Division 2 Annual rental fees

80 Calculation of annual rental fees (Former clause 65C of 2010 Reg)

- (1) An annual rental fee specified in Schedule 9 as per hectare, per square kilometre, per square metre or per unit is to be calculated on the basis of the annual rental fee area.
- (2) The **annual rental fee area** is the number of hectares, square kilometres, square metres or units of land comprised in the annual rental fee area for the authorisation for which the annual rental fee is payable, as specified in the record kept by the Secretary under the Act.

- (3) (Repealed)
- (4) If the annual rental fee area includes a part of a hectare, square kilometre, square metre or unit, that part is to be included in the calculation.
- (4A) However, if the annual rental fee area includes a part of a unit outside New South Wales, the part outside New South Wales must be disregarded.

Note—

See also the Act, sections 4A and 172A.

- (5) If there is no annual rental fee area for an authorisation for which an annual rental fee is payable, the annual rental fee is to be calculated as if the authority area, as specified in the record of the authority kept by the Secretary under the Act, were the annual rental fee area.
- (6) To avoid doubt, subclause (5) continues to apply until an annual rental fee area is determined for the authorisation under this Division and specified in the record kept by the Secretary under the Act.

81 Annual rental fee areas (Former clause 65D of 2010 Reg)

- (1) The Secretary is to determine an annual rental fee area for any authorisation that is granted or proposed to be granted on or after 1 July 2012.
- (2) The Secretary may determine (and must determine, if required to do so by this Division) an annual rental fee area for an authorisation granted before 1 July 2012.
- (3) The annual rental fee area is a description of the land to which the authorisation applies, or is proposed to apply, in terms that enable an annual rental fee payable under Part 14A of the Act to be calculated in respect of the authorisation.
- (4) Exclusions specified, or proposed to be specified, in an authorisation are to be counted towards the annual rental fee area.
- (5) The Secretary is required to record an annual rental fee area determined under this clause in the record kept by the Secretary under section 159 of the Act.
- (6) The Secretary may, if the Secretary considers it is fair and reasonable to do so, revise his or her determination of the annual rental fee area for an authorisation by varying the determination or substituting a new determination.

Note—

For example, the Secretary might revise his or her determination of the annual rental fee area if an application for partial renewal of an authority is made and, because of section 117 of the Act, the authority continues to have effect but only in relation to a smaller area of land.

- (7) If the Secretary revises his or her determination of the annual rental fee area for an authorisation, the Secretary is to update the record of the annual rental fee area kept

under section 159 of the Act to reflect that revision.

- (8) It is not necessary to determine an annual rental fee area in respect of an authorisation if the authorisation is exempt from the requirement to pay an annual rental fee.

82 Minimum annual rental fees (Former clause 65E of 2010 Reg)

If the annual rental fee payable in respect of an authorisation under Part 14A of the Act would, but for this clause, be less than \$100, the annual rental fee is taken to be \$100.

- (1) In Schedule 9, a reference to the **initial term** of an authorisation is a reference to the initial term for which the authorisation is granted.

- (3) A term of an authorisation is **after** another term, for the purposes of Schedule 9, if it starts when, or at any time after, the other term ends.

84 Phasing-in of annual rental fees for authorisations granted before 1 July 2012 (Former clause 65G of 2010 Reg)

- (1) In relation to an authorisation in force on 1 July 2012 that was renewed or due for renewal before 1 July 2012, the current term of the authorisation is taken to be the initial term of the authorisation for the purposes of Schedule 9.
- (2) The **current term** of the authorisation is the term starting on the date when the authorisation was last renewed or, if the authorisation has not been renewed by 1 July 2012 but continues in effect under section 117 of the Act, the date that it was last due for renewal.
- (3) The current term of the authorisation ends when the authorisation is next due for renewal (on or after 1 July 2012) or when the authorisation ceases to have effect (whichever happens sooner).
- (4) An authorisation is **due for renewal** when the term for which it is granted or renewed is due to expire (that is, disregarding any period for which the authorisation is taken to continue to have effect under section 117 of the Act).

