2 Aims, objectives etc

(1) The aims of this plan are—

- (a) to provide guidelines in accordance with the objects of the Act for orderly and timely development and management of land use in the City,
- (b) to enhance individual and community well-being and welfare by following a path of economic development that does not impair the welfare of future generations, and
- (c) to work towards an ecologically sustainable future through the proper management, development, protection, restoration, enhancement and conservation of the environment of the City.

(2) The objectives of this plan are—

- (aa) to protect and promote the use and development of land for arts and cultural activity, including music and other performance arts,

- (b) to ensure space is provided for community services and facilities as well as recreational activities,

- (c) to enable a variety of commercial uses while consolidating existing commercial centres,
- (d) to enable accommodation of industrial uses,
- (e) to ensure that the council gives due regard to the effect of natural hazards upon development,
- (f) to ensure that development and expansion of coastal villages are sympathetic to the coastal environment,
- (g) to maintain the agricultural use of prime crop and pasture land by minimising development which has an adverse and irreversible impact on the land's agricultural potential,
- (h) to protect heritage items,
- (i) to provide a safe and efficient transport network connecting land use activities inside and outside the City,
- (j) to encourage the provision of adequate community facilities and services,

(3) The strategies by which the aims referred to in subclause (1) and the objectives referred to in subclause (2) are to be achieved are by—

- (a) identifying land use zones on the map, objectives for each zone, the type of land uses appropriate for each zone and whether consent of the Council for appropriate land uses is required (Part 2),
- (b) establishing conditions under which subdivision, dwelling-houses and other types of development may be carried out in specific zones (Part 3, Divisions 1, 2, 3 and 4),

- (1) The owner of any land within Zone No 5 (d) may, by notice in writing, require the Roads and Traffic Authority (**the RTA**) to acquire the land.
- (2) On receipt of such a notice, the RTA must acquire the land if—
 - (a) the land is vacant, or
 - (b) the land is not vacant, but—

(i) the land is included in the five-year works program of the RTA current at the time of the receipt of the notice, or

(ii) (Repealed)

(iii) the RTA is of the opinion that the owner of the land will suffer hardship if the land is not acquired within a reasonable time,

but the RTA is not required to acquire the land if it might reasonably be required to be dedicated for a public road.

(3) A person may, with the consent of the Council, carry out development on land within Zone No 5 (d)—

(a) for the purpose for which development may be carried out on land in an adjoining zone, or

(b) for any other purpose which is compatible with development which may be carried out on land in an adjoining zone.

- (b) the community event includes the use of air space by fireworks, aeroplanes, helicopters, hot air balloons, skydivers or the like, or
- (c) the community event includes or comprises a market or auction, or
- (d) the public reserve or other public land will be occupied for longer than 48 hours, including the set up and removal of any temporary structures or equipment, or
- (e) the community event is likely to cause interference with the amenity of neighbouring properties because of the emission of noise, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit, oil or otherwise.

52 Roads

- (1) Except as provided by subclause (2), nothing in this plan restricts or prohibits a public authority from carrying out development required in connection with the construction, reconstruction, improvement, maintenance or repair of a road within an existing road reserve.
- (2) Subclause (1) does not apply to any widening, realignment or relocation of an existing physically constructed road which involves works which may have a significant environmental impact.

- (2) The Council must not consent to subdivision of land to which this clause applies for residential purposes if the Council is satisfied that the subdivision would result in more dwellings being situated on that land than were on that land on 18 April 1997 (the day on which *City of Shoalhaven Local Environmental Plan 1985 (Amendment No 126)* commenced).
- (3) The Council must not consent to development for residential purposes on land to which this clause applies unless it has taken into consideration an assessment of the effect on the proposed development of noise from aircraft using RANAS Nowra.

 - (a) to provide an appropriate degree of flexibility in applying certain development standards to particular development,
 - (b) to achieve better outcomes for and from development by allowing flexibility in particular circumstances.

- (a) the subdivision will result in 2 or more lots of less than the minimum area specified for such lots by a development standard, or
- (b) the subdivision will result in at least one lot that is less than 90% of the minimum area specified for such a lot by a development standard.

(7) (Repealed)

(8) This clause does not allow development consent to be granted for development that would contravene any of the following—

- (a) a development standard for complying development,
- (b) a development standard that arises, under the regulations under the Act, in connection with a commitment set out in a BASIX certificate for a building to which [State Environmental Planning Policy \(Building Sustainability Index: BASIX\) 2004](#) applies or for the land on which such a building is situated.

