Lismore Local Environmental Plan 2012 (2013 EPI 66)

New South Wales

Part 1 Preliminary

1.1 Name of Plan

This Plan is *Lismore Local Environmental Plan 2012*.

1.1AA Commencement

This Plan commences on the day on which it is published on the NSW legislation website.

1.2 Aims of Plan

- (1) This Plan aims to make local environmental planning provisions for land in Lismore in accordance with the relevant standard environmental planning instrument under section 3.20 of the Act.
- (2) The particular aims of this Plan are as follows—
 - (aa) to protect and promote the use and development of land for arts and cultural activity, including music and other performance arts,
 - (a) to give effect to the desired outcomes, strategic principles, policies and actions contained in the Council's adopted strategic planning documents,
 - (b) to stimulate and strengthen the role of Lismore as a regional centre for agriculture, business, education, health, recreation, tourism and the arts,
 - (c) to encourage a diverse range of housing, and the equitable and appropriate provision of services,
 - (d) to conserve the heritage of Lismore through the integration of heritage conservation into the planning and development control process,
 - (e) to protect, sustain and enhance Lismore's natural environment, particularly native fauna and flora,
 - (f) to minimise the adverse effects of natural hazards, particularly flooding, bush fire

and land instability,

- (g) to ensure that development is consistent with the principles of ecologically sustainable development.

1.3 Land to which Plan applies

(1) This Plan applies to the land identified on the [Land Application Map](#).

(1A) Despite subclause (1), this Plan does not apply to the land identified as “Deferred matter” on the [Land Application Map](#).

1.4 Definitions

The Dictionary at the end of this Plan defines words and expressions for the purposes of this Plan.

1.5 Notes

Notes in this Plan are provided for guidance and do not form part of this Plan.

1.6 Consent authority

The consent authority for the purposes of this Plan is (subject to the Act) the Council.

1.7 Maps

(1) A reference in this Plan to a named map adopted by this Plan is a reference to a map by that name—

- (a) approved by the local plan-making authority when the map is adopted, and
- (b) as amended or replaced from time to time by maps declared by environmental planning instruments to amend or replace that map, and approved by the local plan-making authority when the instruments are made.

(1AA) (Repealed)

(2) Any 2 or more named maps may be combined into a single map. In that case, a reference in this Plan to any such named map is a reference to the relevant part or aspect of the single map.

(3) Any such maps are to be kept and made available for public access in accordance with arrangements approved by the Minister.

(4) For the purposes of this Plan, a map may be in, and may be kept and made available in, electronic or paper form, or both.

Note—

The maps adopted by this Plan are to be made available on the NSW Planning Portal. Requirements relating to

the maps are set out in the documents entitled *Standard technical requirements for LEP maps* and *Standard requirements for LEP GIS data* which are available on the website of the Department of Planning and Environment.

1.8 Repeal of planning instruments applying to land

- (1) All local environmental plans and deemed environmental planning instruments applying only to the land to which this Plan applies are repealed.
- (2) All local environmental plans and deemed environmental planning instruments applying to the land to which this Plan applies and to other land cease to apply to the land to which this Plan applies.

Note—

While *Lismore Local Environmental Plan 2000* no longer applies to the land to which this Plan applies, it will continue to apply to the land identified as “Deferred matter” under clause 1.3(1A).

1.8A Savings provision relating to development applications

If a development application has been made before the commencement of this Plan in relation to land to which this Plan applies and the application has not been finally determined before that commencement, the application must be determined as if this Plan had not commenced.

Note—

However, under Division 3.5 of the Act, a development application may be made for consent to carry out development that may only be carried out if the environmental planning instrument applying to the relevant development is appropriately amended or if a new instrument, including an appropriate principal environmental planning instrument, is made, and the consent authority may consider the application. The Division requires public notice of the development application and the draft environmental planning instrument allowing the development at the same time, or as closely together as is practicable.