- (2) An exploration licence (as in force immediately before the commencement of the [Mining Regulation 2010](#)) granted in respect of Group 2 or Group 8 minerals is, on and

from that date, taken to be granted in respect of the Group 2 or Group 8 minerals specified in Schedule 2 to this Regulation.

- (3) An application for an assessment lease or a mining lease (pending immediately before the commencement of the *Mining Regulation 2010*) in respect of agricultural lime is taken to be an assessment lease or mining lease granted in respect of limestone.

Part 3 Provisions consequent on enactment of *Mining Legislation Amendment (Uranium Exploration) Act 2012*

4 Definitions

In this Part—

transitional exploration application means an application for an exploration licence in respect of Group 1 minerals that, because of clause 5, are taken to include thorium.

transitional exploration licence means an exploration licence in respect of Group 1 minerals that, because of clause 5, are taken to include thorium.

5 Changes to mineral groups

Despite the amendment made by Schedule 2 [2] to the *Mining Legislation Amendment (Uranium Exploration) Act 2012*, thorium is taken to continue to be a Group 1 mineral for the following purposes—

- (a) the determination of an application for, and the granting of, an exploration licence or a renewal of an exploration licence, if the application was made (but not determined) before the commencement of that amendment,
- (b) the operation of an exploration licence in respect of Group 1 minerals, and an application for the renewal of, and the renewal of, any such licence, if the original licence was granted before that commencement or granted as referred to in paragraph (a).

6 Exploration licence applications relating to land subject to transitional existing exploration licence or transitional exploration application

- (1) This clause applies to an application for an exploration licence in respect of Group 11 minerals in respect of land that is subject to a transitional exploration application or a transitional exploration licence.
- (2) For the purposes of the application of section 19 of the Act to an application for an exploration licence to which this clause applies—
 - (a) the transitional exploration application or transitional exploration licence is taken to include Group 11 minerals, and
 - (b) consent to the application is not required under that section if the application is accompanied by a statutory declaration by or on behalf of the applicant to the effect that it is not intended to prospect for thorium on the land to which the transitional exploration application or transitional exploration licence applies.
- (3) If an exploration licence is granted after an application for which consent is not obtained because of subclause (2) (b), the exploration licence is taken, to the extent that it applies to land covered by the transitional exploration application or transitional exploration licence to be a licence over Group 11 minerals (other than thorium).
- (4) An exploration licence referred to in subclause (3) is taken to be a licence over all Group 11 minerals if—
 - (a) the transitional exploration application lapses or is refused, or
 - (b) the transitional exploration licence ceases to be in force and is not succeeded by a mining lease or assessment lease that is taken to include thorium.

7 Assessment lease applications relating to land subject to transitional exploration application

For the purposes of the application of section 37 (1) (c) (i) of the Act to an application for an assessment lease sought in respect of thorium on land that is subject to a transitional exploration application, the transitional exploration application is taken to include Group 11 minerals.

Note—

The effect of this provision is to require the consent of the applicant under a transitional exploration licence to the proposed assessment lease. Because clause 5 deems thorium to be included as a Group 1 mineral covered by a transitional exploration licence or a transitional exploration application, the consent of the holder of the transitional exploration licence is also required to be obtained under section 37 of the Act to an application for an assessment lease that applies to thorium on the same land. Similarly, the consent of the holder of a transitional exploration licence or a transitional exploration application is also required to be obtained under section 58 of the Act to an application for a mining lease in respect of thorium on the same land.

- (3) A development application made or purporting to have been made before the commencement of this clause that would have been validly made had this clause been in force at that time is taken to have been validly made (despite section 380AA of the Act).
- (4) In this clause—

development application means an application for development consent or modification of development consent.