- (a) to protect beach systems and conserve their scenic, recreation and natural values,
- (b) to maintain and improve public access to waterways, lakes and the sea front, and
- (c) to protect the productive ecosystems and natural habitats of the region's estuaries, wetlands, lakes and lagoons and their scenic attributes.

18 Development generally

In deciding whether to grant consent to a development application to carry out development on land adjacent to, or in close proximity to, a lake, lagoon, river or the coast, the consent authority shall take into consideration the need to facilitate public access to the waterfront by requiring dedication of appropriate land, for open space purposes.

Part 7 Provisions relating to high rise buildings

19 Objectives relating to high rise buildings

The objectives relating to high rise buildings are—

- (a) (Repealed)
- (b) to preserve the landscape quality of coastal and foreshore land by encouraging the erection of buildings which are designed in harmony with that landscape.

20 Development applications—high rise buildings

(1) In this clause, unless the context or subject-matter otherwise indicates or requires—

ground level means natural ground level.

height, in relation to a building which has ceilings, means the distance measured vertically from any point on the ceiling of the topmost floor of the building to the ground level immediately below that point.

(1A) (Repealed)

- (2) The consent authority must not consent to a development application to erect a building or to alter an existing building by increasing its height, where the building after erection or alteration will have a height of more than 11 metres, without the concurrence of the Secretary of the Department of Planning and Environment.
- (3) In deciding whether to grant concurrence to a development application in respect of development referred to in subclause (2), the Secretary of the Department of Planning and Environment shall take into consideration—
 - (a) the height, scale, bulk and density of the proposed building,
 - (b) the external appearance and materials used on the exterior of the proposed building,
 - (c) the relationship of the proposed building to the streetscape or landscape,
 - (d) the effect of the proposed building on public amenity, including pedestrian amenity,
 - (e) the effect of the proposed building on wind patterns and wind velocity in public places,
 - (f) the effect of the proposed building on overshadowing of public places,
 - (g) the effect of the proposed building on views from public places,
 - (h) the effect of the proposed building on any item of the environmental heritage in

the vicinity, and

- (i) the effect of reflections from the exterior of the proposed building on roads, public places and buildings in the vicinity.

Schedule 16 Provisions transferred from [Jervis Bay Regional Environmental Plan 1996](#)

1 Application of Schedule

- (1) This Schedule applies to the land identified on the [Shoalhaven Local Environmental Plan 1985 Schedule 16 Lands—Jervis Bay REP 1996 Map](#) being the map of that name that is approved by the Minister when the map is adopted by this clause.
- (2) The map is to be kept and made available for public access in accordance with arrangements approved by the Minister.
- (3) For the purposes of this Schedule, the map may be in, and may be kept and made available in, electronic or paper form, or both.

2 Relationship of Schedule to this and other environmental planning instruments

- (1) Schedule 15 does not apply to land to which this Schedule applies.
- (2) This Plan other than this Schedule does not apply to land shown as Zone 8 (a) National Park or Nature Reserve and Zone 8 (b) Proposed National Park on the zoning map.
- (3) In the event of any inconsistency between this Schedule and this or any other environmental planning instrument, other than a State environmental planning policy, the provisions of this Schedule prevail to the extent of the inconsistency.

3 Objectives of Schedule

The objectives of this Schedule are—

- (a) to protect the natural and cultural values of Jervis Bay, and
- (b) to allow proposals that contribute to the natural and cultural values of the area.

4 Definitions

- (1) In this Schedule—

Council means the Shoalhaven City Council.

habitat corridor means an area of land or water that links areas of natural habitat along which both fauna and flora species feed, breed, disperse, colonise or migrate.

Jervis Bay means the land within the Jervis Bay Region shown edged with a heavy

black line on map 1.

Jervis Bay Region means the land declared to be the Jervis Bay Region by the Minister under section 4 (6) of the *Environmental Planning and Assessment Act 1979*.

proposal means any development that requires consent under this Schedule, except development that is to be or is being dealt with as complying development.

zoning map means map 5, as amended by map 5a and by the maps (or specified sheets of maps) marked as follows—

City of Shoalhaven Local Environmental Plan 1985 (Amendment No 177)

- (2) A reference in this Schedule to a numbered map is a reference to the map having that number in the series of maps marked “*Jervis Bay Regional Environmental Plan 1996*”, “*Jervis Bay Regional Environmental Plan 1996 (Amendment No 1)*” or “*City of Shoalhaven Local Environmental Plan 1985 (Amendment No 177)*” deposited in the head office of the Department of Urban Affairs and Planning and a copy of which is deposited in the Department’s Wollongong Office and in the office of the Council.