1.9 Application of SEPPs

- (1) This Plan is subject to the provisions of any State environmental planning policy that prevails over this Plan as provided by section 3.28 of the Act.
- (2) The following State environmental planning policies (or provisions) do not apply to the land to which this Plan applies—

State Environmental Planning Policy No 1—Development Standards

1.9A Suspension of covenants, agreements and instruments

- (1) For the purpose of enabling development on land in any zone to be carried out in accordance with this Plan or with a consent granted under the Act, any agreement, covenant or other similar instrument that restricts the carrying out of that development does not apply to the extent necessary to serve that purpose.
- (2) This clause does not apply—

- (a) to a covenant imposed by the Council or that the Council requires to be imposed, or
 - (b) to any relevant instrument within the meaning of section 13.4 of the *Crown Land Management Act 2016*, or
 - (c) to any conservation agreement within the meaning of the *National Parks and Wildlife Act 1974*, or
 - (d) to any Trust agreement within the meaning of the *Nature Conservation Trust Act 2001*, or
 - (e) to any property vegetation plan within the meaning of the *Native Vegetation Act 2003*, or
 - (f) to any biobanking agreement within the meaning of Part 7A of the *Threatened Species Conservation Act 1995*, or
 - (g) to any planning agreement within the meaning of Subdivision 2 of Division 7.1 of the Act.
- (3) This clause does not affect the rights or interests of any public authority under any registered instrument.
- (4) Under section 3.16 of the Act, the Governor, before the making of this clause, approved of subclauses (1)–(3).

W2 Recreational Waterways

2.2 Zoning of land to which Plan applies

For the purposes of this Plan, land is within the zones shown on the [Land Zoning Map](#).

2.3 Zone objectives and Land Use Table

- (1) The Land Use Table at the end of this Part specifies for each zone—
 - (a) the objectives for development, and

- (b) development that may be carried out without development consent, and
 - (c) development that may be carried out only with development consent, and
 - (d) development that is prohibited.
- (2) The consent authority must have regard to the objectives for development in a zone when determining a development application in respect of land within the zone.
- (3) In the Land Use Table at the end of this Part—
- (a) a reference to a type of building or other thing is a reference to development for the purposes of that type of building or other thing, and
 - (b) a reference to a type of building or other thing does not include (despite any definition in this Plan) a reference to a type of building or other thing referred to separately in the Land Use Table in relation to the same zone.
- (4) This clause is subject to the other provisions of this Plan.

Notes—

- 1** Schedule 1 sets out additional permitted uses for particular land.
- 2** Schedule 2 sets out exempt development (which is generally exempt from both Parts 4 and 5 of the Act). Development in the land use table that may be carried out without consent is nevertheless subject to the environmental assessment and approval requirements of Part 5 of the Act.
- 3** Schedule 3 sets out complying development (for which a complying development certificate may be issued as an alternative to obtaining development consent).
- 4** Clause 2.6 requires consent for subdivision of land.
- 5** Part 5 contains other provisions which require consent for particular development.

2.4 Unzoned land

- (1) Development may be carried out on unzoned land only with development consent.
- (2) In deciding whether to grant development consent, the consent authority—
- (a) must consider whether the development will impact on adjoining zoned land and, if so, consider the objectives for development in the zones of the adjoining land, and
 - (b) must be satisfied that the development is appropriate and is compatible with permissible land uses in any such adjoining land.

2.5 Additional permitted uses for particular land

- (1) Development on particular land that is described or referred to in Schedule 1 may be carried out—
- (a) with development consent, or
 - (b) if the Schedule so provides—without development consent,

in accordance with the conditions (if any) specified in that Schedule in relation to that development.

- (2) This clause has effect despite anything to the contrary in the Land Use Table or other provision of this Plan.

2.6 Subdivision—consent requirements

- (1) Land to which this Plan applies may be subdivided, but only with development consent.

Notes—

1 If a subdivision is specified as **exempt development** in an applicable environmental planning instrument, such as this Plan or *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008*, the Act enables it to be carried out without development consent.

2 Part 6 of *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008* provides that the strata subdivision of a building in certain circumstances is **complying development**.

- (2) Development consent must not be granted for the subdivision of land on which a secondary dwelling is situated if the subdivision would result in the principal dwelling and the secondary dwelling being situated on separate lots, unless the resulting lots are not less than the minimum size shown on the [Lot Size Map](#) in relation to that land.

Note—

The definition of **secondary dwelling** in the Dictionary requires the dwelling to be on the same lot of land as the principal dwelling.

2.7 Demolition requires development consent

The demolition of a building or work may be carried out only with development consent.

