Panel has the function of determining applications under this Division for approval to clear native vegetation.
- (4) The Panel is not subject to the direction or control of the Minister (except in relation to the procedure of the Panel or as provided by or under this Act).
- (5) The Panel is a NSW Government agency.
- (6) Schedule 5B contains provisions with respect to the members and procedure of the Panel. The regulations may amend Schedule 5B.
- (7) The Minister may make arrangements for the provision to the Panel of staff and facilities of (and information relating to the administration of this Part held by) Local Land Services or a Public Service agency responsible to the Minister.
- (8) Legal proceedings by or against the Panel are to be taken in the name of the Panel and not by or against the members of the Panel.

60ZF Obtaining approval for clearing of native vegetation

- (1) An application may be made to the Panel by or on behalf of the landholder for approval to clear native vegetation on land in any area of the State to which this Part applies.
- (2) The Panel may, in accordance with this Division, grant an approval to clear the native vegetation under this Division or refuse the application.
- (3) An approval for the clearing of native vegetation on any land may only be granted under this Division if the land comprises or includes category 2-regulated land.
- (4) An approval may only be granted under this Division if the land is being cleared for a purpose specified in the application for approval and—
 - (a) the land can be used for that purpose without development consent or State significant infrastructure approval under the *Environmental Planning and Assessment Act 1979*, and

- (b) the clearing of the land is not part of an activity that is carried out by, or that requires the approval of, a determining authority within the meaning of Part 5 of that Act.
- (5) In determining an application for approval under this Division, the Panel is to take into consideration the environmental, social and economic impacts of the proposed clearing (in accordance with the principles of ecologically sustainable development) having regard to the purpose for which the land is to be used after it is cleared. In relation to the environmental impacts, the Panel is to take into consideration (without limitation) the following—
- (a) the likely impact of the proposed clearing on biodiversity values as set out in a biodiversity development assessment report that has been submitted by the applicant for the approval in accordance with section 60ZG,
- (b) whether the clearing of the native vegetation is likely to cause or increase soil erosion, salination, acidification, land slip, flooding, pollution or other adverse land or water impacts,
- (c) any future clearing of native vegetation on the land that has been duly authorised or notified but not yet carried out.
- (6) The Panel must refuse to grant approval under this Division if the Panel is of the opinion that the proposed clearing of native vegetation is likely to have serious and irreversible impacts on biodiversity values. ***Serious and irreversible impacts on biodiversity values*** means serious and irreversible impacts on biodiversity values as determined under section 6.5 of the *Biodiversity Conservation Act 2016* that would remain after the measures proposed to be taken to avoid or minimise the impact of the proposed clearing on biodiversity values.
- (7) An approval under this Division may be granted subject to such conditions relating to the clearing as are specified in the approval (including in relation to any matter referred to in subsection (5)). However, an approval cannot be granted subject to conditions relating to the use of the land after it has been cleared.

Note—

The *Environmental Planning and Assessment Act 1979* deals with land use.

- (8) An approval under this Division may be granted even if part of the clearing is otherwise authorised under this Part or under section 600 (Clearing authorised under other legislation etc).
- (8A) An approval under this Division may not be granted—
- (a) to carry out forestry operations within the meaning of Part 5B, or
- (b) to clear native vegetation on land to which a private native forestry plan under

Part 5B applies.

- (9) An approval under this Division may be granted subject to a condition that any development consent under the *Environmental Planning and Assessment Act 1979* that authorises the clearing of native vegetation on the land is surrendered under that Act. Any such development consent may be granted subject to a condition that any approval under this Division is surrendered under this Division.
- (10) An application for approval under this division may be made jointly by or on behalf of a group of landholders. In that case, the application is to be assessed and determined under this Division having regard to the whole area that is the subject of the application.
- (11) The regulations may make provision for or with respect to the fees payable in connection with an application for an approval under this Division.

60ZG Biodiversity development assessment report and retirement of biodiversity credits

- (1) An approval may only be granted under this Division if a biodiversity development assessment report in respect of the proposed clearing has been obtained by the applicant for that approval and provided to the Panel.
- (2) The Panel is to provide the Environment Agency Head with a copy of any biodiversity development assessment report that is submitted to the Panel in connection with an application for approval.
- (3) If the Panel decides to grant approval, the conditions of the approval must require the applicant to retire biodiversity credits to offset the residual impact on biodiversity values of the number and class set out in the report (subject to subsection (4)). The residual impact is the impact after the measures that are required to be carried out by the terms or conditions of the approval to avoid or minimise the impact on biodiversity values of the proposed clearing (being measures on which the report was based).