5 How to use this Schedule

Note—

Jervis Bay’s natural and cultural values can be preserved if the consequences of a proposal are appreciated and understood. Cultural values include early settlement structures and Aboriginal archaeological sites, such as rock paintings and middens or places of spiritual significance. Natural values include vegetation, creeks, significant rock outcrops and wetlands. This Schedule sets out a process for designing or assessing a proposal so that its consequences can be understood and managed.

A person who wishes to carry out a proposal must show why the proposal should proceed, using the following steps—

- (a) describe the natural and cultural values of the site affected by the proposal,
- (b) evaluate the significance of these values within the Jervis Bay context,
- (c) assess the impact of the proposal on those values identified, both within the site and the Jervis Bay context,
- (d) provide details on how the immediate and cumulative impacts of the proposal will be managed, to achieve the aims of this Schedule.

Note—

The degree of detail provided in this process will be specific to each proposal. The consent or determining authority will provide guidance on the suitable level of detail needed. If the development is designated development, then the Director-General of the Department of Urban Affairs and Planning will provide the requirements for the environmental impact statement.

6 Proposals must be consistent with objectives

The consent authority must not grant development consent to a proposal unless satisfied that the proposal is consistent with the objectives of this Schedule.

7 Catchment protection

Note—

Catchment protection is about managing proposals so that the health of the environment is maintained or improved. Water quality is a measure of the health of a catchment and any proposal has the potential to affect water quality. All proposals need to recognise the potential impact on the catchment and be designed to protect and restore the natural qualities of Jervis Bay.

Water quality determines how a body of water can be used. The relationship between water quality and use is outlined in the *Australian National Water Quality Guidelines for Fresh and Marine Water 1992*. The waterbodies within the area of the Schedule serve two or three uses—protection of aquatic ecosystems, drinking water for livestock or recreation (see map 2). The Schedule requires that these uses be sustained. However, if the current water quality in specific areas could not sustain these uses, then a proposal must show how the water quality will be maintained or improved.

A proposal must—

- (a) for the water quality in any waterbody it may affect, either—
 - sustain uses identified on map 2 and as defined by the *Australian National Water Quality Guidelines for Fresh and Marine Water 1992*, or
 - demonstrate how the water quality will be maintained or improved, if the water quality in those waterbodies does not at that time sustain the uses identified on map 2, and
- (b) outline a water quality management strategy for surface water to demonstrate how paragraph (a) will be achieved, and
- (c) rehabilitate and restore any degraded areas along a waterbody on the site, and
- (d) provide sewerage for all new development (unless the development is within an existing unsewered area). If alternate systems of sewage disposal have been approved by health and environment protection authorities, they may be provided, and
- (e) protect ecosystems and natural habitats, including waterbodies, from degradation.

8 Landscape quality

Note—

The waters of Jervis Bay and its surrounding landscape are part of the nation's natural and cultural heritage. Any proposal needs to recognise the importance of preserving and respecting these features.

A proposal must—

- (a) maintain the visual quality of a waterbody, a wetland, or a foreshore dune, and
- (b) maintain distinct urban communities that have an individual identity, and
- (c) let the landscape, not the structures, be the dominant feature outside the settlements, and
- (d) allow the existing tree canopy, on or around the site, to dominate.

9 Cultural heritage

Note—

There are many sites of special significance to the Aboriginal communities. Coastal sand dune areas, rocky headlands and the flat, well-drained areas along the major creeklines have a high potential for containing Aboriginal archaeological sites. Also the Point Perpendicular lighthouse and the rock platform at Tapalla Point are of State and regional significance. These sites, buildings and the rock platform should be preserved for all people, as a part of our heritage.

- (1) If a proposal is within a coastal sand dune area, on a rocky headland or on a flat, well-drained area along a major creekline, the consent authority must consider the effect of the proposal on the heritage significance of any Aboriginal object known or reasonably likely to be located at the site.
- (2) (Repealed)
- (3) If a proposal is next to or near the following item, it must—
 - (a) protect it, and
 - (b) be complementary to it, in its design and external colour—

Point Perpendicular lighthouse group (including the lighthouse, generator, annexe, three residences and ancillary structure).
- (4) If a proposal is next to or near the following geological site, it must protect it—

Huskisson Tapalla Point rock platform, as identified by the Australian Heritage Commission.