Note—

If the demolition of a building or work is identified in an applicable environmental planning instrument, such as this Plan or *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008*, as exempt development, the Act enables it to be carried out without development consent.

2.8 Temporary use of land

- (1) The objective of this clause is to provide for the temporary use of land if the use does not compromise future development of the land, or have detrimental economic, social, amenity or environmental effects on the land.
- (2) Despite any other provision of this Plan, development consent may be granted for development on land in any zone for a temporary use for a maximum period of 30 days (whether or not consecutive days) in any period of 12 months.
- (3) Development consent must not be granted unless the consent authority is satisfied that—
- (a) the temporary use will not prejudice the subsequent carrying out of development on the land in accordance with this Plan and any other applicable environmental

planning instrument, and

- (b) the temporary use will not adversely impact on any adjoining land or the amenity of the neighbourhood, and
 - (c) the temporary use and location of any structures related to the use will not adversely impact on environmental attributes or features of the land, or increase the risk of natural hazards that may affect the land, and
 - (d) at the end of the temporary use period the land will, as far as is practicable, be restored to the condition in which it was before the commencement of the use.
- (4) Despite subclause (2), the temporary use of a dwelling as a sales office for a new release area or a new housing estate may exceed the maximum number of days specified in that subclause.
- (5) Subclause (3)(d) does not apply to the temporary use of a dwelling as a sales office mentioned in subclause (4).

Land Use Table

Note—

A type of development referred to in the Land Use Table is a reference to that type of development only to the extent it is not regulated by an applicable State environmental planning policy. The following State environmental planning policies in particular may be relevant to development on land to which this Plan applies—

 - (a) to provide a minimum lot size for the subdivision of land,
 - (b) to ensure that lot sizes have a practical and efficient layout to meet the intended use of each lot.
- (2) This clause applies to a subdivision of any land shown on the [Lot Size Map](#) that requires development consent and that is carried out after the commencement of this Plan.
- (3) The size of any lot resulting from a subdivision of land to which this clause applies is not to be less than the minimum size shown on the [Lot Size Map](#) in relation to that land.
- (4) This clause does not apply in relation to the subdivision of any land—
 - (a) by the registration of a strata plan or strata plan of subdivision under the *Strata Schemes Development Act 2015*, or
 - (b) by any kind of subdivision under the *Community Land Development Act 2021*.

4.1AA Minimum subdivision lot size for community title schemes

- (1) The objectives of this clause are as follows—
 - (a) to ensure that land to which this clause applies is not fragmented by subdivisions that would create additional dwelling entitlements.

 - (a) Zone RU1 Primary Production,
 - (b) Zone RU2 Rural Landscape,

- (4) However, such a lot cannot be created if an existing dwelling would, as the result of the subdivision, be situated on the lot.
- (5) A dwelling cannot be erected on such a lot.

Note—

A dwelling includes a rural worker's dwelling (see definition of that term in the Dictionary).

4.2A Minimum subdivision lot size for strata plan schemes in certain rural and environment protection zones

be used, for residential accommodation—

- (a) Zone RU1 Primary Production,
- (b) Zone RU2 Rural Landscape,
- (c) Zone E3 Environmental Management.

- (3) Development consent must not be granted for the erection of a dual occupancy or a dwelling house on land to which this clause applies, and on which no dual occupancy or dwelling house has been erected, unless the land—

- (a) is a lot that is at least the minimum lot size shown on the [Lot Size Map](#) in relation to that land, or
- (b) is a lot created under this Plan (other than under clause 4.2(3) or 4.2E(3)(a)(i)), or
- (c) is a lot created under an environmental planning instrument before this Plan commenced and on which the erection of a dual occupancy or dwelling house was permissible immediately before that commencement, or
- (d) is a lot resulting from a subdivision for which development consent (or equivalent)

was granted before this Plan commenced and on which the erection of a dual occupancy or dwelling house would have been permissible if the plan of subdivision had been registered before that commencement, or

- (e) would have been a lot referred to in paragraph (a), (b), (c) or (d) had it not been affected by—
 - (i) a realignment of its boundaries that did not create an additional lot, or
 - (ii) a subdivision creating or widening a public road or public reserve or for another public purpose, or
 - (iii) a consolidation with an adjoining public road or public reserve or for another public purpose.

