Note—

However, under Division 3.5 of the Act, a development application may be made for consent to carry out development that may only be carried out if the environmental planning instrument applying to the relevant development is appropriately amended or if a new instrument, including an appropriate principal environmental planning instrument, is made, and the consent authority may consider the application. The Division requires public notice of the development application and the draft environmental planning instrument allowing the development at the same time, or as closely together as is practicable.

1.9 Application of SEPPs

- (1) This Plan is subject to the provisions of any State environmental planning policy that prevails over this Plan as provided by section 3.28 of the Act.

2.2 Zoning of land to which Plan applies

For the purposes of this Plan, land is within the zones shown on the [Land Zoning Map](#).

2.3 Zone objectives and Land Use Table

- (1) The Land Use Table at the end of this Part specifies for each zone—
 - (a) the objectives for development, and
 - (b) development that may be carried out without development consent, and
 - (c) development that may be carried out only with development consent, and
 - (d) development that is prohibited.
- (2) The consent authority must have regard to the objectives for development in a zone when determining a development application in respect of land within the zone.

(3) In the Land Use Table at the end of this Part—

- (a) a reference to a type of building or other thing is a reference to development for the purposes of that type of building or other thing, and
- (b) a reference to a type of building or other thing does not include (despite any definition in this Plan) a reference to a type of building or other thing referred to separately in the Land Use Table in relation to the same zone.

(4) This clause is subject to the other provisions of this Plan.

Notes—

- 1 Schedule 1 sets out additional permitted uses for particular land.
- 2 Schedule 2 sets out exempt development (which is generally exempt from both Parts 4 and 5 of the Act). Development in the land use table that may be carried out without consent is nevertheless subject to the environmental assessment and approval requirements of Part 5 of the Act.
- 3 Schedule 3 sets out complying development (for which a complying development certificate may be issued as an alternative to obtaining development consent).
- 4 Clause 2.6 requires consent for subdivision of land.
- 5 Part 5 contains other provisions which require consent for particular development.

2.4 Unzoned land

- (1) Development may be carried out on unzoned land only with development consent.
- (2) In deciding whether to grant development consent, the consent authority—
 - (a) must consider whether the development will impact on adjoining zoned land and, if so, consider the objectives for development in the zones of the adjoining land, and
 - (b) must be satisfied that the development is appropriate and is compatible with permissible land uses in any such adjoining land.

2.5 Additional permitted uses for particular land

- (1) Development on particular land that is described or referred to in Schedule 1 may be carried out—
 - (a) with development consent, or
 - (b) if the Schedule so provides—without development consent,in accordance with the conditions (if any) specified in that Schedule in relation to that development.
- (2) This clause has effect despite anything to the contrary in the Land Use Table or other provision of this Plan.

2.6 Subdivision—consent requirements

- (1) Land to which this Plan applies may be subdivided, but only with development consent.

Notes—

1 If a subdivision is specified as **exempt development** in an applicable environmental planning instrument, such as this Plan or *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008*, the Act enables it to be carried out without development consent.

2 Part 6 of *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008* provides that the strata subdivision of a building in certain circumstances is **complying development**.

- (2) Development consent must not be granted for the subdivision of land on which a secondary dwelling is situated if the subdivision would result in the principal dwelling and the secondary dwelling being situated on separate lots, unless the resulting lots are not less than the minimum size shown on the [Lot Size Map](#) in relation to that land.

Note—

The definition of **secondary dwelling** in the Dictionary requires the dwelling to be on the same lot of land as the principal dwelling.

2.7 Demolition requires development consent

The demolition of a building or work may be carried out only with development consent.

Note—

If the demolition of a building or work is identified in an applicable environmental planning instrument, such as this Plan or *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008*, as exempt development, the Act enables it to be carried out without development consent.