Note—

Division 6 of Part 6 of the *Biodiversity Conservation Act 2016* enables a person who is required under this section to retire biodiversity credits to make a payment instead to the Biodiversity Conservation Fund of the value of the credits in accordance with the offsets payment calculator.

- (4) The Panel may reduce or increase the number of biodiversity credits that would otherwise be required to be retired if the Panel determines that the reduction or increase is justified having regard to the environmental, social and economic impacts of the proposed clearing and the agricultural purpose for which the land is to be used after it is cleared. The Panel must give reasons for a decision to reduce or increase the biodiversity credits.
- (5) An approval under this Division does not authorise the clearing of native vegetation until any obligation under the approval to retire biodiversity credits has been complied

with.

- (6) However, an approval under this Division may provide for the staged clearing of native vegetation and for the corresponding staged retirement of the relevant number of biodiversity credits before each such stage of clearing is carried out.
- (7) For the purposes of this Division, the impact on biodiversity values of proposed clearing includes the impact of clearing or retaining dead vegetation on the land concerned, and accordingly the measures required to be carried out by the terms or conditions of an approval may include the retention of dead vegetation.
- (8) This section does not operate to limit the measures that the Panel may require to avoid or minimise the impacts of proposed clearing or the power of the Panel to refuse to grant approval because of those impacts.

60ZH Regulations and application of planning approval provisions to approvals under this Division

- (1) The regulations may make provision for or with respect to applications for approvals under this Division and to approvals granted under this Division.
- (2) In particular, the regulations may apply provisions (with or without modification) of the *Environmental Planning and Assessment Act 1979* relating to applications for development consent or to development consent to applications for approvals or to approvals under this Division.

60ZI Modification of approvals under this Division

- (1) An application may be made to the Panel for the modification of an approval granted under this Division to clear native vegetation on any land. The application may be made by or on behalf of the landholder concerned.
- (2) A further biodiversity development assessment report is to be provided to the Panel in connection with the application unless the Panel determines that the application will not increase the impact on biodiversity values.
- (3) The biodiversity development assessment report is to be made in relation to the clearing as proposed to be modified, but is to take into account any measures to avoid, minimise or offset the impacts of the proposed clearing to which the modification relates that have already been taken in connection with the approval before its modification.
- (4) The Panel may—
 - (a) grant the application and modify the approval granted under this Division accordingly, or
 - (b) refuse the application.

The Panel may vary the terms of the modification sought by the applicant.

- (5) The regulations may make further provision with respect to applications for the modification of approvals under this Division (including exemptions to the application of this section).

60ZJ Appeal against approval decisions

- (1) A landholder may appeal to the Land and Environment Court against a decision to refuse an application by the landholder for approval under this Division or for the modification of any such approval or against a decision to impose a condition of any such approval.
- (2) An appeal is to be made within the time prescribed by the regulations.
- (3) The regulations may provide that a failure to determine an application for an approval or for the modification of an approval within the period provided by the regulations is taken to be a refusal of the application for the purposes of this section.
- (4) In this section, a reference to a landholder includes a reference to a person who makes a relevant application on behalf of the landholder.

60ZK Miscellaneous provisions relating to approvals

- (1) An approval under this Division applies to the clearing of native vegetation by or on behalf of the landholder to whom it was granted and by or on behalf of any other person who becomes a landholder of the land concerned after the approval was granted.
- (2) If an application for approval (or for the modification of an approval) under this Division is refused by the Panel, the applicant is to be given the reasons for the decision.
- (3) To avoid doubt, the Panel is not a determining authority for the purposes of Part 5 of the *Environmental Planning and Assessment Act 1979* when granting or modifying an approval under this Division.

60ZL SEPP may apply approvals under this Division to the clearing of native vegetation on urban land

- (1) A State environmental planning policy under the *Environmental Planning and Assessment Act 1979* may apply the provisions of this Division to any urban area of the State that is not an area of the State to which this Part applies.
- (2) The provisions of this Division may be so applied, with or without modifications or additions.