Note—

A dwelling cannot be erected on a lot created under clause 9 of *State Environmental Planning Policy (Rural Lands) 2008* or clause 4.2.

- (3A) Development consent must not be granted for the erection of a dual occupancy on a lot resulting from the subdivision of land to which this clause applies by a strata plan scheme or by a subdivision that requires development consent under the *Community Land Development Act 1989* unless—
 - (a) there is a lawfully erected dual occupancy on the land, and
 - (b) the dual occupancy to be erected is intended only to replace the existing dual occupancy.

- (c) each dwelling will be situated within 100 metres of each other, and
- (d) the land is physically suitable for the development, and
- (e) the land is capable of accommodating the on-site disposal and management of sewage for the development, and

- (3) Despite clause 4.1, development consent may be granted to subdivide land by way of a boundary adjustment between adjoining lots where one or more resultant lots do not meet the minimum lot size shown on the [Lot Size Map](#) in relation to that land if the consent authority is satisfied that—
 - (a) the subdivision will not create additional lots or the opportunity for additional dwellings, and
 - (b) the number of dwellings or opportunities for dwellings on each lot after the subdivision will be the same as before the subdivision, and
 - (c) the potential for land use conflict will not be increased as a result of the subdivision, and

(e) if the land is in Zone RU1 Primary Production or Zone RU2 Rural Landscape, the agricultural viability of the land will not be adversely affected as a result of the subdivision.

(4) Before granting consent to development to which this clause applies, the consent authority must be satisfied that the subdivision will not compromise the continued protection and long-term maintenance of any land in Zone E2 Environmental Conservation or Zone E3 Environmental Management.

4.2E Exceptions to minimum subdivision lot sizes for certain split zones

(b) land in Zone RU1 Primary Production, Zone E2 Environmental Conservation or Zone E3 Environmental Management.

(3) Despite clause 4.1, development consent may be granted to subdivide an original lot to create other lots (the **resulting lots**) if—

(a) one of the resulting lots will contain either—

(i) only the land in Zone RU1 Primary Production, Zone E2 Environmental Conservation or Zone E3 Environmental Management that was in the original lot, or

(ii) land in a residential, business, industrial or recreation zone, or Zone RU5 Village or Zone SP2 Infrastructure, that has an area that is not less than the minimum size shown on the [Lot Size Map](#) in relation to that land as well as all of the land in Zone RU1 Primary Production, Zone E2 Environmental Conservation or Zone E3 Environmental Management that was in the original lot, and

(b) all other resulting lots will contain land that has an area that is not less than the minimum size shown on the [Lot Size Map](#) in relation to that land.

(4) A dwelling cannot be erected on a lot created under subclause (3)(a)(i).

4.3 Height of buildings

- (1) The objectives of this clause are as follows—
 - (a) to establish a maximum height for buildings,
 - (b) to provide for taller buildings in the city centre and to enable a transition in building height in response to varying urban character and function,
 - (c) to protect the amenity of neighbouring properties and public places, with particular regard to visual bulk, scale, overshadowing, privacy and views.
- (2) The height of a building on any land is not to exceed the maximum height shown for the land on the [Height of Buildings Map](#).

4.4 Floor space ratio

- (1) The objectives of this clause are as follows—
 - (a) to establish the maximum site density for new development,
 - (b) to ensure that the scale and bulk of development does not have an unacceptable or adverse impact on streetscape and the character of the area in which the development is located.
- (2) The maximum floor space ratio for a building on any land is not to exceed the floor space ratio shown for the land on the [Floor Space Ratio Map](#).

4.5 Calculation of floor space ratio and site area

- (1) **Objectives** The objectives of this clause are as follows—
 - (a) to define **floor space ratio**,
 - (b) to set out rules for the calculation of the site area of development for the purpose of applying permitted floor space ratios, including rules to—
 - (i) prevent the inclusion in the site area of an area that has no significant development being carried out on it, and
 - (ii) prevent the inclusion in the site area of an area that has already been included as part of a site area to maximise floor space area in another building, and
 - (iii) require community land and public places to be dealt with separately.
- (2) **Definition of “floor space ratio”** The **floor space ratio** of buildings on a site is the ratio of the gross floor area of all buildings within the site to the site area.
- (3) **Site area** In determining the site area of proposed development for the purpose of applying a floor space ratio, the **site area** is taken to be—

- (a) if the proposed development is to be carried out on only one lot, the area of that lot, or
- (b) if the proposed development is to be carried out on 2 or more lots, the area of any lot on which the development is proposed to be carried out that has at least one common boundary with another lot on which the development is being carried out.