10 Habitat corridors

Note—

Habitat corridors will help to ensure the long term survival and biological diversity of native fauna and flora species in Jervis Bay.

- (1) A proposal on land in a habitat corridor, as shown on map 3, must—
 - (a) be designed to minimise disturbance to the existing structure and species composition of native vegetation communities, and
 - (b) allow native fauna and flora to feed, breed, disperse, colonise or migrate (whether

seasonally or nomadically), and

- (c) regenerate and revegetate degraded lands with local native species, and
- (d) be designed to enhance the retention and augmentation of vegetation native to the area.

(2) If a proposal is on land in a habitat corridor, as shown on map 3, the person proposing to carry out the proposal must show how subclause (1) can be achieved. This should include—

- (a) retaining natural vegetation, and
- (b) clustering development, sharing driveways, setting building envelopes, and
- (c) landscaping with local native species (or non-invasive exotic species for areas close to buildings), and
- (d) designing fences so that fauna movement is not restricted, and
- (e) minimising the use of herbicides and pesticides, and
- (f) providing for bushfire protection.

(3) (Repealed)

11 Disturbed habitat and vegetation

Note—

Some areas of vegetation which once formed part of the proposed habitat corridor system, still have the potential, with active management, to continue to provide important regional resources for wildlife.

Any proposal for land shown by broken hatching on map 3 must be designed to maximise—

- (a) the retention of native vegetation, and
- (b) the rehabilitation of degraded areas.

12 New urban releases

Note—

New housing areas can add to the value and attractiveness of Jervis Bay and contribute to the overall quality of the built environment.

Any new land releases for urban development should be located in the areas indicated on map 4.

13 Tourism development

Note—

Jervis Bay offers unique opportunities for tourism. The special natural qualities of the Bay, the creeks, the beaches and the rural landscape are exceptional. The area offers a broad range of experiences for visitors, and tourism developments that can benefit from these natural qualities while contributing to the special value of Jervis Bay.

A proposal for tourism should achieve the following outcomes if relevant to the proposal—

- (a) contribute to the variety of activities for visitors, and
- (b) contribute to the variety of accommodation for visitors, and
- (c) contribute to the visitor appreciation of the natural and cultural values of Jervis Bay.

14 A National Park

Note—

A National Park is proposed in Jervis Bay because of its many outstanding natural and cultural values. Part of the Park has already been made and part is still proposed to be included in the Park.

This Schedule shows the proposed boundaries of the Park and requires responsible management of the land. Because the Schedule is reserving the land for a future public purpose, it provides for acquisition on the request of the owner.

Note—

Nothing in this clause is to be construed as requiring a public authority to acquire land—see section 27 (3) of the Act.

- (1) The land shown as Zone 8 (a) on the zoning map is National Park or Nature Reserve. All development is prohibited in this zone except for any purpose authorised by or under the [National Parks and Wildlife Act 1974](#) or any purpose ancillary or incidental to any such purpose. Development consent for any such development is not required in this zone.
- (2) The land shown as Zone 8 (b) on the zoning map is Proposed National Park. If you own land in this area, then you may request the Director-General of National Parks and Wildlife to acquire the land. Any request for acquisition should be in writing and the Director-General of National Parks and Wildlife must acquire the land.
- (3) Land shown as Zone 8 (b) on the zoning map—
 - (a) must be managed in a way that—
 - protects the natural heritage, and
 - conserves wildlife (as prescribed in the [National Parks and Wildlife Act 1974](#)), and

- protects the special features, natural scenery and landscape qualities, and
 - protects natural habitats from the negative effects of introduced plants and animals and fire, and
 - prevents soil erosion and maintains the land in a natural condition, and
- (b) must be managed in a way that will provide for opportunities for future Aboriginal ownership, and
- (c) must be managed in a way that will allow for opportunities for co-operative management between the relevant Aboriginal communities and the Director-General of National Parks and Wildlife.
- (4) Any development on land shown as Zone 8 (b) on the zoning map requires the consent of the Council.
- (5) The Council must not grant consent to any development proposed on the land shown as Zone 8 (b) on the zoning map, unless it is satisfied that the provisions of subclause (3) will be achieved.
