Division 1 Preliminary

4A Application of Part

This Part does not apply in respect of confinement of laying fowl for the purposes of carrying or conveying the fowl.

4 Definitions (cf clause 17B 2006 Reg)

In this Part—

floor area of a cage includes the area under any egg baffle, manure deflector, drinking nipple or vee-trough for water.

fowl means a domesticated chicken (*Gallus gallus*).

laying fowl means any fowl being bred, kept or used for the purpose of commercial egg production.

non-cage housing, in relation to laying fowl, means any structure, other than a cage, in which the laying fowl are confined (such as a shed).

Division 2 Laying fowl confined in cages

5 Access to water (cf clause 17C 2006 Reg)

(1) A person must not confine laying fowl in a cage unless the fowl have access—

- (a) to at least 2 independent drinking points, or
- (b) to a water trough the length of which allows at least 10 centimetres for each fowl in the cage.

Maximum penalty—200 penalty units in the case of a corporation and 50 penalty units in the case of an individual.

(2) This clause does not apply in respect of any laying fowl in the period of 60 hours immediately after the fowl is hatched.

(3) In this clause, **drinking point** includes a drinking nipple and a cup drinker but does not include a splash cup situated under a drinking nipple.

6 Cage floors (cf clause 17D 2006 Reg)

A person must not confine laying fowl in a cage unless the cage floor provides support for the forward pointing toes of all fowl in the cage.

Maximum penalty—200 penalty units in the case of a corporation and 50 penalty units in the case of an individual.

7 Cage height (cf clause 17E 2006 Reg)

(1) A person must not confine laying fowl in a cage unless the height of the cage exceeds the height of the tallest fowl, standing normally, in the cage.

Maximum penalty—200 penalty units in the case of a corporation and 50 penalty units in the case of an individual.

- (2) A person must not confine laying fowl in a cage unless the height of the cage is, over at least 65% of the floor area of the cage, not less than 40 centimetres.

Maximum penalty—200 penalty units in the case of a corporation and 50 penalty units in the case of an individual.

- (3) A person must not confine laying fowl in a cage if the height of the cage is less than 35 centimetres at any point.

- (2) For the purposes of this clause, if a cage door opens from the top of the cage, the width of the door is to be measured using the axis on which the door swings and the height of the door is to be measured on the perpendicular to that axis.

9 Multi-deck structure (cf clause 17G 2006 Reg)

- (1) A person must not confine laying fowl in a multi-deck structure unless fowl in the lower decks of the structure are protected from excreta from fowl confined in the higher decks of the structure.

Maximum penalty—200 penalty units in the case of a corporation and 50 penalty units in the case of an individual.

- (3) **Cage containing 1 laying fowl** The minimum floor area of a cage containing only 1 laying fowl is—

(a) if the laying fowl weighs 4.5 kilograms or less—1,000 square centimetres, or

(b) if the laying fowl weighs more than 4.5 kilograms, the area calculated by allowing—

(i) 1 square metre for each 26 kilograms of the total weight of the fowl in the cage, or

(ii) if the total weight of the fowl in the cage is less than 26 kilograms, a proportionate amount of the area mentioned in subparagraph (i).

12 Determination of average weight of laying fowls in more than 30 cages for purposes of

clauses 10 and 11 (cf clause 17J 2006 Reg)

- (1) For the purposes of clauses 10 and 11, if laying fowl are kept in more than 30 cages at any premises, the minimum floor area of those cages is to be determined on the basis of average flock weight, rather than on the basis of the average weight of the fowl in the individual cages. Accordingly, a reference in those clauses to the average weight of laying fowl in a cage is to be read as a reference to the average flock weight.
- (2) **Average flock weight** is the average weight per fowl of all fowl in all the cages concerned, determined in a manner that follows the procedures for counting and weighing set out in the *National Guidelines for RSPCA Inspectors for the Inspection of Layer Hen Cages*, which is included in the *Model Code of Practice for the Welfare of Animals—Domestic Poultry*, 3rd edition, issued by the Agriculture and Resource Management Council of Australia and New Zealand.

Note—