In addition, subclauses (4)–(7) apply to the calculation of site area for the purposes of applying a floor space ratio to proposed development.

- (4) **Exclusions from site area** The following land must be excluded from the site area—
 - (a) land on which the proposed development is prohibited, whether under this Plan or any other law,
 - (b) community land or a public place (except as provided by subclause (7)).
- (5) **Strata subdivisions** The area of a lot that is wholly or partly on top of another or others in a strata subdivision is to be included in the calculation of the site area only to the extent that it does not overlap with another lot already included in the site area calculation.
- (6) **Only significant development to be included** The site area for proposed development must not include a lot additional to a lot or lots on which the development is being carried out unless the proposed development includes significant development on that additional lot.
- (7) **Certain public land to be separately considered** For the purpose of applying a floor space ratio to any proposed development on, above or below community land or a public place, the site area must only include an area that is on, above or below that community land or public place, and is occupied or physically affected by the proposed development, and may not include any other area on which the proposed development is to be carried out.
- (8) **Existing buildings** The gross floor area of any existing or proposed buildings within the vertical projection (above or below ground) of the boundaries of a site is to be included in the calculation of the total floor space for the purposes of applying a floor space ratio, whether or not the proposed development relates to all of the buildings.
- (9) **Covenants to prevent “double dipping”** When development consent is granted to development on a site comprised of 2 or more lots, a condition of the consent may require a covenant to be registered that prevents the creation of floor area on a lot (the restricted lot) if the consent authority is satisfied that an equivalent quantity of floor area will be created on another lot only because the site included the restricted lot.
- (10) **Covenants affect consolidated sites** If—

(a) a covenant of the kind referred to in subclause (9) applies to any land (**affected land**), and

(b) proposed development relates to the affected land and other land that together comprise the site of the proposed development,

the maximum amount of floor area allowed on the other land by the floor space ratio fixed for the site by this Plan is reduced by the quantity of floor space area the covenant prevents being created on the affected land.

(11) **Definition** In this clause, **public place** has the same meaning as it has in the [Local Government Act 1993](#).

4.6 Exceptions to development standards

(1) The objectives of this clause are as follows—

(a) to provide an appropriate degree of flexibility in applying certain development standards to particular development,

(b) to achieve better outcomes for and from development by allowing flexibility in particular circumstances.

(2) Development consent may, subject to this clause, be granted for development even though the development would contravene a development standard imposed by this or any other environmental planning instrument. However, this clause does not apply to a development standard that is expressly excluded from the operation of this clause.

(3) Development consent must not be granted for development that contravenes a development standard unless the consent authority has considered a written request from the applicant that seeks to justify the contravention of the development standard by demonstrating—

(a) that compliance with the development standard is unreasonable or unnecessary in the circumstances of the case, and

(b) that there are sufficient environmental planning grounds to justify contravening the development standard.

(4) Development consent must not be granted for development that contravenes a development standard unless—

(a) the consent authority is satisfied that—

(i) the applicant's written request has adequately addressed the matters required to be demonstrated by subclause (3), and

(ii) the proposed development will be in the public interest because it is

consistent with the objectives of the particular standard and the objectives for development within the zone in which the development is proposed to be carried out, and

