Ports Corporatisation and Waterways Management Regulation 1997

New South Wales

Part 1 Preliminary

1 Name of Regulation

This Regulation is the *Ports Corporatisation and Waterways Management Regulation 1997*.

2 Definition

In this Regulation:

the Act means the *Ports Corporatisation and Waterways Management Act 1995*.

3 Notes

The explanatory note, table of contents and notes in the text of this Regulation do not form part of this Regulation.

Part 2 Port boundaries

4 Boundaries of ports

For the purposes of section 105 of the Act, the boundaries of a port named in Schedule 1 are as described in that Schedule beneath the name of the port concerned.

Note—

Section 105 of the Act enables the regulations to describe the boundaries of any port or area of water. If the regulations do so, a reference in the marine legislation to that port or area of water is a reference to that port or area of water with boundaries as so described.

Part 2A Port charges

Division 1 Preliminary

5 Definitions

(1) In this Part:

charge means a charge under Part 5 of the Act.

container means an article of transport equipment (other than a vessel) that:

- (a) is of a permanent character and accordingly is strong enough to be suitable for repeated use, and
- (b) is specially designed or adapted to facilitate the transport of goods, by one or more modes of transport, without intermediate reloading.

officer of a relevant port authority means:

- (a) if the relevant port authority is the Minister—a delegate of the Minister, or an officer of such a delegate, appointed by the Minister or the delegate (as the case requires) as an officer for the purposes of this Part, or
- (b) if the relevant port authority is a Port Corporation—an officer of the Port Corporation appointed by the Port Corporation as an officer for the purposes of this Part.

owner has the same meaning as in section 48 of the Act.

- (2) Other words and expressions in this Part have the same meaning as they have in Part 5 of the Act.

Division 2 General principles for calculation of charges

6 Rates per tonne

If the amount of any charge is to be calculated at a rate per tonne, that calculation may, at the discretion of the relevant port authority, be made on the basis that 1 tonne is equivalent to:

- (a) a mass of 1000 kilograms, or
- (b) a volume of 1 cubic metre or of 1 kilolitre.

7 Goods in bulk

If, in the terms by which any charge is fixed, reference is made to goods of any specified description being in bulk, the reference is to be construed (unless provision is made to the contrary) as a reference to:

- (a) goods of that description that have been loaded on to or discharged from a vessel at a designated port by means of a pipeline, conveyor, mechanical shovel or bucket, or
- (b) goods of that description that have been loaded on to or discharged from a vessel at a designated port (otherwise than as referred to in paragraph (a)), but only if those goods are the only goods loaded on to or discharged from the vessel at that port.

8 Rounding off

For the purpose of calculating a charge that is to be determined by reference to stated units of measurement (whether of weight or volume) of any goods, the measurement of those goods is the lowest whole number of those units that the actual weight or volume of those goods does not exceed.

9 Gross tonnage

- (1) For the purposes of any charge, the gross tonnage of a vessel is the gross tonnage of the vessel as stated on the International Tonnage Certificate (1969) for the vessel issued in accordance with the *International Convention on Tonnage Measurement of Ships 1969*.
- (2) If no such certificate has been issued in respect of the vessel, the gross tonnage of the vessel is to be calculated by the relevant port authority in accordance with the formula set out in the document known as MSC Circular 653 (entitled "MSC/Circ. 653") issued by the International Maritime Organisation.

Note—

Copies of MSC Circular 653 are available from the Australian Maritime Safety Authority.