Division 7 Miscellaneous

60ZM Enforcement under [Biodiversity Conservation Act 2016](#)

- (1) The [Biodiversity Conservation Act 2016](#) contains provisions relating to the enforcement of this Part and Schedule 5A.

Note—

The following provisions of that Act apply (to the extent specified in those provisions) to the enforcement of this Part—

- (a) Part 11 (Regulatory compliance mechanisms),
- (b) Part 12 (Investigation powers),
- (c) Part 13 (Criminal and civil proceedings),
- (d) Section 14.7A (Provisions relating to regulation or enforcement of native vegetation legislation).

- (2) Accordingly—

- (a) functions under Part 11 (Powers of authorised officers) are not exercisable in relation to any matter arising under this Part or Schedule 5A,
- (b) proceedings for an offence against this Part or the regulations under this Part cannot be instituted under Part 12 (Enforcement provisions) and that Part does not apply to any such alleged offence.

60ZN Local Land Services to report on rates of allowable clearing

- (1) Local Land Services is to publicly report on an annual basis on its estimate of the overall rate of clearing of native vegetation in regulated rural areas—
- (a) as a result of clearing for allowable activities under Division 4 and Schedule 5A, and
 - (b) as a result of clearing authorised by a land management (native vegetation) code under Division 5.
- (2) Local Land Services may include that report in its annual report under the [Annual Reports \(Statutory Bodies\) Act 1984](#).

60ZO Local Land Services to maintain public information registers in relation to native vegetation management

- (1) Local Land Services is to maintain and make publicly available registers of the following (**public information registers**)—
- (a) aggregate information about notices given under section 60X (Notice to Local Land Services of clearing),

- (c) aggregate information about certificates under Schedule 5A to which section 60Y applies,
- (d) approvals (and any modification of approvals) granted under Division 6,
- (e) applications for approval (or for modifications of approvals) that have been refused and the reasons for the refusal.

Aggregate information about notices or certificates is to be compiled on a regional basis and is not to identify the particular landholder who gave the notice or to whom the certificate was issued (or the address of the landholding concerned).

- (2) Public information registers are to be made available on or from a government website maintained by Local Land Services.
- (3) Where a public information register contains only aggregate information in relation to notices or certificates, Local Land Services is required to make arrangements with other public authorities to enable them to obtain access to individual notices or certificates for the purposes of exercising their functions.
- (4) The regulations may make further provision for or with respect to public information registers (including the information required to be included in, or excluded from, the registers and the correction of the registers).

60ZP Regulations: Part 5A

- (1) Regulations made under Divisions 1, 2, 4 and 5 are to be made on the joint recommendation of the Minister and the Minister administering the [Biodiversity Conservation Act 2016](#).
- (2) In addition to any other regulations specifically authorised by this Part, the regulations may make provision for or with respect to the clearing of native vegetation authorised by or under this Part.

Part 5B Private native forestry

Division 1 Preliminary

60ZQ Definitions: Part 5B

- (1) In this Part—

- (2) Words and expressions used in this Part have (subject to this Part) the same meanings as in Part 5A.

60ZR Objects of Part

The objects of this Part are—

- (a) to authorise the carrying out of private native forestry in accordance with principles of ecologically sustainable forest management, and
- (b) to protect biodiversity and water quality (including threatened species, populations and ecological communities under Part 7A of the *Fisheries Management Act 1994*) in connection with private native forestry operations, and
- (c) to enable landholders to carry out forestry operations in a sustainable manner in areas of the State to which this Part applies, and
- (d) to ensure that differences between private native forestry and native forestry operations in State forests or other Crown-timber land are recognised, including in the application of protocols, codes, standards and other instruments.

60ZS Area of State to which this Part applies

- (1) This Part applies to any area of the State, other than the following—
- (a) a State forest or other Crown-timber land within the meaning of the *Forestry Act 2012*,

- (2) The regulations may amend this section for the purposes of adding or removing areas of the State to which this Part applies (or of revising references to areas of the State).