- (b) the concurrence of the Planning Secretary has been obtained.
- (5) In deciding whether to grant concurrence, the Planning Secretary must consider—
- (a) whether contravention of the development standard raises any matter of significance for State or regional environmental planning, and
 - (b) the public benefit of maintaining the development standard, and
 - (c) any other matters required to be taken into consideration by the Planning Secretary before granting concurrence.
- (6) Development consent must not be granted under this clause for a subdivision of land in Zone RU1 Primary Production, Zone RU2 Rural Landscape, Zone RU3 Forestry, Zone RU4 Primary Production Small Lots, Zone RU6 Transition, Zone R5 Large Lot Residential, Zone C2 Environmental Conservation, Zone C3 Environmental Management or Zone C4 Environmental Living if—
- (a) the subdivision will result in 2 or more lots of less than the minimum area specified for such lots by a development standard, or
 - (b) the subdivision will result in at least one lot that is less than 90% of the minimum area specified for such a lot by a development standard.
- (7) After determining a development application made pursuant to this clause, the consent authority must keep a record of its assessment of the factors required to be addressed in the applicant's written request referred to in subclause (3).
- (8) This clause does not allow development consent to be granted for development that would contravene any of the following—
- (a) a development standard for complying development,
 - (b) a development standard that arises, under the regulations under the Act, in connection with a commitment set out in a BASIX certificate for a building to which [State Environmental Planning Policy \(Building Sustainability Index: BASIX\) 2004](#) applies or for the land on which such a building is situated,
 - (c) clause 5.4,
 - (caa) clause 5.5.

Part 5 Miscellaneous provisions

5.1 Relevant acquisition authority

- (1) The objective of this clause is to identify, for the purposes of section 3.15 of the Act, the authority of the State that will be the relevant authority to acquire land reserved for certain public purposes if the land is required to be acquired under Division 3 of Part 2 of the *Land Acquisition (Just Terms Compensation) Act 1991* (**the owner-initiated acquisition provisions**).

Note—

If the landholder will suffer hardship if there is any delay in the land being acquired by the relevant authority, section 23 of the *Land Acquisition (Just Terms Compensation) Act 1991* requires the authority to acquire the land.

- (2) The authority of the State that will be the relevant authority to acquire land, if the land is required to be acquired under the owner-initiated acquisition provisions, is the authority of the State specified below in relation to the land shown on the [Land Reservation Acquisition Map](#) (or, if an authority of the State is not specified in relation to land required to be so acquired, the authority designated or determined under those provisions).

Type of land shown on Map	Authority of the State
Zone RE1 Public Recreation and marked "Local open space"	Council
Zone RE1 Public Recreation and marked "Regional open space"	The corporation constituted under section 2.5 of the Act
Zone SP2 Infrastructure and marked "Classified road"	Transport for NSW
Zone C1 National Parks and Nature Reserves and marked "National Park"	Minister administering the <i>National Parks and Wildlife Act 1974</i>
Zone RU1 Primary Production and marked "Arterial road"	Council
Zone RU1 Primary Production and marked "Proposed Dunoon Dam Inundation Area"	Rous County Council
Zone W1 Natural Waterways and marked "Proposed Dunoon Dam Inundation Area"	Rous County Council
Zone R1 General Residential and marked "Arterial road"	Council

- (3) Development on land acquired by an authority of the State under the owner-initiated acquisition provisions may, before it is used for the purpose for which it is reserved, be

carried out, with development consent, for any purpose.

5.2 Classification and reclassification of public land

- (1) The objective of this clause is to enable the Council to classify or reclassify public land as “operational land” or “community land” in accordance with Part 2 of Chapter 6 of the *Local Government Act 1993*.

Note—

Under the *Local Government Act 1993*, “public land” is generally land vested in or under the control of a council (other than roads and certain Crown land). The classification or reclassification of public land may also be made by a resolution of the Council under section 31, 32 or 33 of the *Local Government Act 1993*. Section 30 of that Act enables this Plan to discharge trusts on which public reserves are held if the land is reclassified under this Plan as operational land.

- (2) The public land described in Part 1 or Part 2 of Schedule 4 is classified, or reclassified, as operational land for the purposes of the *Local Government Act 1993*.
- (3) The public land described in Part 3 of Schedule 4 is classified, or reclassified, as community land for the purposes of the *Local Government Act 1993*.
- (4) The public land described in Part 1 of Schedule 4—
 - (a) does not cease to be a public reserve to the extent (if any) that it is a public reserve, and
 - (b) continues to be affected by any trusts, estates, interests, dedications, conditions, restrictions or covenants that affected the land before its classification, or reclassification, as operational land.
- (5) The public land described in Part 2 of Schedule 4, to the extent (if any) that it is a public reserve, ceases to be a public reserve when the description of the land is inserted into that Part and is discharged from all trusts, estates, interests, dedications, conditions, restrictions and covenants affecting the land or any part of the land, except—
 - (a) those (if any) specified for the land in Column 3 of Part 2 of Schedule 4, and
 - (b) any reservations that except land out of the Crown grant relating to the land, and
 - (c) reservations of minerals (within the meaning of the *Crown Land Management Act 2016*).