2.8 Temporary use of land

- (1) The objective of this clause is to provide for the temporary use of land if the use does not compromise future development of the land, or have detrimental economic, social, amenity or environmental effects on the land.
- (2) Despite any other provision of this Plan, development consent may be granted for development on land in any zone for a temporary use for a maximum period of 52 days (whether or not consecutive days) in any period of 12 months.
- (3) Development consent must not be granted unless the consent authority is satisfied that—
 - (a) the temporary use will not prejudice the subsequent carrying out of development on the land in accordance with this Plan and any other applicable environmental planning instrument, and
 - (b) the temporary use will not adversely impact on any adjoining land or the amenity of the neighbourhood, and
 - (c) the temporary use and location of any structures related to the use will not

adversely impact on environmental attributes or features of the land, or increase the risk of natural hazards that may affect the land, and

(d) at the end of the temporary use period the land will, as far as is practicable, be restored to the condition in which it was before the commencement of the use.

(4) Despite subclause (2), the temporary use of a dwelling as a sales office for a new release area or a new housing estate may exceed the maximum number of days specified in that subclause.

(5) Subclause (3) (d) does not apply to the temporary use of a dwelling as a sales office mentioned in subclause (4).

Land Use Table

Note—

A type of development referred to in the Land Use Table is a reference to that type of development only to the extent it is not regulated by an applicable State environmental planning policy. The following State environmental planning policies in particular may be relevant to development on land to which this Plan applies—

- (3) The size of any lot resulting from a subdivision of land to which this clause applies is not to be less than the minimum size shown on the [Lot Size Map](#) in relation to that land.
- (4) This clause does not apply in relation to the subdivision of any land—
 - (a) by the registration of a strata plan or strata plan of subdivision under the [Strata Schemes Development Act 2015](#), or
 - (b) by any kind of subdivision under the [Community Land Development Act 1989](#).

4.1AA Minimum subdivision lot size for community title schemes

- (1) The objectives of this clause are as follows—
 - (a) to ensure that land to which this clause applies is not fragmented by subdivisions that would create additional dwelling entitlements.
- (2) This clause applies to a subdivision (being a subdivision that requires development consent) under the [Community Land Development Act 1989](#) of land in any of the following zones—
 - (a) Zone RU1 Primary Production,
 - (b) Zone RU2 Rural Landscape,

4.1B Minimum subdivision lot sizes for certain split zones

- (1) The objectives of this clause are as follows—
 - (a) to provide for the subdivision of lots that are within more than one zone but cannot be subdivided under clause 4.1,
 - (b) to ensure that the subdivision occurs in a manner that promotes suitable land use and development.

Note—

A dwelling includes a rural worker's dwelling (see definition of that term in the Dictionary).

4.2A Strata subdivisions in certain rural, environmental and residential zones

- (1) The objective of this clause is to ensure that land to which this clause applies is not fragmented by subdivisions that would create additional dwelling entitlements.
- (2) This clause applies to land in the following zones that is used, or proposed to be used, for residential accommodation or tourist and visitor accommodation—
 - (a) Zone RU1 Primary Production,
 - (b) Zone RU2 Rural Landscape,
 - (c) Zone RU4 Primary Production Small Lots,
 - (d) Zone R2 Low Density Residential,
 - (e) Zone R5 Large Lot Residential,

(f) Zone E3 Environmental Management,

(g) Zone E4 Environmental Living.

(3) Development consent must not be granted for the subdivision of a lot to which this clause applies under a strata plan that would create lots below the minimum lot size specified for that lot on the [Lot Size Map](#).

Note—

Part 6 of *State Environmental Planning Policy (Exempt and Complying Development) Codes 2008* provides that the strata subdivision of a building in certain circumstances is specified complying development.

4.2B Erection of dwelling houses on land in certain residential, rural and environmental protection zones

(1) The objectives of this clause are as follows—

(a) to minimise unplanned rural residential development,

(b) to enable the replacement of lawfully erected dwelling houses in rural and environmental protection zones.