Division 2 Private native forestry codes of practice

60ZT Responsibility for preparation and making of codes

- (1) The Minister is responsible for preparing and making private native forestry codes of practice under this Division.
- (2) The Minister may make a private native forestry code of practice only with the concurrence of the Minister administering the *Biodiversity Conservation Act 2016* and of the Minister administering Part 5A of this Act. The Minister is also required to consult the Minister administering Part 7A of the *Fisheries Management Act 1994*.
- (3) A private native forestry code of practice is to make provision for or with respect to the carrying out of forestry operations to which private native forestry plans apply, including provisions relating to—
 - (a) notification of the commencement and cessation of forestry operations, and
 - (b) biodiversity conservation, and
 - (c) the prevention of water pollution, and
 - (d) threatened species, populations and ecological communities under Part 7A of the *Fisheries Management Act 1994*, and
 - (e) the provision of information about forestry operations to Local Land Services and the public, and
 - (f) any other matter prescribed by the regulations.
- (4) A private native forestry code of practice is to specify the land to which it applies.
- (5) When preparing or giving concurrence to a private native forestry code of practice, the relevant Ministers are to have regard to the objects of this Part.
- (6) A private native forestry code of practice is to be published on the NSW legislation website.

Note—

See clause 29 of Schedule 6 for provisions that continue existing private native forestry codes of practice in force until new codes are made under this Division.

60ZU Public consultation on proposed codes

- (1) Before a private native forestry code of practice is made, the proposed code is to be made publicly available for a period of at least 4 weeks.
- (2) During that period, any person may make a written submission to the Minister on the proposed code. The Minister may (but need not) make publicly available the submissions made on the proposed code (or a summary of or report on any such submissions).
- (3) The Minister is, before making a private native forestry code of practice, to consider any submissions duly made on the proposed code.
- (4) If substantial changes are proposed to be made to a proposed code following public consultation, the Minister may undertake further public consultation on the revised proposed code.
- (5) A failure to comply with a requirement under this section in relation to a proposed code of practice does not prevent the code being made, or invalidate the code once it is made.
- (6) The regulations may make further provision for or with respect to public consultation under this section.

60ZV Amendment or repeal of codes

- (1) A private native forestry code of practice may be amended or repealed in the same way as a code may be made.
- (2) Public consultation under section 60ZU applies to the amendment or repeal of a private native forestry code of practice.
- (3) However, the Minister may—
 - (a) dispense with public consultation on any amendment of a code if satisfied it should be dispensed with because of the minor nature or urgency of the matter, and
 - (b) dispense with any concurrence of, or consultation with, another Minister on any amendment of a code if satisfied it should be dispensed with because of the minor nature of the matter.
- (4) A code that amends or replaces a code extends to forestry operations under a private native forestry plan that was approved before the amendment or replacement

(despite anything to the contrary in the plan) unless the amended or replaced code otherwise provides.

Division 3 Private native forestry plans

60ZW Authorised private native forestry operations

- (1) Forestry operations are authorised by this Part if they are forestry operations to which a private native forestry plan applies.
- (2) A private native forestry plan does not authorise the carrying out of forestry operations on any part of the land to which the plan applies that becomes, after the approval of the plan, an area of the State to which this Part does not apply.

Note—

Section 60N provides that it is a defence to the offence of clearing native vegetation in a rural area of the State under that section if (among other things) the clearing comprises forestry operations authorised under this Part (the offence of unauthorised clearing of native vegetation carries a maximum penalty ranging from \$500,000 to \$5 million). Clause 8 of *State Environmental Planning Policy (Vegetation in Non-Rural Areas) 2017* provides that authority is not required under that Policy for the clearing of native vegetation in a non-rural area of the State if the clearing comprises forestry operations authorised under this Part (a similar maximum penalty applies under environmental planning and assessment legislation for the relevant offences under that legislation).

60ZX Landholders may submit draft private native forestry plans

- (1) A landholder or group of landholders may submit a draft private native forestry plan to Local Land Services for approval under this Part. Any person may submit the draft plan on behalf of the landholder or group of landholders.
- (2) A draft plan cannot be submitted for approval without the consent in writing of—
 - (a) all landholders of land to which the plan applies, and
 - (b) all persons who have a forestry right (within the meaning of section 87A of the *Conveyancing Act 1919*) in the land to which the plan applies, and
 - (c) any other person who has an interest in the land prescribed by the regulations.
- (3) A draft plan must be in the form approved by Local Land Services and contain or be accompanied by the information required by that form.

Section 60Q provides that this Schedule does not authorise clearing or other activities without obtaining any authority required by or under, or in contravention of, other Acts (including provisions of this Act other than Part 5A).