Note—

In accordance with section 30(2) of the *Local Government Act 1993*, the approval of the Governor to subclause (5) applying to the public land concerned is required before the description of the land is inserted in Part 2 of Schedule 4.

5.3 Development near zone boundaries

- (1) The objective of this clause is to provide flexibility where the investigation of a site and its surroundings reveals that a use allowed on the other side of a zone boundary would enable a more logical and appropriate development of the site and be compatible with the planning objectives and land uses for the adjoining zone.
- (2) This clause applies to so much of any land that is within the relevant distance of a boundary between any 2 zones. The relevant distance is 50 metres.
- (3) This clause does not apply to—
 - (a) land in Zone RE1 Public Recreation, Zone C1 National Parks and Nature Reserves, Zone C2 Environmental Conservation, Zone C3 Environmental Management or Zone W1 Natural Waterways, or
 - (b) land within the coastal zone, or
 - (c) land proposed to be developed for the purpose of sex services or restricted premises.
- (4) Despite the provisions of this Plan relating to the purposes for which development may be carried out, development consent may be granted to development of land to which this clause applies for any purpose that may be carried out in the adjoining zone, but only if the consent authority is satisfied that—
 - (a) the development is not inconsistent with the objectives for development in both zones, and
 - (b) the carrying out of the development is desirable due to compatible land use planning, infrastructure capacity and other planning principles relating to the efficient and timely development of land.
- (5) This clause does not prescribe a development standard that may be varied under this Plan.

5.4 Controls relating to miscellaneous permissible uses

- (1) **Bed and breakfast accommodation** If development for the purposes of bed and breakfast accommodation is permitted under this Plan, the accommodation that is provided to guests must consist of no more than 5 bedrooms.

Note—

Any such development that provides for a certain number of guests or rooms may involve a change in the class of building under the *Building Code of Australia*.

- (2) **Home businesses** If development for the purposes of a home business is permitted under this Plan, the carrying on of the business must not involve the use of more than 50 square metres of floor area.

- (a) 60 square metres,
 - (b) 25% of the total floor area of the principal dwelling.
- (10) **Artisan food and drink industry exclusion** If development for the purposes of an artisan food and drink industry is permitted under this Plan in Zone E3 Productivity Support, Zone E4 General Industrial, Zone E5 Heavy Industrial, Zone W4 Working Waterfront or an industrial or rural zone, the floor area used for retail sales (not including any cafe or restaurant area) must not exceed—
- (a) 30% of the gross floor area of the industry, or

5.5 Controls relating to secondary dwellings on land in a rural zone

[Not adopted]

5.6 Architectural roof features

- (1) The objectives of this clause are as follows—
 - (a) to allow variation in building height to provide for decorative roof elements,
 - (b) to ensure the majority of roof features are contained within the prescribed building height and form an integral part of the building.
- (2) Development that includes an architectural roof feature that exceeds, or causes a building to exceed, the height limits set by clause 4.3 may be carried out, but only with development consent.
- (3) Development consent must not be granted to any such development unless the consent authority is satisfied that—
 - (a) the architectural roof feature—

 - (ii) is not an advertising structure, and
 - (iii) does not include floor space area and is not reasonably capable of modification to include floor space area, and
 - (iv) will cause minimal overshadowing, and
 - (b) any building identification signage or equipment for servicing the building (such as plant, lift motor rooms, fire stairs and the like) contained in or supported by the roof feature is fully integrated into the design of the roof feature.

5.7 Development below mean high water mark

- (1) The objective of this clause is to ensure appropriate environmental assessment for development carried out on land covered by tidal waters.
- (2) Development consent is required to carry out development on any land below the mean high water mark of any body of water subject to tidal influence (including the bed of any such water).

5.8 Conversion of fire alarms

- (1) This clause applies to a fire alarm system that can be monitored by Fire and Rescue NSW or by a private service provider.