(2) This clause applies to land in the following zones—

(a) Zone RU1 Primary Production,

(b) Zone RU2 Rural Landscape,

(c) Zone RU4 Primary Production Small Lots,

(d) Zone RU5 Village,

(e) Zone R5 Large Lot Residential,

(f) Zone E3 Environmental Management,

(g) Zone E4 Environmental Living.

(3) Development consent must not be granted for the erection of a dwelling house on land to which this clause applies, and on which no dwelling house has been erected, unless the land is—

(a) a lot that is at least the minimum lot size specified for that land by the [Lot Size Map](#), or

(b) a lot created before this Plan commenced and on which the erection of a dwelling house was permissible immediately before that commencement, or

(c) a lot resulting from a subdivision for which development consent (or equivalent) was granted before this Plan commenced and on which the erection of a dwelling

house would have been permissible if the plan of subdivision had been registered before that commencement.

Note—

A dwelling cannot be erected on a lot created under clause 9 of *State Environmental Planning Policy (Rural Lands) 2008* or clause 4.2.

- (4) Despite any other provision of this clause, development consent may be granted for the erection of a dwelling house on land to which this clause applies if—
 - (a) there is a lawfully erected dwelling house on the land and the dwelling house to be erected is intended only to replace the existing dwelling house, or
 - (b) the land would have been a lot referred to in subclause (3) had it not been affected by—
 - (i) a minor realignment of its boundaries that did not create an additional lot, or
 - (ii) a subdivision creating or widening a public road or public reserve or for another public purpose.

4.2C Exceptions to minimum lot sizes for certain rural subdivisions

- (1) The objective of this clause is to enable the subdivision of land in certain rural areas to an appropriate size to meet the needs of current permissible uses other than for the purpose of dwelling houses or dual occupancies.
- (2) This clause applies to land in the following zones—
 - (a) Zone RU1 Primary Production,
 - (b) Zone RU2 Rural Landscape,
 - (c) Zone RU4 Primary Production Small Lots.
- (3) Land to which this clause applies may, with development consent, be subdivided to create a lot of a size that is less than the minimum lot size shown on the Lot Size Map in relation to that land, if the consent authority is satisfied that the use of the land after the subdivision will be the same use (other than for a dwelling house or a dual occupancy) permitted under the existing development consent for the land.
- (4) Development consent must not be granted for the subdivision of land to which this clause applies unless the consent authority is satisfied that—
 - (a) the subdivision will not adversely affect the use of the surrounding land for agriculture, and
 - (b) the subdivision is necessary for the ongoing operation of the permissible use, and

- (c) the subdivision will not increase rural land use conflict in the locality, and
- (d) the subdivision is appropriate having regard to the natural and physical constraints affecting the land.

4.3 Height of buildings

- (1) The objectives of this clause are as follows—
 - (a) to ensure the height of buildings complement the streetscape or the historic character of the area in which the buildings are located,
 - (b) to protect the heritage character and significance of buildings and not adversely affect the heritage integrity of heritage items and heritage conservation areas identified in this Plan,
 - (c) to ensure the height of buildings protects the amenity of neighbouring properties in terms of visual bulk, access to sunlight and privacy,
 - (d) to nominate heights that will provide a transition in built form between varying land use intensities.
- (2) The height of a building on any land is not to exceed the maximum height shown for the land on the [Height of Buildings Map](#).

4.4 Floor space ratio

- (1) The objectives of this clause are as follows—
 - (a) to ensure that the density, bulk and scale of development is appropriate for a site,
 - (b) to ensure that the density, bulk and scale of development integrates with the streetscape and character of the area in which the development is located,
 - (c) to facilitate development that contributes to the economic growth of the Albury and Lavington Central Business Districts.
- (2) The maximum floor space ratio for a building on any land is not to exceed the floor space ratio shown for the land on the [Floor Space Ratio Map](#).