2 Only landholders authorised to clear

- (1) Clearing of native vegetation authorised by this Schedule to be carried out on a landholding may only be carried out by or on behalf of the landholder (unless this Schedule provides to the contrary).
- (2) If this Schedule authorises the clearing of native vegetation by an infrastructure owner or other person who is not the landholder, this Schedule does not authorise the entry onto land to carry out the clearing.

- (1) The maximum distances of clearing of native vegetation authorised by this Schedule in relation to linear or fixed point infrastructure are not cumulative.
- (2) Accordingly, if the maximum distance for an item of infrastructure overlaps with the maximum distance for another item of infrastructure on the land concerned, those distances are not to be combined to form a composite distance or area. For example, if a road is situated next to a pipeline, the maximum distance of clearing is not the sum of the maximum distance for the road and the maximum distance for the pipeline.

7 Clearing only to minimum extent necessary

The clearing of native vegetation that is authorised by this Schedule for any purpose only authorises clearing to the minimum extent necessary for that purpose.

8 Separate items of infrastructure to be constructed so as to reduce overall distance of

clearing

- (1) This Schedule does not authorise clearing of native vegetation in relation to an item of infrastructure constructed by a landholder on the same landholding as another item of infrastructure for which clearing is authorised by this Schedule if—
 - (a) the item of infrastructure could have been constructed closer to the other item of infrastructure so as to reduce the overall distance of clearing for both items of infrastructure to the smallest overall distance, and
 - (b) the landholder does not provide a reasonable justification for the location of the item of infrastructure constructed by the landholder.
- (2) This clause applies only if the item of infrastructure was constructed after the commencement of Part 5A of this Act.

9 Clearing for maximum distance that straddles different holdings

A maximum distance of clearing authorised by this Schedule in relation to an item of infrastructure on a landholding applies even if part of the clearing within that maximum distance is carried out on an adjoining landholding.

10 Local Land Services may increase maximum clearing distances

- (1) Local Land Services may, on application by a landholder, issue a certificate that increases a maximum distance specified in this Schedule in its application to the land concerned.
- (2) Local Land Services is to issue that certificate if it is satisfied that—
 - (a) the proposed increase is for a legitimate purpose associated with the management of the land concerned, and
 - (b) the increase is reasonable in the circumstances, and
 - (c) the environmental impact of the increase would only be minor,and is to refuse to issue that certificate if it is not so satisfied.
- (3) The maximum distance in its application to the land concerned is increased in accordance with that certificate while it remains in force.
- (4) Section 60Y (Certification by Local Land Services prior to clearing—general) also applies to a certificate issued under this clause.

11 Exclusion of land subject to remediation direction, stop work order etc

Despite anything to the contrary in this Schedule, clearing of native vegetation is not authorised on land that is subject to an order under Part 11 (Regulatory compliance

mechanisms) of the *Biodiversity Conservation Act 2016*.

Part 2 Clearing for allowable activities—general

29 Definition of “rural infrastructure”

(1) For the purposes of this Schedule—

- (a) **infrastructure** is a building, structure or work, and
- (b) **rural infrastructure** is infrastructure of a kind referred to in this clause that is used for the purposes of, or in connection with, an activity that is being carried out in a regulated rural area or other area of the State to which Part 5A of this Act applies, but only if the activity may be carried out without development consent or State significant infrastructure approval under the [Environmental Planning and Assessment Act 1979](#).

(2) In the Western and Central Zones (other than on small holdings), infrastructure includes (but is not limited to) the following—

- (a) fences, roads, tracks, irrigation channels or pipelines, stock or domestic water supply pipelines, soil conservation earthworks, cut lines for stock movement, bore drains, drains to water storages, telephone lines or cables, power lines or cables or areas for movement of large machinery,

While the certificate remains in force, this clause has effect as if the additional infrastructure concerned was infrastructure in relation to the land concerned.
- (6) Local Land Services is to issue that certificate if it is satisfied that the additional infrastructure is required by the landholder for a genuine agricultural activity purpose, and is to refuse to issue that certificate if it is not so satisfied.
- (7) Section 60Y (Certification by Local Land Services prior to clearing—general) also applies to a certificate issued under this clause.

30 Clearing for construction, operation or maintenance of rural infrastructure allowable

Clause 124 of the [Local Land Services Regulation 2014](#) excludes category 2-sensitive regulated land and certain other land from clearing authorised by a code.

- (2) Despite subclause (1), this Part does not apply to land that is subject to a private native forestry plan other than—