4.5 Calculation of floor space ratio and site area

- (1) **Objectives** The objectives of this clause are as follows—
 - (a) to define ***floor space ratio***,
 - (b) to set out rules for the calculation of the site area of development for the purpose of applying permitted floor space ratios, including rules to—
 - (i) prevent the inclusion in the site area of an area that has no significant

development being carried out on it, and

- (ii) prevent the inclusion in the site area of an area that has already been included as part of a site area to maximise floor space area in another building, and
- (iii) require community land and public places to be dealt with separately.

(2) **Definition of “floor space ratio”** The **floor space ratio** of buildings on a site is the ratio of the gross floor area of all buildings within the site to the site area.

(3) **Site area** In determining the site area of proposed development for the purpose of applying a floor space ratio, the **site area** is taken to be—

- (a) if the proposed development is to be carried out on only one lot, the area of that lot, or
- (b) if the proposed development is to be carried out on 2 or more lots, the area of any lot on which the development is proposed to be carried out that has at least one common boundary with another lot on which the development is being carried out.

In addition, subclauses (4)–(7) apply to the calculation of site area for the purposes of applying a floor space ratio to proposed development.

(4) **Exclusions from site area** The following land must be excluded from the site area—

- (a) land on which the proposed development is prohibited, whether under this Plan or any other law,
- (b) community land or a public place (except as provided by subclause (7)).

(5) **Strata subdivisions** The area of a lot that is wholly or partly on top of another or others in a strata subdivision is to be included in the calculation of the site area only to the extent that it does not overlap with another lot already included in the site area calculation.

(6) **Only significant development to be included** The site area for proposed development must not include a lot additional to a lot or lots on which the development is being carried out unless the proposed development includes significant development on that additional lot.

(7) **Certain public land to be separately considered** For the purpose of applying a floor space ratio to any proposed development on, above or below community land or a public place, the site area must only include an area that is on, above or below that community land or public place, and is occupied or physically affected by the proposed development, and may not include any other area on which the proposed development is to be carried out.

(8) **Existing buildings** The gross floor area of any existing or proposed buildings within the

vertical projection (above or below ground) of the boundaries of a site is to be included in the calculation of the total floor space for the purposes of applying a floor space ratio, whether or not the proposed development relates to all of the buildings.

(9) **Covenants to prevent “double dipping”** When development consent is granted to development on a site comprised of 2 or more lots, a condition of the consent may require a covenant to be registered that prevents the creation of floor area on a lot (the restricted lot) if the consent authority is satisfied that an equivalent quantity of floor area will be created on another lot only because the site included the restricted lot.

(10) **Covenants affect consolidated sites** If—

(a) a covenant of the kind referred to in subclause (9) applies to any land (**affected land**), and

(b) proposed development relates to the affected land and other land that together comprise the site of the proposed development,

the maximum amount of floor area allowed on the other land by the floor space ratio fixed for the site by this Plan is reduced by the quantity of floor space area the covenant prevents being created on the affected land.

(11) **Definition** In this clause, **public place** has the same meaning as it has in the [Local Government Act 1993](#).

4.6 Exceptions to development standards

(1) The objectives of this clause are as follows—

(a) to provide an appropriate degree of flexibility in applying certain development standards to particular development,

(b) to achieve better outcomes for and from development by allowing flexibility in particular circumstances.

(2) Development consent may, subject to this clause, be granted for development even though the development would contravene a development standard imposed by this or any other environmental planning instrument. However, this clause does not apply to a development standard that is expressly excluded from the operation of this clause.

(3) Development consent must not be granted for development that contravenes a development standard unless the consent authority has considered a written request from the applicant that seeks to justify the contravention of the development standard by demonstrating—

(a) that compliance with the development standard is unreasonable or unnecessary in

the circumstances of the case, and

- (b) that there are sufficient environmental planning grounds to justify contravening the development standard.
- (4) Development consent must not be granted for development that contravenes a development standard unless—
- (a) the consent authority is satisfied that—
 - (i) the applicant's written request has adequately addressed the matters required to be demonstrated by subclause (3), and
 - (ii) the proposed development will be in the public interest because it is consistent with the objectives of the particular standard and the objectives for development within the zone in which the development is proposed to be carried out, and
 - (b) the concurrence of the Planning Secretary has been obtained.
- (5) In deciding whether to grant concurrence, the Planning Secretary must consider—
- (a) whether contravention of the development standard raises any matter of significance for State or regional environmental planning, and
 - (b) the public benefit of maintaining the development standard, and
 - (c) any other matters required to be taken into consideration by the Planning Secretary before granting concurrence.
- (6) Development consent must not be granted under this clause for a subdivision of land in Zone RU1 Primary Production, Zone RU2 Rural Landscape, Zone RU3 Forestry, Zone RU4 Primary Production Small Lots, Zone RU6 Transition, Zone R5 Large Lot Residential, Zone E2 Environmental Conservation, Zone E3 Environmental Management or Zone E4 Environmental Living if—
- (a) the subdivision will result in 2 or more lots of less than the minimum area specified for such lots by a development standard, or
 - (b) the subdivision will result in at least one lot that is less than 90% of the minimum area specified for such a lot by a development standard.

Note—

When this Plan was made it did not include Zone RU3 Forestry or Zone RU6 Transition.

- (7) After determining a development application made pursuant to this clause, the consent authority must keep a record of its assessment of the factors required to be addressed in the applicant's written request referred to in subclause (3).

- (8) This clause does not allow development consent to be granted for development that would contravene any of the following—
- (a) a development standard for complying development,
 - (b) a development standard that arises, under the regulations under the Act, in connection with a commitment set out in a BASIX certificate for a building to which [State Environmental Planning Policy \(Building Sustainability Index: BASIX\) 2004](#) applies or for the land on which such a building is situated,
 - (c) clause 5.4,
 - (ca) clauses 4.1A, 4.2A, 6.1 and 7.5.

Part 5 Miscellaneous provisions

5.1 Relevant acquisition authority

- (1) The objective of this clause is to identify, for the purposes of section 3.15 of the Act, the authority of the State that will be the relevant authority to acquire land reserved for certain public purposes if the land is required to be acquired under Division 3 of Part 2 of the [Land Acquisition \(Just Terms Compensation\) Act 1991](#) (**the owner-initiated acquisition provisions**).

Note—

If the landholder will suffer hardship if there is any delay in the land being acquired by the relevant authority, section 23 of the [Land Acquisition \(Just Terms Compensation\) Act 1991](#) requires the authority to acquire the land.

- (2) The authority of the State that will be the relevant authority to acquire land, if the land is required to be acquired under the owner-initiated acquisition provisions, is the authority of the State specified below in relation to the land shown on the [Land Reservation Acquisition Map](#) (or, if an authority of the State is not specified in relation to land required to be so acquired, the authority designated or determined under those provisions).

Type of land shown on Map	Authority of the State
Zone RE1 Public Recreation and marked “Local open space”	Council
Zone RE1 Public Recreation and marked “Regional open space”	The corporation constituted under section 2.5 of the Act
Zone SP2 Infrastructure and marked “Classified road”	Transport for NSW
Zone E1 National Parks and Nature Reserves and marked “National Park”	Minister administering the National Parks and Wildlife Act 1974

- (3) Development on land acquired by an authority of the State under the owner-initiated acquisition provisions may, before it is used for the purpose for which it is reserved, be carried out, with development consent, for any purpose.

Note—

If land, other than land specified in the Table to subclause (2), is required to be acquired under the owner-initiated acquisition provisions, the Minister of Planning is required to take action to enable the designation of the acquiring authority under this Part. Pending the designation of the acquiring authority for that land, the acquiring authority is to be the authority determined by order of the Minister for Planning (see section 21 of the [Land Acquisition \(Just Terms Compensation\) Act 1991](#)).

5.2 Classification and reclassification of public land

- (1) The objective of this clause is to enable the Council to classify or reclassify public land as “operational land” or “community land” in accordance with Part 2 of Chapter 6 of the [Local Government Act 1993](#).

Note—

Under the [Local Government Act 1993](#), “public land” is generally land vested in or under the control of a council (other than roads and certain Crown land). The classification or reclassification of public land may also be made by a resolution of the Council under section 31, 32 or 33 of the [Local Government Act 1993](#). Section 30 of that Act enables this Plan to discharge trusts on which public reserves are held if the land is reclassified under this Plan as operational land.

- (2) The public land described in Part 1 or Part 2 of Schedule 4 is classified, or reclassified, as operational land for the purposes of the [Local Government Act 1993](#).
- (3) The public land described in Part 3 of Schedule 4 is classified, or reclassified, as community land for the purposes of the [Local Government Act 1993](#).
- (4) The public land described in Part 1 of Schedule 4—
 - (a) does not cease to be a public reserve to the extent (if any) that it is a public reserve, and
 - (b) continues to be affected by any trusts, estates, interests, dedications, conditions, restrictions or covenants that affected the land before its classification, or reclassification, as operational land.
- (5) The public land described in Part 2 of Schedule 4, to the extent (if any) that it is a public reserve, ceases to be a public reserve when the description of the land is inserted into that Part and is discharged from all trusts, estates, interests, dedications, conditions, restrictions and covenants affecting the land or any part of the land, except—
 - (a) those (if any) specified for the land in Column 3 of Part 2 of Schedule 4, and
 - (b) any reservations that except land out of the Crown grant relating to the land, and

- (c) reservations of minerals (within the meaning of the *Crown Land Management Act 2016*).

Note—

In accordance with section 30 (2) of the *Local Government Act 1993*, the approval of the Governor to subclause (5) applying to the public land concerned is required before the description of the land is inserted in Part 2 of Schedule 4.

5.3 Development near zone boundaries

- (1) The objective of this clause is to provide flexibility where the investigation of a site and its surroundings reveals that a use allowed on the other side of a zone boundary would enable a more logical and appropriate development of the site and be compatible with the planning objectives and land uses for the adjoining zone.
- (2) This clause applies to so much of any land that is within the relevant distance of a boundary between any 2 zones. The relevant distance is 20 metres.
- (3) This clause does not apply to—
 - (a) land in Zone RE1 Public Recreation, Zone E1 National Parks and Nature Reserves, Zone E2 Environmental Conservation, Zone E3 Environmental Management or Zone W1 Natural Waterways, or
 - (b) land within the coastal zone, or
 - (c) land proposed to be developed for the purpose of sex services or restricted premises.

Note—

When this Plan was made it did not include Zone E1 National Parks and Nature Reserves or Zone W1 Natural Waterways.

- (4) Despite the provisions of this Plan relating to the purposes for which development may be carried out, development consent may be granted to development of land to which this clause applies for any purpose that may be carried out in the adjoining zone, but only if the consent authority is satisfied that—
 - (a) the development is not inconsistent with the objectives for development in both zones, and
 - (b) the carrying out of the development is desirable due to compatible land use planning, infrastructure capacity and other planning principles relating to the efficient and timely development of land.
- (5) This clause does not prescribe a development standard that may be varied under this Plan.

5.4 Controls relating to miscellaneous permissible uses

- (1) **Bed and breakfast accommodation** If development for the purposes of bed and breakfast accommodation is permitted under this Plan, the accommodation that is provided to guests must consist of no more than 3 bedrooms.

Note—

Any such development that provides for a certain number of guests or rooms may involve a change in the class of building under the *Building Code of Australia*.

- (2) **Home businesses** If development for the purposes of a home business is permitted under this Plan, the carrying on of the business must not involve the use of more than 50 square metres of floor area.
- (3) **Home industries** If development for the purposes of a home industry is permitted under this Plan, the carrying on of the home industry must not involve the use of more than 50 square metres of floor area.
- (4) **Industrial retail outlets** If development for the purposes of an industrial retail outlet is permitted under this Plan, the retail floor area must not exceed—
- (a) 25% of the gross floor area of the industry or rural industry located on the same land as the retail outlet, or
 - (b) 400 square metres,
- whichever is the lesser.
- (5) **Farm stay accommodation** If development for the purposes of farm stay accommodation is permitted under this Plan, the accommodation that is provided to guests must consist of no more than 3 bedrooms.

- (8) **Roadside stalls** If development for the purposes of a roadside stall is permitted under this Plan, the gross floor area must not exceed 10 square metres.
- (9) **Secondary dwellings on land other than land in a rural zone** If development for the purposes of a secondary dwelling is permitted under this Plan on land other than land in a rural zone, the total floor area of the dwelling, excluding any area used for parking, must not exceed whichever of the following is the greater—

- (a) 60 square metres,
- (b) 25% of the total floor area of the principal dwelling.

(10) **Artisan food and drink industry exclusion** If development for the purposes of an artisan food and drink industry is permitted under this Plan in an industrial or rural zone, the floor area used for retail sales (not including any cafe or restaurant area) must not exceed—

- (a) 25% of the gross floor area of the industry, or
 - (b) 400 square metres,
- whichever is the lesser.

 - (b) converting a fire alarm system from connection with the alarm monitoring system of a private service provider to connection with the alarm monitoring system of another private service provider,
 - (c) converting a fire alarm system from connection with the alarm monitoring system of a private service provider to connection with a different alarm monitoring system of the same private service provider.
- (3) Development to which subclause (2) applies is complying development if it consists only of—
 - (a) internal alterations to a building, or

(b) internal alterations to a building together with the mounting of an antenna, and any support structure, on an external wall or roof of a building so as to occupy a space of not more than 450mm × 100mm × 100mm.

(4) A complying development certificate for any such complying development is subject to a condition that any building work may only be carried out between 7.00 am and 6.00 pm on Monday to Friday and between 7.00 am and 5.00 pm on Saturday, and must not be carried out on a Sunday or a public holiday.

(5) In this clause—

private service provider means a person or body that has entered into an agreement that is in force with Fire and Rescue NSW to monitor fire alarm systems.

5.9, 5.9AA (Repealed)

5.10 Heritage conservation

Note—

Heritage items (if any) are listed and described in Schedule 5. Heritage conservation areas (if any) are shown on the [Heritage Map](#) as well as being described in Schedule 5.

(1) **Objectives** The objectives of this clause are as follows—

- (a) to conserve the environmental heritage of Albury,
- (b) to conserve the heritage significance of heritage items and heritage conservation areas, including associated fabric, settings and views,

 - (i) a heritage item,
 - (ii) an Aboriginal object,

 - (ii) on which an Aboriginal object is located or that is within an Aboriginal place of heritage significance.
- (3) **When consent not required** However, development consent under this clause is not required if—
- (a) the applicant has notified the consent authority of the proposed development and the consent authority has advised the applicant in writing before any work is carried out that it is satisfied that the proposed development—
 - (i) is of a minor nature or is for the maintenance of the heritage item, Aboriginal object, Aboriginal place of heritage significance or archaeological site or a building, work, relic, tree or place within the heritage conservation area, and
 - (ii) would not adversely affect the heritage significance of the heritage item, Aboriginal object, Aboriginal place, archaeological site or heritage conservation area, or
 - (b) the development is in a cemetery or burial ground and the proposed development—
 - (i) is the creation of a new grave or monument, or excavation or disturbance of land for the purpose of conserving or repairing monuments or grave markers, and
 - (ii) would not cause disturbance to human remains, relics, Aboriginal objects in the form of grave goods, or to an Aboriginal place of heritage significance, or
 - (c) the development is limited to the removal of a tree or other vegetation that the Council is satisfied is a risk to human life or property, or

(d) the development is exempt development.

- (4) **Effect of proposed development on heritage significance** The consent authority must, before granting consent under this clause in respect of a heritage item or heritage conservation area, consider the effect of the proposed development on the heritage significance of the item or area concerned. This subclause applies regardless of whether a heritage management document is prepared under subclause (5) or a heritage conservation management plan is submitted under subclause (6).
- (5) **Heritage assessment** The consent authority may, before granting consent to any development—
- (a) on land on which a heritage item is located, or
 - (b) on land that is within a heritage conservation area, or
 - (c) on land that is within the vicinity of land referred to in paragraph (a) or (b),
- require a heritage management document to be prepared that assesses the extent to which the carrying out of the proposed development would affect the heritage significance of the heritage item or heritage conservation area concerned.
- (6) **Heritage conservation management plans** The consent authority may require, after considering the heritage significance of a heritage item and the extent of change proposed to it, the submission of a heritage conservation management plan before granting consent under this clause.
- (7) **Archaeological sites** The consent authority must, before granting consent under this clause to the carrying out of development on an archaeological site (other than land listed on the State Heritage Register or to which an interim heritage order under the [Heritage Act 1977](#) applies)—
- (a) notify the Heritage Council of its intention to grant consent, and
 - (b) take into consideration any response received from the Heritage Council within 28 days after the notice is sent.

received within 28 days after the notice is sent.

- (9) **Demolition of nominated State heritage items** The consent authority must, before granting consent under this clause for the demolition of a nominated State heritage item—
- (a) notify the Heritage Council about the application, and
 - (b) take into consideration any response received from the Heritage Council within 28 days after the notice is sent.
- (10) **Conservation incentives** The consent authority may grant consent to development for any purpose of a building that is a heritage item or of the land on which such a building is erected, or for any purpose on an Aboriginal place of heritage significance, even though development for that purpose would otherwise not be allowed by this Plan, if the consent authority is satisfied that—
- (a) the conservation of the heritage item or Aboriginal place of heritage significance is facilitated by the granting of consent, and
 - (b) the proposed development is in accordance with a heritage management document that has been approved by the consent authority, and
 - (c) the consent to the proposed development would require that all necessary conservation work identified in the heritage management document is carried out, and
 - (d) the proposed development would not adversely affect the heritage significance of the heritage item, including its setting, or the heritage significance of the Aboriginal place of heritage significance, and
 - (e) the proposed development would not have any significant adverse effect on the amenity of the surrounding area.

5.11 Bush fire hazard reduction

Bush fire hazard reduction work authorised by the *Rural Fires Act 1997* may be carried out on any land without development consent.

Note—

The *Rural Fires Act 1997* also makes provision relating to the carrying out of development on bush fire prone land.

5.12 Infrastructure development and use of existing buildings of the Crown

- (1) This Plan does not restrict or prohibit, or enable the restriction or prohibition of, the carrying out of any development, by or on behalf of a public authority, that is permitted to be carried out with or without development consent, or that is exempt development, under *State Environmental Planning Policy (Infrastructure) 2007*.

- (2) This Plan does not restrict or prohibit, or enable the restriction or prohibition of, the use of existing buildings of the Crown by the Crown.

 - (c) whether or not the development is likely to be incompatible with a use referred to in paragraph (a) or (b),
 - (d) any measures proposed by the applicant to avoid or minimise any incompatibility referred to in paragraph (c).

5.17 Artificial waterbodies in environmentally sensitive areas in areas of operation of irrigation corporations

[Not applicable]

5.18 Intensive livestock agriculture

- (1) The objectives of this clause are—
- (a) to ensure appropriate environmental assessment of development for the purpose of intensive livestock agriculture that is permitted with consent under this Plan, and
 - (b) to provide for certain capacity thresholds below which development consent is not required for that development subject to certain restrictions as to location.
- (2) This clause applies if development for the purpose of intensive livestock agriculture is permitted with consent under this Plan.
- (3) In determining whether or not to grant development consent under this Plan to development for the purpose of intensive livestock agriculture, the consent authority must take the following into consideration—
